Addendum No. 1

HEAVY CREW TRUCK CAB AND CHASSIS

TWMA 332 BID NO.: 2015-005
February 19, 2015

The following information, clarifications, changes and modifications are by reference incorporated into the bid documents for the above referenced project. Any work item or contract provision not changed or modified will remain in full force and effect. The bid date and time and construction schedule remain the same.

QUESTION AND RESPONSE

Question No. 1:

Can you clarify what the Gross Combination Weight (GCW) should be for the Cab and Chassis? That is the Gross weight of the truck and also any trailer it may be pulling. Under page 1 of the specification, Transmission, Automatic: the phrase "with 80,000 GVW & GCW Max." is stated.

That appears to be a rating for the transmission, but I do not see any rating for the Cab and Chassis. 80,000 GCW is excessively high for this class of truck. If you don't need a rating that is fine too.

Response to Question No. 1:

The truck needs to have a GVW rating minimum of 25,500 lbs, and a GVC of 80,000 lbs.
