

SMART ABOUT WATER TIP

How to Water Deeper and Less Often: Test the amount of water your lawn needs: (1) Water your lawn until the water begins to run off. (2) Let the water soak in for about an hour. The water should reach about 6-8 inches into the soil. You can measure this by pushing a screwdriver into the ground. (3) If you cannot push a screwdriver easily to that depth, water again to the time of runoff and repeat the process until the water reaches 6-8 inches.

KNOW YOUR WATERING DAYS!

Being smart about water is a way of life in the Truckee Meadows. Running your sprinklers three days a week keeps your yard healthy and your water bill low while avoiding waste.

What are your watering days? Your address is the key! Flip to the schedule on the other side to find out.

A Checklist for Smart Water Use:

- ✓ Please only use sprinklers on your three assigned days.
- ✓ Do not water on Mondays. It's a day of rest for our water system.
- ✓ To reduce evaporation, please do not water between noon and 6 p.m.
- ✓ Take care not to water when it's windy or raining.
- ✓ To protect flowers, shrubs, trees and gardens, hand water with a hose and nozzle anytime.

Truckee Meadows Water Authority is a not-for-profit, community-owned water utility, overseen by elected officials and citizen appointees from Reno, Sparks and Washoe County.

OUR WATER. OUR COMMUNITY. ASSIGNED DAY WATERING WORKS!

Tear out this Schedule

Tape it to your refrigerator, sprinkler controller box or anywhere else to help you remember your watering days. Read more details and tips on the back of this card.

Have Other Questions?
