Addendum No. 1
FLEISH FLUME DEMOLITION AND TIE-IN
PWP Bid No. WA-2015-221
June 23, 2015

The following information, clarifications, changes and modifications are by reference incorporated into the bid documents for the above referenced project. Any work item or contract provision not changed or modified will remain in full force and effect. The bid date and time and construction schedule remain the same.

CLARIFICATION

Clarification Item No. 1: The pre-bid meeting for this project will be followed by a mandatory site visit to the flume to show bidders the condition of the existing flume, and the site conditions that will be encountered during the Work. Access to the site will require walking and hiking over rough terrain with areas of rocks, slopes, and unstable footing, and also ducking under low sections of flume. Pre-bid attendees should dress appropriately with long pants, stable footwear with good traction, and bring hard hats. Gloves are also suggested to hold on to dry, splintery lumber.

TMWA staff, contractors, and consultants have walked this area many times so it is not an extreme hike, but bidders should be prepared for conditions similar to a short, moderate hike through hilly brush.

The site visit is a requirement of the pre-bid meeting to ensure Contractors are fully aware of the flume condition and the location of the Work. Bids from contractors not completing this portion of the meeting will be rejected.

Please note that hard hats will be available to borrow for bidders not able to bring their own.

Thank you.

END OF ADDENDUM #1
