

STANDING ADVISORY COMMITTEE AGENDA

Tuesday, February 3, 2026 at 3:00 p.m.
Truckee Meadows Water Authority
Independence Room, 1355 Capital Blvd., Reno, NV

NOTES:

1. The announcement of this meeting has been posted at the following locations: Truckee Meadows Water Authority (1355 Capital Blvd., Reno), at <http://www.tmwa.com>, and State of Nevada Public Notice Website, <https://notice.nv.gov/>.
2. In accordance with NRS 241.020, this agenda closes three working days prior to the meeting. We are pleased to make reasonable accommodations for persons who are disabled and wish to attend meetings. If you require special arrangements for the meeting, please call 834-8002 at least 24 hours before the meeting date.
3. Staff reports and supporting material for the meeting are available on the TMWA website at <http://www.tmwa.com/meeting/> or you can contact Sonia Folsom at (775) 834-8002. Supporting material is made available to the general public in accordance with NRS 241.020(6).
4. The Committee may elect to combine agenda items, consider agenda items out of order, remove agenda items, or delay discussion on agenda items. Arrive at the meeting at the posted time to hear item(s) of interest.
5. Asterisks (*) denote non-action items.
6. Public comment is limited to three minutes and is allowed during the public comment periods. The public may sign-up to speak during the public comment period or on a specific agenda item by completing a "Request to Speak" card and submitting it to the clerk. In addition to the public comment periods, the Chairman has the discretion to allow public comment on any agenda item, including any item on which action is to be taken.
7. In the event the Chair and Vice-Chair are absent, the remaining SAC members may elect a temporary presiding officer to preside over the meeting until the Chair or Vice-Chair are present (**Standing Item of Possible Action**).

1. Roll call*
2. Public comment — limited to no more than three minutes per speaker*
3. Approval of the agenda (**For Possible Action**)
4. Approval of the minutes of October 7, 2025 meeting (**For Possible Action**)
5. Water supply update — Nick White*
6. Presentation on TMWA's fiscal year 2025 Annual Comprehensive Financial Report — Sophie Cardinal*
7. Presentation of Q1 FY 2026 financial results — Matt Bowman*
8. Cost of Service Study Update — Matt Bowman (**For Possible Action**)

9. Presentation on the Truckee River Fund — Sonia Folsom and Kara Steeland*
10. Presentation on upstream watershed protection program — Kara Steeland*
11. Discussion and possible direction to staff regarding agenda items for future meetings **(For Possible Action)**

NEXT REGULAR SAC MEETING: April 7, 2026

12. Staff Items* (Unless otherwise listed with a topic description, this portion of the agenda is limited to announcements)
13. Committee Items* (Unless otherwise listed with a topic description, this portion of the agenda is limited to announcements)
14. Public Comment — limited to no more than three minutes per speaker*
15. Adjournment*

TRUCKEE MEADOWS WATER AUTHORITY
STANDING ADVISORY COMMITTEE - WORKSHOP
DRAFT MINUTES
October 7, 2025

The Standing Advisory Committee (SAC) met at TMWA, 1355 Capital Blvd, Reno, NV. Chair Krmpotic called the meeting to order at 3:01 p.m.

1. ROLL CALL

Primary Members and Voting Alternates Present: Fred Arndt, Jordan Hastings, John Krmpotic, Justin McDougal, Neil McGuire, Ken McNeil, Connor Naisbitt, *Jonnie Pullman, Dale Sanderson, and Jerry Wager.

Alternate Members Present: Ryan Greenhalgh.

Primary Members and Alternates Absent: Colin Hayes, Chris Melton, Kevin Ryan and Alex Talmant.

Staff Present: Matt Bowman, Sophie Cardinal, Ryan Dixon, Sonia Folsom, David Kershaw, Eddy Quaglieri, Shawn Stoddard, Marci Westlake, Nick White, John Zimmerman, and Legal Counsel Jake Herzik (PBL).

****Member Pullman arrived at 3:05p.m.***

2. PUBLIC COMMENT

There was no public comment.

3. APPROVAL OF THE AGENDA

Upon motion duly made by Member Wager, and seconded by Member McGuire, and carried by unanimous consent of the members present, the Committee approved the agenda.

4. APPROVAL OF THE MINUTES OF AUGUST 25, 2025 WORKSHOP

Member McNeil inquired about lack of information in the draft minutes since there was extensive discussion regarding the Cost of Service & Rate Design Studies.

John Zimmerman, General Manager, and Jake Herzik, Legal Counsel, explained that the minutes required under Open Meeting Law need only be a summary of the discussion and not a transcript. Also, there is a video recording available to view the entire meeting.

Upon motion duly made by Member Sanderson, and seconded by Member Hastings, and carried nine to one with Member McNeil dissenting, the Committee approved the minutes of August 25, 2025.

5. WATER SUPPLY UPDATE

Nick White, Senior Hydrologist, presented the water supply update. Mr. White noted that the 2026 water year commenced on October 1, the 2025 water year showed average snow water equivalents, precipitation and soil moisture levels, the Truckee Basin is currently at 2,000% above average due to the recent storms, forecasted another potentially average year for Lake Tahoe elevations, and upstream reservoir storage is projected to increase by 41,000 acre-feet by next fall.

6. INFORMATIONAL UPDATE ON PROPOSED CHANGES TO RULE 7 WATER RIGHT DEDICATION REQUIREMENTS

Eddy Quaglieri, Natural Resources Manager, and Shawn Stoddard, Senior Resource Economist, PhD, presented the proposed changes to Rule 7. Mr. Quaglieri stated that the last time Rule 7 was reviewed was in 2019 and it is good practice to review demand estimates every five years or so. The analysis focused on single-family residential and multi-family residential dedication units, with commercial dedications based on fixture counts. The proposed formula change resulted in an 18% decrease in water dedication for 6,000 square foot lots, while multifamily properties saw a reduction from 0.11 to 0.10 acre-feet per unit.

Members of the Committee inquired about only analyzing parcels between 2016-2020, the increase in the number of irrigation customers, and if it is true that older homes use more water than new homes. Mr. Quaglieri replied that the rationale for analyzing parcels with build dates between 2016 and 2020, ensuring a full four years of data for matured landscapes and Dr. Stoddard added the increase in irrigation is a result of the 2016 drought and call for conservation, which takes a few years to recover, and yes, older homes use more water which is based on multiple factors such as technology, lot size and landscaping.

7. PRESENTATION OF UNAUDITED FISCAL YEAR 2025 FINANCIAL RESULTS

Mat Bowman, Chief Financial Officer, presented the unaudited financial results for FY 2025. Mr. Bowman noted that hydroelectric sales were \$4.2M (close to setting another record), capital contributions were slightly below budget and the significant capital spending, including over \$50 million on repair and replace projects, resulting in a total cash balance of \$160 million.

8. PRESENTATION OF PRELIMINARY FY 2026 – 2030 FUNDING PLAN

Mr. Bowman presented the preliminary FY 2026-2030 funding plan. He explained that the 3.5% rate increase scheduled for June 2026 is part of the previously approved rate plan and the proposed rate increases outlined in the funding plan are not yet part of an approved rate plan.

Mr. Zimmerman added that a lot of factors contribute to the funding requirements of TMWA including: drought, recession, fire hydrant maintenance, TMWA's complex system, and replace and repair of older facilities.

Mr. Bowman updated the Committee on the Cost of Service study which was presented to the Board on September 17th and will move forward with public outreach scheduled for December with final adoption in January/February.

Upon motion duly made by Member Pullman, and seconded by Member McGuire, and carried by unanimous consent of the members present, the Committee approved recommending to the Board the preliminary FY 2026 – 2030 funding plan.

9. PRESENTATION AND POSSIBLE RECOMMENDATION TO THE BOARD, OF APPLICATIONS TO FILL THE SENIOR CITIZEN ALTERNATE CUSTOMER CLASS VACANCY, SENIOR CITIZEN ALTERNATE CUSTOMER CLASS VACANCY, AT-LARGE 1 AND 2 ALTERNATE CUSTOMER CLASS VACANCIES, AND RESIDENTIAL REPRESENTATIVE 1 AND 2 CUSTOMER CLASS ALTERNATE VACANCIES AND OTHER POSSIBLE VACANCIES FROM THE FOLLOWING POOL OF CANDIDATES LISTED IN ALPHABETICAL ORDER: KEITH HAYES, AND RAY TOWNE

Sonia Folsom, Executive Assistant, presented the staff report.

Upon motion duly made by Member McGuire, and seconded by Member Arndt, and carried by unanimous consent of the members present, the Committee approved recommending to the Board Ray Towne to fill the Senior Citizen Alternate vacancy.

Upon motion duly made by Member Pullman, and seconded by Member Naisbitt, and carried by unanimous consent of the members present, the Committee approved recommending to the Board Keith Hayes to fill the At-Large 2 Alternate vacancy.

10 UPDATE ON STANDING ADVISORY COMMITTEE MEMBERSHIP

Ms. Folsom informed the Committee that all but Colin Hayes and Kevin Ryan will continue for another two-year term.

Chair Krmpotic read Member Hayes' comments to the Committee for the record:

"It has been an honor to serve with each of you. I have enjoyed representing BANN since 2010, but it is time for me to step back and allow someone else to serve in this capacity. Thanks to all of TMWA's staff

who have been so courteous to this group and so generous with their time and expertise. It is good to know the water company is in such good hands. Thank you all.”

11. PRESENTATION AND POSSIBLE APPROVAL OF 2026 MEETING SCHEDULE

Ms. Folsom presented the 2026 meeting calendar.

Upon motion duly made by Member Wager, and seconded by Member Hastings, and carried by unanimous consent of the members present, the Committee approved the 2026 meeting schedule.

12. ELECTION OF CHAIR AND VICE CHAIR FOR 2026

Ms. Folsom opened up the call for nominations for Chair and Vice Chair for 2026.

Upon motion duly made by Member McGuire, and seconded by Member Arndt, and carried by nine to one with Member McNeil dissenting, the Committee approved John Krmpotic as Chair for 2026.

Upon motion duly made by Member Hastings, and seconded by Member Pullman, and carried by nine to one with Member McNeil dissenting, the Committee approved Neil McGuire as Vice Chair for 2026.

13. DISCUSSION AND POSSIBLE DIRECTION TO STAFF REGARDING AGENDA ITEMS FOR FUTURE MEETINGS

Upon motion duly made by Member Pullman, and seconded by Member Naisbitt, and carried by unanimous consent of the members present, the Committee approved the agenda items for future meetings.

Next meeting:

1. Water Supply Update
2. Presentation of Q1 FY 2026 financial results
3. FY 2025 Annual Comprehensive Financial Report
4. Truckee River Fund presentation
5. Upstream Watershed Protection
6. Cost of Service Study update
7. Discussion on rotation of Chair and Vice Chair

14. STAFF ITEMS

Mr. Zimmerman thanked the Committee for their continued support and engagement.

15. COMMITTEE ITEMS

Chair Krmpotic stated that he cut Member McNeil off after prolonged discussion not out of disrespect, but rather for sake of time and not to repeat the same topic multiple times, however, he welcomed spirited debate.

16. PUBLIC COMMENT

There was no public comment.

17. ADJOURNMENT

With no further items for discussion, Chair Krmpotic adjourned the meeting at 4:35 p.m.

Approved by the Standing Advisory Committee in session on _____.

Sonia Folsom, Recording Clerk

***Member Pullman was present for agenda items 4 through 17 only.*

TO: Board of Directors
THRU: John R. Zimmerman, General Manager
FROM: Sophie Cardinal, Financial Controller
DATE: November 26, 2025
SUBJECT: **Discussion and action on adoption of Resolution No. 339: A resolution to approve the Annual Comprehensive Financial Report for fiscal year ended June 30, 2025**

Recommendation

TMWA staff recommends the Board approve the Annual Comprehensive Financial Report (ACFR) for the fiscal year ended June 30, 2025, by adoption of resolution and requests direction to the Chief Financial Officer to forward the appropriate documentation to the State of Nevada Department of Taxation (NDT) within the prescribed deadline.

Summary

Pursuant to Nevada Revised Statute 354.624, TMWA is required to provide an annual audit of its financial statements as reported in its ACFR. The financial audit must be conducted in accordance with generally accepted auditing standards in the United States, including findings on compliance with statutes and regulations, and an expression of opinion on the financial statements. The audit must also be conducted by a certified public accountant and be completed by November 30th.

The report, opinion, and findings of the auditor contained in the ACFR must be presented at a TMWA Board meeting held not more than 30 days after the report is completed. Immediately thereafter, the entire report, together with the management letter required by generally accepted auditing standards in the United States, must be filed with the Board clerk, the County clerk, and the NDT.

TMWA's ACFR for the fiscal year ended June 30, 2025, has been audited by Eide Bailly LLP. The ACFR includes the letter of transmittal, management's discussion and analysis, the audit report, the financial statements, required supplementary information, statistical schedules, and the compliance section. The financial statements include the Statements of Net Position (Balance Sheets); Statements of Revenues, Expenses and Changes in Net Position (Income Statements); Statements of Cash Flows; and Statements of Fiduciary Net Position and Changes in Fiduciary Net Position for TMWA's Other Postemployment Benefit Trust Funds.

Financial Performance

Complete information on TMWA's financial performance for the fiscal year ended June 30, 2025, is shown in the ACFR. Management's Discussion and Analysis in the financial section also provides a detailed discussion of comparative financial performance with the previous fiscal year.

A summary of TMWA's overall financial performance for the fiscal year ended June 30, 2025, is shown below:

- Assets and deferred outflow of resources totaled \$1,406.1 million.
- Liabilities and deferred inflow of resources totaled \$415.9 million.
- Net position totaled \$990.2 million.
- The change in net position (net income) totaled \$54.8 million.
- Cash and investments totaled \$160.2 million and decreased \$27.6 million from the prior year.
- Debt totaled \$305.5 million and decreased \$22.4 million from the prior year.
- Federal grant expenditures totaled \$1.4 million and warranted a Single Audit.

Audit Results

Eide Bailly LLP opined that the financial statements present fairly, in all material respects, the financial position of the business-type activities, and the fiduciary activities of TMWA, as of June 30, 2025 and 2024, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America (GAAP). This is considered an unqualified audit opinion and is the highest level of opinion an auditor can render.

In planning and performing the audit of the financial statements, Eide Bailly LLP considered TMWA's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing their opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of TMWA's internal control. Accordingly, Eide Bailly LLP did not express an opinion on the effectiveness of TMWA's internal control. Their consideration of internal control was for the limited purpose described above and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. Eide Bailly LLP is required, however, to communicate to those charged with governance all material weaknesses and significant deficiencies identified during the audit. No deficiencies were identified during the audit of the fiscal year ended June 30, 2025.

Eide Bailly LLP also performed a single audit to evaluate TMWA's use of federal funds; however, the firm has not yet completed the related compliance reports due to a delay in the issuance of the 2025 Compliance Supplement by the Office of Management and Budget. Eide Bailly LLP will conclude the single audit as soon as the 2025 Compliance Supplement becomes available. TMWA will incorporate Eide Bailly LLP's compliance reports into the FY25 ACFR thereafter. Based on discussions with Eide Bailly LLP after audit fieldwork, TMWA expects no issues regarding compliance but expects a material weakness in internal control related to reporting federal financial assistance expenditures in the incorrect period. TMWA has already enhanced internal controls to prevent this from occurring in the future.

Additional Reporting

In conjunction with the ACFR, TMWA is also pleased to publish the Popular Annual Financial Report (PAFR) for the fiscal year ended June 30, 2025. TMWA recognizes that the ACFR, while it maintains compliance with GAAP and other standards, is often complicated and too detailed for those without an accounting background. The PAFR is therefore presented as a summarized version of the ACFR, specifically designed to highlight essential elements and often in a more visually striking way. TMWA intends for the PAFR to increase transparency, accountability, and communication with interested parties.

Recommended Motion

Move to adopt Resolution No. 339 to approve the Annual Comprehensive Financial Report for fiscal year ended June 30, 2025.

November 17, 2025

To the Board of Directors
Truckee Meadows Water Authority
Reno, Nevada

We have audited the financial statements of Truckee Meadows Water Authority ("TMWA") as of and for the year ended June 30, 2025, and have issued our report thereon dated November 17, 2025. Professional standards require that we advise you of the following matters relating to our audit.

Our Responsibility in Relation to the Financial Statement Audit under Generally Accepted Auditing Standards and *Government Auditing Standards*

As communicated in our letter dated August 21, 2025, our responsibility, as described by professional standards, is to form and express an opinion about whether the financial statements that have been prepared by management with your oversight are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America. Our audit of the financial statements does not relieve you or management of its respective responsibilities.

Our responsibility, as prescribed by professional standards, is to plan and perform our audit to obtain reasonable, rather than absolute, assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control over financial reporting. Accordingly, as part of our audit, we considered the internal control of TMWA solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

We are also responsible for communicating significant matters related to the audit that are, in our professional judgment, relevant to your responsibilities in overseeing the financial reporting process. However, we are not required to design procedures for the purpose of identifying other matters to communicate to you.

We have provided our comments regarding internal controls during our audit in our Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards* dated November 17, 2025.

Planned Scope and Timing of the Audit

We conducted our audit consistent with the planned scope and timing we previously communicated to you.

Compliance with All Ethics Requirements Regarding Independence

The engagement team, others in our firm, as appropriate, our firm, and other firms utilized in the engagement, if applicable, have complied with all relevant ethical requirements regarding independence.

Qualitative Aspects of the Entity's Significant Accounting Practices

Significant Accounting Policies

Management has the responsibility to select and use appropriate accounting policies. A summary of the significant accounting policies adopted by TMWA is included in Note 1 to the financial statements. There have been no initial selection of accounting policies and no changes in significant accounting policies or their application during year ended June 30, 2025, except for the implementation of GASB Statement No. 101, *Compensated Absences*, and GASB Statement No. 102, *Certain Risk Disclosures*, as disclosed in the financial statements. No matters have come to our attention that would require us, under professional standards, to inform you about (1) the methods used to account for significant unusual transactions and (2) the effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus.

Accounting Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's current judgments. Those judgments are normally based on knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments. The most sensitive accounting estimates affecting the financial statements are:

- Management's estimate of the pension liability is based on actuarial valuation, which is calculated based on the employee information submitted by TMWA to the Public Employees' Retirement System of the State of Nevada (PERS).
- Management's estimate of the actuarial accrued liability for OPEB is based on third party actuarial valuation, which is calculated based on information submitted by TMWA to the actuary.
- Management's estimate of the delivered but unbilled water sales revenue is based upon number of days in the cycle and water usage.
- Management's estimate of the allocation of administrative costs to capital assets is based upon the year-to-date construction salaries and wages relative to total construction and indirect salaries and wages.
- Management's estimate of the value of the developer dedicated infrastructure and other donated capital assets is based on acquisition value (as defined under GASB Statement No. 72) using engineering cost indices at the time of dedication or donation.

- Management's estimate of the compensated absences liability is based on estimates of leave used.

We evaluated the key factors and assumptions used to develop these accounting estimates and determined that they are reasonable in relation to the financial statements taken as a whole.

Financial Statement Disclosures

Certain financial statement disclosures involve significant judgment and are particularly sensitive because of their significance to financial statement users. The most sensitive disclosures affecting TMWA's financial statements relate to:

- Disclosures related to pension and OPEB benefits

Significant Difficulties Encountered during the Audit

We encountered no significant difficulties in dealing with management relating to the performance of the audit.

Uncorrected and Corrected Misstatements

For purposes of this communication, professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that we believe are trivial, and communicate them to the appropriate level of management. Further, professional standards require us to also communicate the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole. Uncorrected misstatements or matters underlying those uncorrected misstatements could potentially cause future-period financial statements to be materially misstated, even though the uncorrected misstatements are immaterial to the financial statements currently under audit. There were no uncorrected or corrected misstatements identified as a result of our audit procedures.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a matter, whether or not resolved to our satisfaction, concerning a financial accounting, reporting, or auditing matter, which could be significant to TMWA's financial statements or the auditor's report. No such disagreements arose during the course of the audit.

Circumstances that Affect the Form and Content of the Auditor's Report

For purposes of this letter, professional standards require that we communicate any circumstances that affect the form and content of our auditor's report.

As discussed in Note 15 to the financial statements, TMWA implemented GASB 101 during the year ended June 30, 2025. Accordingly, a restatement has been made to the business-type activities for the year ended June 30, 2024. As a result of implementing the standard, there was no effect on beginning net position as of July 1, 2023. Our opinions are not modified with respect to this matter.

As discussed in Note 16 to the financial statements, TMWA updated its measurement methodology over the calculation of the outstanding portion of bond proceeds that were not used for capital purposes in the net investment in capital assets net position calculation during the year ended June 30, 2025. Our opinions are not modified with respect to this matter.

Representations Requested from Management

We have requested certain written representations from management that are included in the management representation letter dated November 17, 2025.

Management's Consultations with Other Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters. Management informed us that, and to our knowledge, there were no consultations with other accountants regarding auditing and accounting matters.

Other Significant Matters, Findings, or Issues

In the normal course of our professional association with TMWA, we generally discuss a variety of matters, including the application of accounting principles and auditing standards, significant events or transactions that occurred during the year, operating conditions affecting the entity, and operating plans and strategies that may affect the risks of material misstatement. None of the matters discussed resulted in a condition to our retention as TMWA's auditors.

Other Information Included in Annual Reports

Pursuant to professional standards, our responsibility as auditors for other information, whether financial or nonfinancial, included in TMWA's annual reports, does not extend beyond the financial information identified in the audit report, and we are not required to perform any procedures to corroborate such other information. However, in accordance with such standards, we have:

- Read the other information and considered whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated.

Our responsibility also includes communicating to you any information which we believe is a material misstatement of fact. Nothing came to our attention that caused us to believe that such information, or its manner of presentation, is materially inconsistent with the information, or manner of its presentation, appearing in the financial statements.

Other Matters

The basic financial statements include the financial statements of TMWA and the Truckee Meadows Water Authority OPEB Trust Fund and the Truckee Meadows Water Authority Post-Retirement Medical Plan & Trust, both fiduciary component units of TMWA, which we considered to be significant components of the basic financial statements. Consistent with the audit of the basic financial statements as a whole, our audits included obtaining an understanding of TMWA, the Truckee Meadows Water Authority OPEB Trust Fund and the Truckee Meadows Water Authority Post-Retirement Medical Plan & Trust and their environment, including internal control, sufficient to assess the risks of material misstatement of the basic financial statements of TMWA, the Truckee Meadows Water Authority OPEB Trust Fund and the Truckee Meadows Water Authority Post-Retirement Medical Plan & Trust and completion of further audit procedures.

This report is intended solely for the information and use of the TMWA Board of Directors and management of TMWA and is not intended to be and should not be used by anyone other than these specified parties.

A handwritten signature in black ink that reads "Eide Bailly LLP". The signature is written in a cursive, flowing style.

To the Board of Directors, Our Customers, and Bondholders:

We are pleased to submit the Annual Comprehensive Financial Report (Annual Report) for the Truckee Meadows Water Authority (TMWA) for the fiscal year ended June 30, 2025. The purpose of the report is to provide the Board of Directors (Board), our customers, and bondholders as well as other interested parties with reliable financial information about TMWA. TMWA's Finance Department has prepared the Annual Report in accordance with Generally Accepted Accounting Principles (GAAP).

Management assumes full responsibility for the completeness and reliability of the information contained in this Annual Report, based upon a comprehensive framework of internal control established for this purpose. Because the cost of internal control should not exceed benefits, the objective is to provide reasonable rather than absolute assurance that the financial statements are free of any material misstatements.

Nevada Revised Statutes and bond covenants require that an independent certified public accounting firm selected by the Board audit TMWA's financial statements on an annual basis. Eide Bailly LLP, a firm of licensed certified public accountants, has audited TMWA's basic financial statements as of and for the fiscal years ended June 30, 2025 and 2024. The independent auditor's report is presented in the Financial Section of this report. TMWA complies with the Local Government Budget and Finance Act as embodied in Chapter 354 and Public Investments as embodied in Chapter 355 of the Nevada Revised Statutes.

The Annual Report consists of four sections:

Introductory Section - This section is comprised of the letter of transmittal which contains information relative to TMWA's background, a listing of TMWA's principal officers, organizational chart, and other relevant information to assist the reader in understanding TMWA's operations, financial condition, and accomplishments.

Financial Section - This section consists of TMWA's basic financial statements, supplementary financial information, and the independent auditor's report on the basic financial statements. This section also includes Management's Discussion and Analysis (MD&A), which provides a narrative overview and explanation of the results reflected in the basic financial statements. The financial statements presented in this section were prepared in accordance with GAAP. TMWA's financial activities are reported as an enterprise fund (proprietary fund type).

Statistical Section - This section is comprised of selected financial, operational, and demographic information presented annually and includes statistics for the past ten years.

Compliance Section - This section consists of information regarding TMWA's compliance with standards and audit requirements. In particular, this section reports on TMWA's conformance with auditing standards generally accepted in the United States of America (GAAS), *Government*

Auditing Standards issued by the Comptroller General of the United States, and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200 (Uniform Guidance).

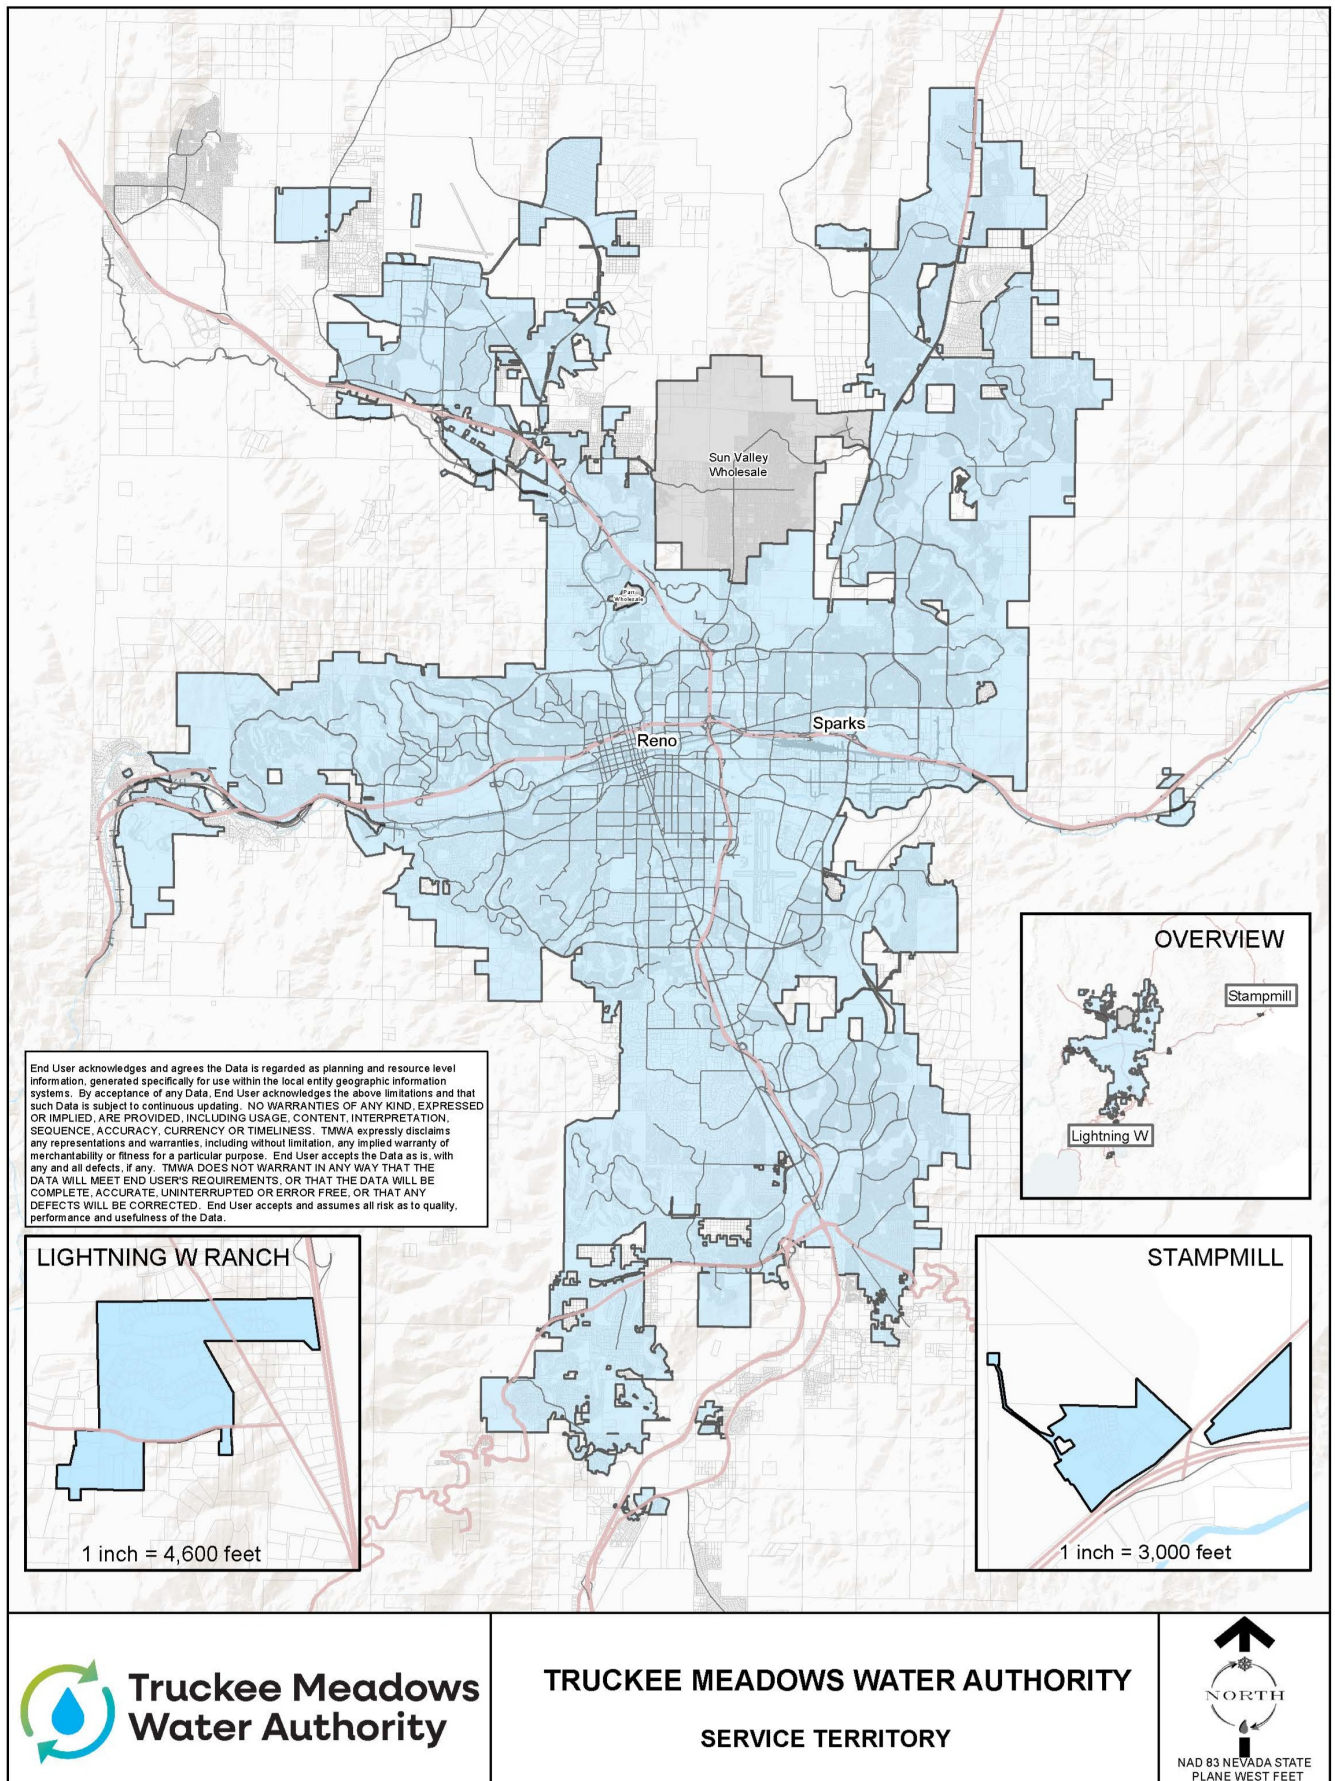

REPORTING ENTITY

TMWA was formed as a Joint Powers Authority (JPA) pursuant to Chapter 277 of the Nevada Revised Statutes and is a political subdivision of the State of Nevada. TMWA is separate from its member agencies: City of Reno, City of Sparks, and Washoe County. TMWA was formed in November 2000 for the purpose of acquiring the assets of the water division of Sierra Pacific Power Co. (SPPCo), a subsidiary of Sierra Pacific Resources, now known as NV Energy, with the goal of retaining local control over the water resources of the area. TMWA took over the water system assets on June 11, 2001. Amendments to the JPA were approved by the member agencies and the Attorney General's Office of the State of Nevada effective February 3, 2010. The amendments were made in anticipation of the consolidation of TMWA, Washoe County's water utility, and another water utility named South Truckee Meadows General Improvement District (STMGID). The consolidation of the water utilities occurred on January 1, 2015 with TMWA as the continuing entity. There are no component units associated with this financial reporting entity.

TMWA has no financial interdependence with its member agencies. TMWA has broad powers to finance, construct, and operate the water system, for the diversion, treatment, distribution, and sale of treated water to retail and wholesale customers. TMWA has full authority to set water rates for services subject to the approval of the TMWA Board, without approval by other entities. TMWA is a tax-exempt entity for purposes of federal taxes, State of Nevada property and sales and use taxes, and other state taxes. TMWA pays property taxes in Nevada and Sierra Counties of California for the privilege of storing water in private and federal reservoirs. TMWA has no taxing authority.

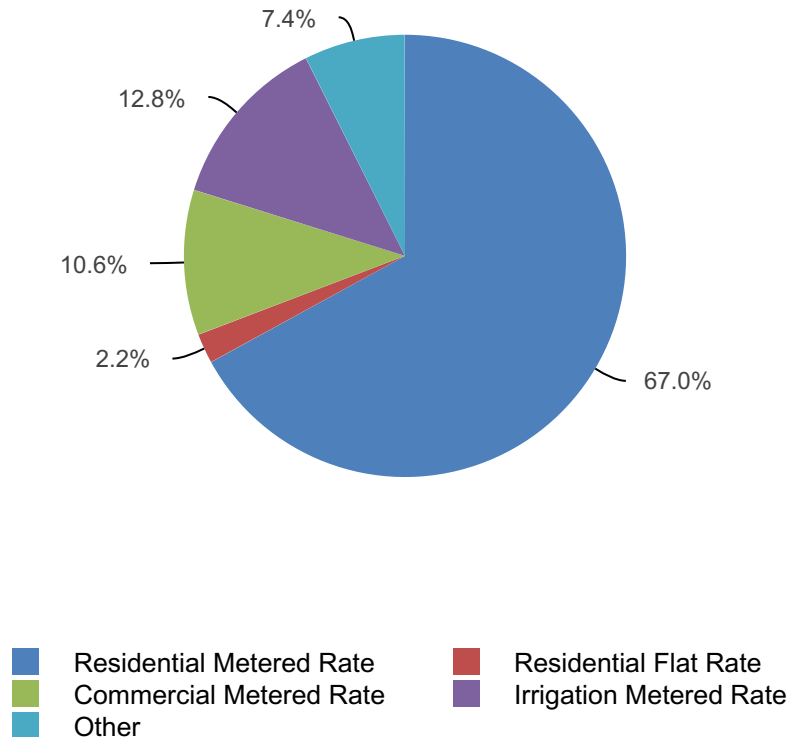

TMWA has over 140,000 service connections and two wholesale customers. TMWA operates within the Truckee Meadows Service Area. TMWA has only one significant wholesale customer, the Sun Valley General Improvement District (SVGID) located north of the Reno-Sparks main metropolitan area. SVGID is wholly dependent upon TMWA water deliveries as this district has no source of water supply. There is one water delivery contract associated with this wholesale connection.

The map on the following page reflects TMWA's service territory.

The following graph depicts the proportion of operating revenues by class for fiscal year 2025:

TMWA Operating Revenues \$132.3 Million

The metering of the water system, which began under Sierra Pacific in 1995, presents various operational solutions for TMWA. These solutions present the opportunity to collect accurate data on water usage by customer class. This allows TMWA to make more accurate cost of service analyses, to make water rates more equitable across customer classes, and to better anticipate future water resource and water facility requirements. Since the acquisition of the water system, TMWA has metered nearly 100% of water services. Currently, there are less than 650 water services that do not have a meter installed and are billed on a flat rate. These are problematic and relatively expensive services to convert to meters with multiple customers on a single service line.

The Board adopted a goal in August 2003 of maintaining a senior lien debt coverage ratio of at least 1.50 times recurring revenues less operating expenses divided by annual senior lien debt service. This calculation excludes developer facility charges and other fees associated with new development. This target is sufficient to meet minimum debt service coverage requirements, fund reconstruction of the water system on a pay-go basis, and manage TMWA's senior lien bonding capacity to allow for potential future senior lien bond sales if necessary. These measures were deemed necessary to maintain water system infrastructure in a prudent manner and ensure that TMWA's bondholders are adequately protected. There are no other restrictions, commitments, or other limitations that would restrict the unrestricted cash assets for use in meeting TMWA's

obligations. TMWA's senior lien debt coverage was approximately 1.66x and with certain developer fees and charges was approximately 2.27x as of June 30, 2025.

ECONOMIC OUTLOOK AND WATER RESOURCES

The Reno-Sparks metropolitan area enjoys a moderate climate, offers a wide variety of year-round recreational opportunities, and has a favorable tax structure. It is also centrally located in the Pacific region affording efficient distribution of goods throughout the western United States. Northern Nevada's favorable business tax environment nurtures steady growth in TMWA's service area and nearby communities in manufacturing, distribution, warehousing and industrial businesses. TMWA's service area has experienced steady growth since TMWA's inception in 2001. With a population of approximately 353,000 in 2001, Washoe County's population has grown 44% to over 507,000 in 2024.

Reflecting a diverse and strong regional economy, taxable sales in Washoe County remained steady in fiscal year 2025 with a slight increase of 4% from the prior year. Prior to fiscal year 2025, Washoe County experienced taxable sales changes of -2% and 1% in fiscal years 2024 and 2023, respectively. Washoe County's unemployment rate remains stable and is less than one percent greater than the national unemployment rate. At June 30, 2025, Washoe County's unemployment rate was 4.6% compared to the national unemployment rate of 4.1%.

To ensure appropriate and responsible water resource availability for current and future water demands, TMWA prepares and frequently updates a detailed [Water Resource Plan](#) (WRP). The TMWA Board approved the most recent iteration of the WRP in October 2025 for the years 2025-2045. The WRP was previously updated in fiscal year 2021 and covered years 2020-2040. The WRP addresses current water resources, future water resources and water rights availability, defined drought standards, and impacts of climate change. The analyses performed in the most recent WRP conclude that TMWA can utilize the aforementioned water resources to meet incremental water demands required by growth for the next twenty years and beyond. The focal point of the WRP is the population and water demand forecasts for the TMWA service territory.

To complement this water resource planning effort, TMWA prepares and frequently updates a comprehensive [Water Facility Plan](#) (WFP). The TMWA Board approved the most recent iteration of the WFP in October 2023 for the years 2020-2040. The WFP was previously updated in October 2019 and covered years 2015-2035. The original WFP was adopted by the TMWA Board in December 2004 and updated in 2010. The WFP evaluates the infrastructure required to supply, treat, and deliver water to customers over the life of the plan and determines infrastructure requirements needed in the Capital Improvement Plan to serve growth based upon population and water demand forecasts in the WRP.

Since inception, TMWA has made and will continue to make strategic water rights acquisitions to ensure sufficient inventory of water rights are available to issue will-serve commitments for the foreseeable future. Any given year, as much as 80% or more of the water supply to TMWA's service area is supplied from surface water from the Truckee River. As such, TMWA played a critical role in negotiating and implementing the Truckee River Operating Agreement (TROA). TMWA is a primary signatory to the TROA along with the Pyramid Lake Paiute Tribe (PLPT), the States of Nevada and California, and U.S. Department of the Interior. TROA provides TMWA customers with benefits, prescribing operation of the Truckee River system that provides

additional drought supplies for existing and new customers. These lengthy and complex negotiations, which include interstate allocations of Truckee River water rights, were concluded when TROA was signed by the aforementioned parties on September 6, 2008 at a signing ceremony in Reno. TMWA made available to the PLPT certain water rights that met requirements to put TROA into effect in October 2015. In November 2015, remaining related lawsuits were dismissed, and TROA became effective December 1, 2015 providing significant additional drought resources for TMWA's service area and completing a multi-decade effort.

TMWA owns and operates 27,000 acre-feet of Privately Owned Stored Water reservoir storage comprised of 9,500 and 17,500 acre-feet in Donner Lake and Independence Lake, respectively (both dams are owned and operated by TMWA). In addition to the owned storage, as a result of TROA, TMWA can access additional storage capacity in certain federally-owned reservoirs, including Lake Tahoe. As of June 30, 2025, TMWA had 40,790 acre feet stored across the reservoirs.

The region experienced its third normal to above average winter in a row. The water supply outlook for the region is positive with Lake Tahoe filling to within 0.6 feet of its legal maximum elevation and all other reservoirs on the Truckee River system 75%-100% full. As of June 30, 2025, total upstream reservoir storage was at 85% of capacity. Truckee River reservoirs will have carry-over storage heading into the 2025/2026 winter, and TMWA will carry over more than 32,000 acre feet of water in drought reserves. Current reservoir storage ensures that the region can expect normal Truckee River flows for at least the next two years, regardless of the amount of precipitation in the 2025/2026 winter. TMWA will continue to utilize the provisions of TROA to maximize upstream storage opportunities and make the most efficient use of water resources for the region.

Drought

Although the region is not in a drought currently, droughts will inevitably occur again. However, TMWA's integrated approach to water resource management has positioned it well to withstand even the most severe droughts. TMWA has a robust and resilient water supply to meet customer demands, regardless of climate and weather patterns. These sources of supply include surface water rights directly from the Truckee River, an extensive network of upstream reservoirs, expanded drought storage under TROA, groundwater supplies from nearly 90 production wells, banked groundwater from years of aquifer storage and recovery efforts, and the inter-basin transfer of water from the Fish Springs Ranch project.

Advanced Purified Water Program

TMWA is confident in its ability to meet the community's potable water needs for decades to come. Regardless, staff and leadership are dedicated to preparing for potential needs that are beyond the horizon. In this spirit, TMWA is participating in a multi-organizational effort to study the feasibility of producing Category A+ Advanced Purified Water (APW). This research collaboration is known as OneWater Nevada and includes TMWA; City of Reno; City of Sparks; Washoe County; the University of Nevada, Reno; Truckee Meadows Water Reclamation Facility; the Western Regional Water Commission, and the Northern Nevada Water Planning Commission. OneWater Nevada has performed years of feasibility studies using treated effluent from regional water reclamation facilities and applying a combination of advanced water treatment steps with natural groundwater purification processes to allow for aquifer storage and

recovery of the APW. The treatment approach is regulated to rigorous state and federal drinking water standards and may potentially create a future supplemental water supply for potable or other high-quality uses.

TMWA has contributed to the operation and funding of OneWater Nevada since the effort began in 2016. This participation has included the construction and operation of a small-scale pilot treatment facility at the Reno Stead Water Reclamation Facility (RSWRF), a hydrogeological study at American Flat, management of groundwater recharge and recovery facilities, and overall technical and operational support. Through an Interlocal Agreement (ILA) with City of Reno, a Basis of Design Report for the RSWRF American Flat Advanced Purified Water (APW) Aquifer Storage and Recovery Project was completed in fiscal year 2021. Leveraging the information from this Report, TMWA and City of Reno have executed an ILA for a cost sharing agreement for construction of a two million gallon per day (MGD) APW treatment facility. This facility will take several years to build with construction activities expected to commence in Summer 2026, subject to final TMWA Board and Reno City Council approval.

WATER QUALITY

TMWA's highest priority is the protection of public health through modern water treatment techniques and water quality monitoring efforts. TMWA's primary source of water is the Truckee River, which sources at Lake Tahoe and other tributaries. The Truckee River travels into Nevada through the Reno-Sparks Metropolitan area and terminates at Pyramid Lake, a distance of approximately 120 miles. The river's natural water quality is excellent; however, additional steps are taken to purify the water to meet safe drinking water standards that were set forth by the United States Department of Environmental Protection in the early 1990s. TMWA owns and operates the 90.0 MGD Chalk Bluff Water Treatment Plant, the 34.5 MGD Glendale Water Treatment Plant, the 4.0 MGD Mount Rose Water Treatment Plant, and two other smaller, groundwater treatment plants. The Mount Rose Water Treatment Plant treats surface water from Whites Creek, a tributary of the Truckee River. Attesting to TMWA's commitment to the protection of public health, TMWA's Chalk Bluff Water Treatment Plant received the Presidents Award from the Partnership for Safe Water in 2015. This recognition exemplifies TMWA staff's experience, passion, and commitment to producing and delivering outstanding water quality to customers. TMWA has since qualified for this award on an annual basis.

TMWA spends approximately \$2.4 million annually on its State-certified drinking water laboratory which monitors water quality by sampling, analyzing, and reporting required regulated compliance data for its facilities within all six of its drinking water systems. The majority of the TMWA's data is analyzed by TMWA staff eliminating outside laboratory rates. TMWA ensures compliance with all current drinking water standards promulgated by the United States Environmental Protection Agency and administered by the Nevada Division of Environmental Protection, Bureau of Safe Drinking Water, and Northern Nevada Public Health in Washoe County.

WATER CONSERVATION

Efficient use of water within the Truckee Meadows extends this vital resource through periods of drought in this high desert climate. Therefore, water conservation has been, and will continually

be, a high-priority at TMWA. Not only does conservation promote water-efficient behavior, such efforts also reduce peak-day demand and help defer future investments in costly improvements to infrastructure. The purpose of water conservation at TMWA is to promote smart use of water through several programs. During a drought, TMWA enhances its conservation efforts to ensure drought storage is sufficient over the drought period.

Water-Efficiency Codes

TMWA's Rule 2 provides water-efficiency codes to which customers must adhere. First, customers must not use water excessively (i.e., no waste). Second, TMWA requires that its customers adhere to a three-day-a-week irrigation schedule. This watering restriction helps prevent overwatering as well as reduces peak-day demand. Next, TMWA also requires no irrigation on Mondays to allow its system to recharge. Finally, TMWA generally requires no irrigation between noon and 6 p.m. from Memorial Day to Labor Day. These water-efficiency codes have been successful in managing customer demands over time.

Water Resource Sustainability Program

TMWA's Water Resource Sustainability Program was created in fiscal year 2019. Through a charge of \$1,600 for every acre-foot of new surface water demand, developers and others provide funding for projects that improve TMWA's drought resiliency and water resource sustainability. Such projects include those for expanded conjunctive use, aquifer storage and recovery, demonstration and validation of exceptional quality reclaimed water uses, and future water resource identification and acquisition efforts.

Water Pricing Structure

TMWA has an inverted, tiered-rate billing structure in which customers are charged increasing rates based on the amount of water they use. This billing structure provides a "price signal" to customers who cross into a higher tier, thereby encouraging efficient use of water.

Water Usage Review Program

The Water Usage Review Program assists TMWA customers with issues regarding their water meter or their water delivery system. When a water usage review is requested, TMWA staff goes onsite to check meter accuracy as well as detect for leaks in the customer's system. If a leak is detected, staff will work with the customer to attempt to identify the leak source. Staff will also review the usage history of the service to determine water usage behavior. Once completed, staff will notify the customer of any leaks that were detected, make recommendations on how to reduce water consumption, and teach customers how to check for leaks in the future.

Water Watcher Program

During irrigation months (April to October), TMWA ramps up its conservation efforts by hiring additional full-time seasonal conservation consultants. These consultants are trained to monitor TMWA's service territory and ensure its water-efficiency codes are being adhered to. They also respond to water waste reports by the public. They provide customers with information about

TMWA's water-efficiency codes and identify any leaks or sources of water waste in outdoor irrigation. This program not only promotes efficient use of water but also facilitates lower monthly bills.

Landscape Retrofit Program

The Landscape Retrofit Program promotes water-efficiency measures on municipal landscapes. The program includes financial support of landscape augmentation projects by institutional irrigators. Projects supported under this program promote drought-tolerant landscapes and educational programs focused on smart landscaping practices.

Water Conservation Education Program

TMWA has a strong educational program designed to teach customers about the benefits of conservation and techniques that can help them use water more responsibly. Educational initiatives include a free workshop series, direct communication (bill inserts, emails, in-person, etc.), public presentations and events, as well as, a multi-media campaign. TMWA also partners with other local organizations to provide grade school students in the Truckee Meadows with information regarding our water sources, water quality, and watershed protection.

FINANCIAL INFORMATION

Internal Controls

TMWA employs various internal controls for the safeguarding of assets against losses from unauthorized use or disposition. TMWA's management is responsible for establishing and maintaining a system of internal controls designed to meet these objectives. Internal controls are also used to ensure that accounting data are compiled to allow for the preparation of financial statements in accordance with GAAP. The internal control structure is designed to provide reasonable assurance that these objectives are met. When establishing or reviewing internal controls, management weighs the cost to implement such controls over the benefits derived from implementing such controls. TMWA's management is constantly looking for opportunities to improve or redesign internal controls. A key component of TMWA's internal controls is its budgetary controls.

Budgetary Controls

TMWA is legally required to prepare, present to the TMWA Board, and adopt an annual budget in conformance with Chapter 354 of the Nevada Revised Statutes. These statutes comprise the Local Government Budget and Finance Act, which stipulates that the Board be presented with a tentative budget by April 15 of each year, with formal adoption of the budget after a public hearing in May of each year. The adopted budget is then filed with the Nevada Department of Taxation.

TMWA is also required to prepare a Capital Improvement Plan for review and formal acceptance by the TMWA Board. This plan is a comprehensive compilation of all capital projects and capital outlays expected during the ensuing five fiscal years. TMWA's Board is kept informed of

TMWA's financial performance throughout the fiscal year at scheduled Board meetings. The General Manager, as the chief administrative officer, is authorized to approve all expenses that are within the approved budget. This authority is conferred upon the General Manager by virtue of the TMWA Cooperative Agreement between the City of Reno, City of Sparks, and Washoe County. This arrangement allows for the efficient operation of TMWA. TMWA routinely prepares five-year financial forecasts in conjunction with the Capital Improvement Plan.

BUDGET ANALYSIS AND VARIANCES

Actual total operating revenues of \$132.3 million were \$2.0 million or 1.6% over the final budget for fiscal year ended June 30, 2025. Charges for water sales totaled \$124.0 million and were 0.2% higher than budget. TMWA's water sales can fluctuate from budget based on weather conditions, especially during the spring and fall. Hydroelectric sales totaled \$4.2 million and were 41.2% higher than budget. Hydroelectric sales exceeded budget as a result of strong river flows and less maintenance downtime as TMWA's staff determined it was advantageous to defer planned outages in preference of generation.

Total operating expenses of \$129.5 million were approximately \$3.1 million or 2.3% under the final budget. Operating expenses before depreciation were \$4.2 million or 4.3% under budget. Salaries and wages were higher by \$0.2 million or 0.6%, and employee benefits were \$0.5 million or 3.4% over budget. Salaries, wages, and benefits were primarily higher because more staff time was charged outside of capital projects than expected. Services and supplies expenses were \$4.9 million or 10.7% under budget. This was mostly due to lower electrical power costs and less supply consumption during the year.

Total net nonoperating revenues and expenses were \$4.2 million favorable to budget. This variance was primarily due to a net increase in the fair value of investments.

Capital contributions of \$53.0 million were \$7.0 million over budget. The primary driver was the recognition of a \$9.0 million credit to developer will-serve revenue resulting from a water resource exchange agreement for an effluent pipeline to TRI General Improvement District (TRIGID). TMWA received the cash in 2021 but deferred recognizing revenue until 2025 when effluent delivery via the pipeline commenced. Also contributing to the increase is slightly higher connection fee revenue as new business projects remained steady.

Total capital spending was approximately \$72.1 million for fiscal year 2025, which was approximately \$39.1 million less than the \$111.2 million planned in the final capital budget. The underspend is typical as TMWA usually spends between 60%-70% of the total CIP.

As reflected in the Statement of Cash Flows, TMWA funded the operating budget, debt service requirements and capital spending from operating revenues, capital contributions and investment income. As of June 30, 2025, TMWA has approximately \$94.4 million of unrestricted cash and investments to fund future operations and capital projects.

TMWA complied with bond covenants during fiscal year 2025 with respect to funding cash reserves. TMWA's renewal and replacement reserve is fully funded at \$10.0 million. The operations and maintenance reserve fund, which TMWA is required to maintain at a balance equal to one-sixth of TMWA's revised final operating budget, contained \$16.2 million as of June

30, 2025. As of June 30, 2025, TMWA also retained a \$11.5 million water rate stabilization reserve of which \$0.5 million is restricted and \$11.0 million is included as a reservation of unrestricted net position.

ACKNOWLEDGMENTS

The timely preparation of this report could not be done without the assistance of TMWA finance personnel, the management team, and employees of TMWA. We would like to thank the Board, TMWA customers, and the development community for their commitment to the long-term operational and financial stewardship of TMWA.

Independent Auditor's Report

To the Board of Directors
Truckee Meadows Water Authority
Reno, Nevada

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the business-type activities and the fiduciary activities of the Truckee Meadows Water Authority ("TMWA") as of and for the years ended June 30, 2025 and 2024, and the related notes to the financial statements, which collectively comprise TMWA's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities and the fiduciary activities of the Truckee Meadows Water Authority, as of June 30, 2025 and 2024, and the respective changes in financial position, and, where applicable, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of TMWA and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Adoption of New Accounting Standard

As discussed in Note 15 to the financial statements, TMWA has adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 101, *Compensated Absences*, for the year ended June 30, 2025. Accordingly, a restatement has been made to the business-type activities for the year ended June 30, 2024. As a result of implementing the standard, there was no effect on beginning net position as of July 1, 2023. Our opinions are not modified with respect to this matter.

Change in Estimate

As discussed in Note 16 to the financial statements, TMWA updated its measurement methodology over the calculation of the outstanding portion of bond proceeds that were not used for capital purposes in the net investment in capital assets net position calculation during the year ended June 30, 2025. Our opinions are not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about TMWA's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of TMWA's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about TMWA's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedules of changes in net OPEB liability and related ratios, the schedules of OPEB contributions, the schedules of TMWA's share of net pension liability, and the schedules of TMWA's pension contributions be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with GAAS, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audits were conducted for the purpose of forming opinions on the financial statements that collectively comprise TMWA's basic financial statements. The schedule of revenues, expenses, and changes in net position – budget and actual, the combining statement of fiduciary net position, and the combining statement of changes in fiduciary net position are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with GAAS. In our opinion, the schedule of revenues, expenses, and changes in net position – budget and actual, the combining statement of fiduciary net position and the combining statement of changes in fiduciary net position are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory section and statistical section but does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated November 17, 2025, on our consideration of TMWA's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of TMWA's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering TMWA's internal control over financial reporting and compliance.

A handwritten signature in cursive script that reads "Eide Bailly LLP".

MANAGEMENT'S DISCUSSION AND ANALYSIS

This section of TMWA's Annual Comprehensive Financial Report presents management's discussion and analysis (MD&A) of TMWA's financial performance during the fiscal years ended June 30, 2025, June 30, 2024, and June 30, 2023. This section should be read in conjunction with the transmittal letter at the front of this report and TMWA's financial statements following this section.

FINANCIAL HIGHLIGHTS

TMWA's Net Position

(in millions)

TMWA adopted GASB Statement No. 101, *Compensated Absences*, in the fiscal year ended June 30, 2025. The implementation of this standard requires that liabilities for compensated absences be recognized for leave that has not been used and for leave that has been used but not yet paid in cash or settled through noncash means. In accordance with GASB Statement No. 100, *Accounting Changes and Error Corrections*, the adoption of this standard is reported as a change in accounting principle. As a result, previously reported amounts for the fiscal year ended June 30, 2024 have been restated in all applicable tables throughout the MD&A. However, TMWA did not restate amounts for the fiscal year ended June 30, 2023 for GASB Statement No. 101, so

balances reported in the MD&A for that year are not comparable. See Note 15 to the financial statements for additional information.

Financial Position

Fiscal Year 2025 Summary

In the fiscal year ended June 30, 2025, total net position increased by approximately \$54.9 million, the result of operating income and capital contributions offset by nonoperating expenses.

Unrestricted current assets increased by \$3.4 million from June 30, 2024. Unrestricted cash and investments increased \$4.1 million with cash from operating activities of \$40.1 million and unrestricted nonoperating contributions of \$22.6 million, offset by cash used for debt service of \$31.7 million and acquisition and construction of capital assets of \$72.1 million. See the Statement of Cash Flows for additional information.

Restricted current assets decreased \$33.1 million from June 30, 2024, primarily due to the use of \$31.7 million of restricted proceeds from the Series 2024 Water Revenue Bonds for capital asset acquisition.

Long-term restricted and other assets increased \$2.7 million from June 30, 2024. Restricted funds for the Operations & Maintenance Reserve increased \$1.2 million due to an increase in the budget for operating expenses from the prior year. The net other postemployment benefits (OPEB) asset increased by \$1.4 million as result of the actuarial analysis and a higher return on investments held within the two OPEB trusts. See Note 12 to the financial statements for additional information on TMWA's OPEB plans.

Most of TMWA's net position is in capital assets. Capital assets, net of accumulated depreciation, increased by \$53.5 million in fiscal year 2025 as increases in capital assets from capital expenditures and contributions were greater than depreciation expense and disposals. Assets built by developers and contributed to TMWA were \$19.6 million. These assets are built to TMWA's standards and specifications. Depreciation expense was \$36.7 million.

Total current liabilities decreased \$11.1 million from June 30, 2024. This was primarily due to a decrease of \$8.3 million in construction contract and retention payables, which mostly related to the reduction of a deposit from a water resource exchange agreement for an effluent pipeline to TRIGID.

Long term debt decreased \$20.7 million, primarily due to principal payments on debt of \$18.0 million and amortization of bond premiums of \$4.4 million. During the year, TMWA fully repaid its 2005 and 2014 DWSRF bonds, as both reached their respective maturity dates in January 2025. See Note 7 to the financial statements for additional information on TMWA's outstanding debt.

Net pension liability increased by \$0.5 million as a result of an actuarial analysis performed for the Public Employees' Retirement System of the State of Nevada (PERS). See Note 11 to the financial statements for additional information on pensions.

Fiscal Year 2024 Summary - Restated

In the fiscal year ended June 30, 2024, total net position increased by approximately \$44.8 million, the result of operating income and capital contributions offset by nonoperating expenses.

Unrestricted current assets decreased by \$52.9 million from June 30, 2023. Unrestricted cash and investments decreased \$62.0 million with cash from operating activities of \$35.7 million and unrestricted nonoperating contributions of \$29.3 million, offset by cash used for debt service of \$30.6 million and acquisition and construction of capital assets of \$71.9 million. See the Statement of Cash Flows for additional information.

Restricted current assets increased \$40.9 million from June 30, 2023, mainly due to the addition of \$42.6 million of restricted proceeds from the Series 2024 Water Revenue Bonds. This increase was slightly offset by a \$1.7 million reduction in restricted funds of the Water Resource Sustainability Program.

Long-term restricted and other assets increased \$3.1 million from June 30, 2023. Restricted funds for the Operations & Maintenance Reserve increased \$1.4 million due to an increase in the budget for operating expenses from the prior year. Net other postemployment benefits (OPEB) asset increased by \$1.6 million as result of the actuarial analysis and a higher return on investments held within the two OPEB trusts. See Note 12 to the financial statements for additional information on TMWA's OPEB plans.

Most of TMWA's net position is in capital assets. Capital assets, net of accumulated depreciation, increased by \$49.0 million in fiscal year 2024 as increases in capital assets from capital expenditures and contributions were greater than depreciation expense and disposals. Assets built by developers and contributed to TMWA were \$10.0 million. These assets are built to TMWA's standards and specifications. Depreciation expense was \$36.5 million.

Total current liabilities increased \$10.3 million from June 30, 2023. This was primarily due to an increase of \$7.2 million in construction contract and retention payables, which are affected by the size and timing of active projects. This was also due to an increase of \$0.9 million in the current portion of compensated absences after the June 30, 2024 balance was restated following the adoption of GASB Statement No. 101, *Compensated Absences*.

Long term debt decreased \$24.1 million, due to principal payments on debt of \$87.0 million and amortization of bond premiums of \$11.7 million. During the year, TMWA paid off \$11.5 million and \$58.3 million of outstanding senior lien 2015 Series and 2016 Series bonds, respectively. Also during the year, TMWA issued \$61.5 million of new senior lien bonds, the Series 2024 Water Revenue Bonds. See Note 7 to the financial statements for additional information on TMWA's outstanding debt.

Net pension liability increased by \$3.0 million as a result of an actuarial analysis performed for the Public Employees' Retirement System of the State of Nevada (PERS). See Note 11 to the financial statements for additional information on pensions.

Total Revenues for the Year Ended June 30, 2023

Results of Operations-Revenues

Fiscal Year 2025 Summary

Total operating revenues in fiscal year 2025 increased \$9.9 million from fiscal year 2024. Water sales were \$124.0 million, \$10.0 million or 8.8% higher than in fiscal year 2024. Water sales were higher year over year from increased consumption primarily due to warmer, drier weather and lower precipitation than in the prior year. Hydroelectric sales remained steady at \$4.2 million in fiscal year 2025, consistent with fiscal year 2024. This stability was primarily due to strong river flows and less maintenance downtime throughout the fiscal year 2025. Other operating sales were \$0.1 million or 2.4% lower than the prior fiscal year due to a slight decrease in construction water, customer late fees, and miscellaneous income.

Fiscal year 2025 investment earnings were \$6.0 million, an increase of \$4.2 million from fiscal year 2024 due to higher invested rates during the year. Other nonoperating revenues decreased \$4.0 million, due to a smaller net increase in the fair value of investments compared to the prior fiscal year.

Capital contributions in fiscal year 2025 increased \$3.0 million from fiscal year 2024. The increase was primarily driven by higher developer infrastructure and will-serve contributions, offset by a decrease in grant revenue. Developer infrastructure contributions were \$9.6 million higher than in fiscal year 2024 due to increased construction activity and the completion of more projects dedicated to TMWA. Developer will-serve contributions were \$5.7 million higher than in fiscal year 2024, primarily due to the recognition of \$9.0 million from a water resource exchange agreement related to an effluent pipeline to TRIGID. Although payment was received in fiscal year 2021, revenue recognition was deferred until fiscal year 2025, when effluent delivery via the pipeline commenced. Grant revenue was \$8.2 million lower than in fiscal year

2024, primarily due to the recognition of American Rescue Plan Act funding for the Advanced Meter Infrastructure project in the prior year.

Fiscal Year 2024 Summary

Total operating revenues in fiscal year 2024 increased \$9.3 million from fiscal year 2023. Water sales were \$114.0 million, \$6.9 million or 6.4% higher than in fiscal year 2023. Water sales were higher year over year from increased consumption primarily due to warmer, drier weather and lower precipitation in the spring of 2024. Hydroelectric sales were \$1.3 million or 44.8% higher than fiscal year 2023 as all three plants were online the entirety of fiscal year 2024, allowing for optimization of river flows. Other operating sales were \$1.1 million or 35.5% higher than the prior year due to increased revenues from construction water, engineering inspection fees, and water resource lease activity.

Fiscal year 2024 investment earnings were \$1.8 million, a decrease of \$1.8 million from fiscal year 2023 due to losses resulting from liquidation of investments required for the defeasance of portions of the outstanding Series 2015 and 2016 senior lien bonds. Proceeds from the senior lien Series 2024 Water Revenue Bonds were reinvested, at higher rates which will result in a recovery of the losses related to the liquidations. Other nonoperating revenues increased \$8.8 million due to a net increase in fair value of investments compared to a net loss in the prior year.

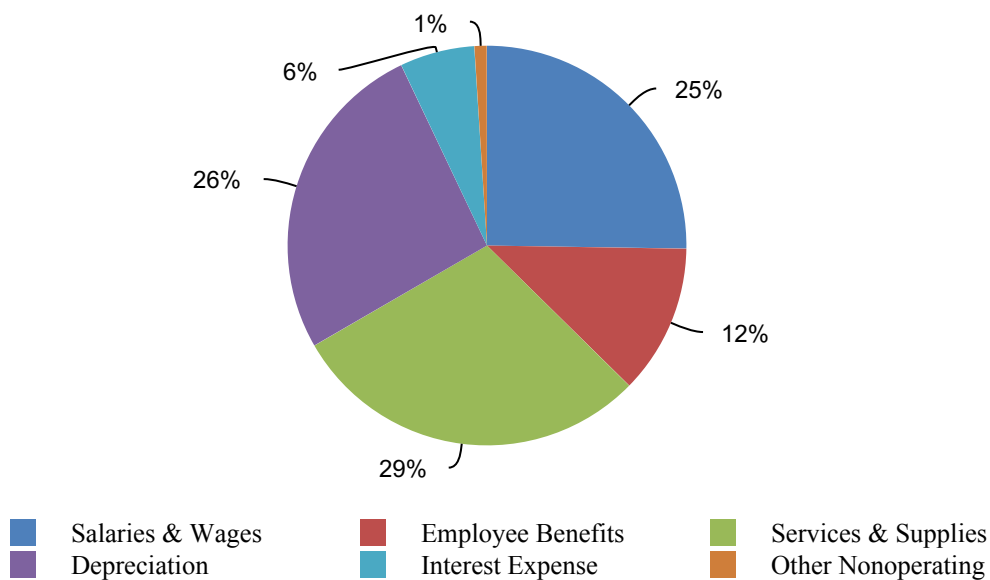

Capital contributions in fiscal year 2024 increased \$7.7 million from fiscal year 2023. The main driver of the increase was grant revenue, offset by a decrease in developer infrastructure contributions. Grants increased primarily due to a \$9.5 million award from the Nevada Department of Conservation and Natural Resources for the Advanced Meter Infrastructure project. The reduction in developer infrastructure contributions is due to a decrease of \$6.3 million in mains and \$1.3 million in water storage, based on larger projects placed into service in the prior year.

TMWA's Expenses (in millions)

The table above and the graphs that follow represent the makeup of total operating and non-operating expenses for the years ended June 30, 2025, 2024, and 2023.

Total Expenses for the Year Ended June 30, 2025

Total Expenses for the Year Ended June 30, 2024

Total Expenses for the Year Ended June 30, 2023***Results of Operations-Expenses*****Fiscal Year 2025 Summary**

Fiscal year 2025 operating expenses were \$129.4 million, \$7.1 million or 5.8% higher than in fiscal year 2024. Spending on salaries and wages was \$3.3 million or 10.3% higher, due to Labor Market Index wage increases, step increases, and additions in headcount during the fiscal year. Employee benefits remained relatively consistent increasing only \$0.1 million or 0.6% from prior fiscal year. Spending on services and supplies was \$3.5 million or 9.3% higher than in fiscal year 2024 due to general price inflation and a \$0.5 million net impairment loss related to TMWA's Old Washoe Well 4 facility. See Note 14 to the financial statements for additional information on the impairment loss.

Nonoperating expenses were \$4.1 million lower compared to fiscal year 2024. Interest expense was \$1.3 million lower due to the strategic defeasance of the Series 2015 and 2016 senior lien bonds in the prior fiscal year. Loss on disposal of assets, included in other nonoperating expenses, was \$2.8 million lower due to the write off of lower cost capital projects compared to those written off in the prior fiscal year.

Fiscal Year 2024 Summary - Restated

Fiscal year 2024 operating expenses were \$122.2 million, \$7.9 million or 6.5% higher than fiscal year 2023. Spending on salaries and wages was \$4.6 million or 14.4% higher, due to Labor Market Index wage increases, step increases, and additions in headcount during the fiscal year. \$1.3 million of the increase was also from restating fiscal year 2024 activity for the adoption of GASB Statement No. 101, *Compensated Absences*, in fiscal year 2025. Employee benefits were \$2.4 million or 17.3% higher than prior year due mainly to higher pension expense related to

Nevada PERS. Spending on services and supplies was \$0.7 million or 1.8% less than prior year primarily due to a decrease in chemical costs.

Nonoperating expenses were \$0.2 million lower compared to fiscal year 2023. Interest expense was \$1.3 million lower than the prior year. A loss on disposal of assets totaling \$3.5 million, included in other nonoperating expenses, resulted from writing off two capital projects during fiscal year 2024: Spring Creek 9 Well and the Human Resources/Payroll software implementation.

CAPITAL ASSETS

At June 30, 2025, TMWA's total capital assets were \$1,847.8 million before accumulated depreciation of \$661.4 million, for a net book value of \$1,186.4 million. Included in the total capital assets reported on the Statement of Net Position was \$107.9 million in construction work in progress.

At June 30, 2024, TMWA's total capital assets were \$1,758.4 million before accumulated depreciation of \$625.4 million, for a net book value of \$1,132.9 million. Included in the total capital assets reported on the Statement of Net Position was \$80.9 million in construction work in progress.

Detailed information about TMWA's capital assets can be found in Note 5 to TMWA's financial statements.

LONG-TERM DEBT

At June 30, 2025, TMWA had \$305.5 million in total reported debt outstanding. This amount reflects \$278.5 million in total outstanding principal indebtedness and \$27.0 million net bond premium. Of the \$278.5 million in total principal outstanding, \$16.3 million was due within one year and is classified as short term indebtedness.

Total outstanding principal indebtedness of \$278.5 million as of June 30, 2025 reflects a decrease of \$18.0 million or 6.1% from total outstanding principal of \$296.5 million as of June 30, 2024. Total outstanding principal indebtedness of \$296.5 million as of June 30, 2024 reflects a decrease of \$25.5 million or 7.9% from total outstanding principal of \$322.0 million as of June 30, 2023.

During fiscal year 2025, TMWA maintained credit ratings of AA+ outlook stable from Standard and Poor's, Aa2 outlook stable from Moody's, and AAA outlook stable from Fitch.

Detailed information about TMWA's indebtedness can be found in Note 7 to TMWA's financial statements.

CONTACTING TMWA'S FINANCIAL MANAGEMENT

This financial report was prepared for the benefit of the customers, bond investors, and the Board of Directors of the Truckee Meadows Water Authority. The Annual Comprehensive Financial

Report was prepared to provide interested parties with a general overview of the Truckee Meadows Water Authority's accountability for the financial resources it manages. For questions or additional information, please contact the Truckee Meadows Water Authority's Finance Department at P.O. Box 30013, Reno, Nevada 89520-3013.

Note 1 - Summary of Significant Accounting Policies

The financial statements of the Truckee Meadows Water Authority (TMWA) have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to governmental entities. A summary of the more significant accounting policies applied in the preparation of the accompanying basic financial statements follows.

Reporting Entity and Purpose

TMWA is a Joint Powers Authority (JPA) formed in November 2000 under the Joint Powers Legislation of the State of Nevada, pursuant to a Cooperative Agreement among the City of Reno, Nevada, the City of Sparks, Nevada, and Washoe County, Nevada. TMWA was formed to purchase water assets (the Water System), undertake the water utility operations, and develop, manage, and maintain supplies of water for the benefit of the Truckee Meadows communities. TMWA purchased the existing water system originally operated by Sierra Pacific Power Company (SPPCo), now known as NV Energy, Inc.

TMWA is governed by a seven-member Board of Directors (Board) appointed by:

- Reno City Council (3 seats)
- Sparks City Council (2 seats)
- Washoe County Commissioners (2 seats)

The cities and county representatives are not required to be elected officials. Modifications to the JPA were approved by the governing bodies in December 2009 which changed the at-large seat into a second seat for Washoe County. The amendments to the JPA were approved by the Attorney General's Office of the State of Nevada (State) effective February 3, 2010. The amendments were made in anticipation of the consolidation of TMWA and Washoe County's Community Services Department's water utility (WCWU) and the merger of another water utility named South Truckee Meadows General Improvement District (STMGID). The transfer of operations of WCWU and the merger of STMGID occurred on January 1, 2015 with TMWA as the continuing entity.

Basis of Accounting

TMWA's activities are accounted for as an enterprise fund (proprietary fund type). A fund is an accounting entity with a self-balancing set of accounts established to record the financial position and results of operations of the governmental entity. Activities of enterprise funds resemble activities of business enterprises; the purpose is to obtain and use economic resources to meet its operating objectives. TMWA's financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Under this method, revenues are recognized at the time they are earned, and expenses are recognized when the related liabilities are incurred.

A proprietary fund distinguishes operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from an exchange transaction such as providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Nonoperating revenues and nonoperating expenses result from nonexchange transactions or ancillary services.

TMWA applies all applicable Governmental Accounting Standards Board (GASB) pronouncements in accounting and reporting for proprietary activities.

In accordance with GASB Statement No. 84, TMWA reports its two Other Postemployment Benefit (OPEB) Plans as fiduciary funds. The OPEB Plans, which have a December 31 year-end, do not present the results of operations of TMWA or have a measurement focus. They are therefore not consolidated in TMWA's Statements of Net Position or Statements of Revenue, Expenses and Changes in Net Position.

Budgets and Budgetary Accounting

TMWA adheres to the Local Government Budget and Finance Act (Act) incorporated within the Statutes of the State of Nevada. The Act and TMWA policy include the following major procedures to establish budgetary data:

- On or before April 15, TMWA's General Manager submits to the Board a tentative budget for the fiscal year commencing the following July 1.
- Public hearings on the tentative budget are held in May.
- Prior to June 1, at the public hearing, the Board indicates changes, if any, to be made to the tentative budget and adopts a final budget by the favorable vote of a majority of the members of the Board. The final budget must then be forwarded to the Nevada Department of Taxation for final approval.
- Any revisions that alter total appropriations must be approved in advance by the Board. Formal budgetary integration is employed as a management control device during the year.
- Budgets are adopted on a basis consistent with GAAP. Appropriations lapse at year-end.
- In accordance with State statute, actual expenses may not exceed the sum of operating and nonoperating appropriations.

Cash and Investments

Cash balances are, to the extent practical, invested as permitted by law. Monies that are not required for immediate obligations are invested.

Investments authorized by State statutes and TMWA's bond resolutions include, but are not limited to, U.S. Treasury instruments, U.S. government agency securities, agency issued mortgage backed securities (FNMA, FHLMC, GNMA), corporate notes meeting certain rating standards, money market mutual funds meeting certain criteria, certificates of deposit, repurchase agreements, commercial paper meeting certain standards, bankers acceptances, long-term forward sale contracts and guaranteed investment contracts meeting certain rating standards, the State's Local Government Investment Pools (LGIP), medium-term obligations of municipal issuers in the State that meet certain rating standards, and asset backed securities that meet certain rating standards. Investments are reported at fair value, including the investment with LGIP which is the same as TMWA's proportionate share of the pool's fair value.

The OPEB Plans' net earnings from the State of Nevada Retirement Benefit Investment Fund (RBIF), an external investment pool, are based on the Plans' original investment plus a monthly allocation of investment income (loss), including realized and unrealized gains and losses, which is the same as the value of the pool shares.

Restricted cash and investments are monies that are restricted by legal or contractual requirements.

Cash Equivalents

Cash equivalents include short-term highly liquid investments (3 months or less at time of purchase) that are both readily convertible to known amounts of cash and so near their maturity that they present insignificant risk of changes of value.

Accounts Receivable

Accounts receivable is comprised of amounts due from TMWA's customers, net of an allowance for uncollectible accounts. Amounts due from TMWA's customers are comprised of amounts billed and an estimate of amounts earned but unbilled for water deliveries prior to fiscal year-end.

Restricted Assets

Certain proceeds of TMWA's water revenue bonds, as well as certain resources set aside for their repayment, are classified as restricted assets on the Statements of Net Position because their use is limited by applicable bond covenants as follows:

- Current bond debt service - used to segregate resources accumulated for debt service payments over the next twelve months.
- Future bond debt service - used to report resources set aside to make up potential future deficiencies in the current bond debt service.
- Operations and maintenance - used to report resources set aside to subsidize potential deficiencies from TMWA's operation that could adversely affect debt service payments.
- Renewal and replacement - used to report resources set aside to subsidize potential deficiencies in cash flow for replacement of water facilities.
- Water rate stabilization - used to report resources set aside to stabilize customer rates if significant water revenue fluctuations occur.

Unspent bond proceeds are classified as restricted assets and are only used for capital expenditures. Certain assets of TMWA are also classified as restricted assets on the Statements of Net Position because they were derived from contributions from developers to fund the water resource sustainability program adopted under Title II of Public Law 101-618. Other assets of TMWA are classified as restricted assets on the Statements of Net Position because they are set aside to provide other postemployment benefits per the §501(c)(9) Plan.

Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items. Prepaid items have been classified as current.

Capital Assets

All purchased property, plant, and equipment is stated at cost. TMWA capitalizes all assets with a cost of at least \$5,000 and a useful life greater than one year. The cost of maintenance and repairs that do not increase productive capacity or materially extend the life of an asset are not capitalized. Developer contributed capital assets are recorded at acquisition value in the year of contribution to TMWA.

Depreciation is computed using the straight-line method over the assets' estimated useful lives (in years) as follows:

	Years		Years
Distribution mains	10-75	Canals	25-70
Plants	5-80	Reservoirs	10-80
Services	10-60	Vehicles	7-10
Pump stations	10-80	Furniture and fixtures	7
Tanks	10-75	Computer hardware and software	7-30
Wells	7-60	Equipment	5-30
Pressure reducing stations	10-60	Administration buildings	5-50
Hydroelectric facilities	10-100		

Deferred Outflows/Inflows of Resources

In addition to assets, the Statements of Net Position report a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of net assets that applies to future periods and will not be recognized as an outflow of resources (expense) until then. TMWA's deferred outflows of resources include its deferred charge on refunding which results from the difference in the carrying value of refunded debt and its acquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. In addition, TMWA has deferred outflows of resources related to pensions and other postemployment benefits.

In addition to liabilities, the Statements of Net Position report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net assets that applies to future periods and will not be recognized as an inflow of resources (revenue) until that time. TMWA has deferred inflows of resources related to leases, bond refundings, pensions and other postemployment benefits.

Pensions

For purposes of measuring the net pension liability, deferred outflows and deferred inflows of resources, and pension expense, information about the fiduciary net position of the Public Employees' Retirement System of the State of Nevada (PERS) Base Plan (Base Plan) and additions to/deductions from Base Plan's fiduciary net position have been determined on the same basis as they are reported by the Base Plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Other Postemployment Benefits

For purposes of measuring TMWA's net OPEB liability (asset), deferred outflows and deferred inflows of resources, and OPEB expense, information about the fiduciary net position of TMWA's OPEB Plans and additions to/deductions from the fiduciary net position have been determined on the same basis as they are reported by TMWA's OPEB Plans. For this purpose, TMWA recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Compensated Absences

Employees are permitted to accumulate earned but unused vacation and sick pay benefits. The liability for compensated absences is recognized for leave that has not been used as well as for leave that has been used but not yet paid in cash or settled through noncash means, to the extent it is likely TMWA will ultimately pay those

benefits. The liability is included in current and noncurrent liabilities in the accompanying Statements of Net Position.

Long-Term Debt

Long-term debt is reported at face value, net of any premium or discounts, in the Statements of Net Position. Premiums and discounts are amortized using the effective interest method over the life of the related debt. Debt issuance costs are expensed in the period incurred.

Classification of Revenues

Operating revenues consist of water sales, hydroelectric sales, and miscellaneous fee income. Nonoperating revenues consist essentially of income derived from investments and reimbursement, if any, for nonoperating activities. Developer facility charges, will-serve contributions, and other contributions reflect payments primarily for water service. Developer infrastructure contributions are an estimation of the value of infrastructure built by developers and permanently dedicated to TMWA. Capital contributions also include grant revenue and contributions from others.

Net Position

Net Position is displayed in three classifications:

- Net investment in capital assets - This component represents TMWA's net position in its capital assets. It reflects the cost of capital assets, less accumulated depreciation and less the outstanding principal of related debt, excluding unspent proceeds.
- Restricted - This component reflects the carrying value of assets, less related liabilities, that are restricted by law or by other externally imposed restrictions, such as bond covenants. Assets restricted only by TMWA or Board imposed limitations are not included in the calculation.
- Unrestricted - This component represents the remaining net position balance that is available to support TMWA's operations and capital asset acquisition/construction.

When both restricted and unrestricted resources are available for use, it is TMWA's policy to use unrestricted resources first, then restricted resources as required.

Use of Estimates in Preparing Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

New Accounting Pronouncements

In June 2022, the GASB issued Statement No. 101, *Compensated Absences*, which is effective for fiscal years beginning after December 15, 2023. The primary objective of this Statement is to create a more consistent model of accounting for compensated absences that can be applied to all types of compensated absence arrangements. This Statement requires governments to apply specific criteria in determining the liability to record in their statements of net position. TMWA adopted this GASB in the fiscal year ended June 30, 2025. See Note 15 to the financial statements for additional information on the impact of adoption.

In December 2023, the GASB issued Statement No. 102, *Certain Risk Disclosures*, which is effective for fiscal years beginning after June 15, 2024. The primary objective of this Statement is to provide users of government financial statements with essential information about risks related to a government's vulnerabilities due to certain concentrations or constraints. The adoption of this GASB in the fiscal year ended June 30, 2025 did not have an impact on TMWA's financial statements.

In April 2024, the GASB issued Statement No. 103, *Financial Reporting Model Improvements*, which is effective for fiscal years beginning after June 15, 2025. The primary objective of this Statement is to improve key components of the financial reporting model to enhance its effectiveness in providing information that is essential for decision making and assessing a government's accountability. TMWA is currently evaluating the effect the adoption of this GASB will have on its financial statements in the fiscal year ended June 30, 2026.

In September 2024, the GASB issued Statement No. 104, *Disclosure of Certain Capital Assets*, which is effective for fiscal years beginning after June 15, 2025. The primary objective of this Statement is to provide users of government financial statements with essential information about certain types of capital assets in order to make informed decisions and assess accountability. Additionally, the disclosure requirements will improve consistency and comparability between governments. TMWA is currently evaluating the effect the adoption of this GASB will have on its financial statements in the fiscal year ended June 30, 2026.

Note 2 - Compliance with Nevada Revised Statutes and the Nevada Administrative Code

TMWA conformed to all significant statutory constraints on its financial administration during the year.

Note 3 - Accounts Receivable, Net

Accounts receivable, net consisted of the following:

	June 30, 2025	June 30, 2024
Billed amounts	\$ 7,724,212	\$ 8,200,934
Earned, but unbilled amounts	10,690,505	9,974,422
	18,414,717	18,175,356
Allowance for uncollectible accounts	(212,447)	(251,412)
Accounts receivable, net	<u>\$ 18,202,270</u>	<u>\$ 17,923,944</u>

Note 4 - Cash and Investments

In accordance with State statutes, TMWA's cash is deposited with insured banks. All money deposited by TMWA that is not within the limits of insurance must be secured by collateral. TMWA's deposits are collateralized by the Office of the State Treasurer/Nevada Collateral Pool.

The OPEB Plans' bank balances are covered by the Federal Deposit Insurance Corporation. Under the Plans' investment policies, the Plans' assets are limited to investments in the State of Nevada RBIF, and any investment authorized pursuant to Nevada Revised Statute (NRS) 355.170. The Plans invest their assets in the RBIF as allowed by the NRS 287.017 and the Nevada Administrative Code. The RBIF was established pursuant to NRS 355.220 and is administered by the Retirement Benefits Investment Board as an unrated external investment pool. The RBIF is not registered with the Securities and Exchange Commission as an investment company. Each participant acts as fiduciary for its particular share of the RBIF and is allocated earnings and expenses according to its proportional share in RBIF. Bank of New York, Mellon determines the fair value of the RBIF monthly.

Nevada Revised Statutes (NRS 355.170) set forth acceptable investments for Nevada governments. On September 20, 2017, the TMWA Board adopted an investment policy which extended TMWA's investment period from two years to five years. Nevada Revised Statutes and TMWA's investment policy set portfolio component thresholds to further limit its exposure to certain risks as set forth below.

Interest Rate Risk

Interest rate risk is the risk of possible reduction in the value of a security, especially a bond, resulting from a rise in interest rates. This risk can be mitigated by diversification of durations of fixed rate investments held in the investment portfolio. As a means of limiting TMWA's exposure to this risk, TMWA constantly monitors the bond futures market and ladders investments accordingly to maximize investment returns while balancing the investment maturities with spending requirements. TMWA follows State statute limits of investment in obligations of an agency of the United States or a corporation sponsored by the United States government to those maturing within five years from the date of purchase.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations and is a function of the credit quality ratings of investments. TMWA follows State statute for reducing exposure to investment credit risk by investing in U.S. Agencies securities; "AAA" rated money market mutual funds that invest in securities issued by the U.S. Government or agencies of the U.S. Government, and the State of Nevada Local Government Pooled Investment Fund (LGIP). TMWA has a debt reserve fund with LGIP, which is an unrated external investment pool with investment duration of 49.5 days at June 30, 2025, and 82 days at June 30, 2024.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. Securities held by TMWA or by TMWA's custodians are diversified to eliminate risk of loss from over-concentration of assets in a specific maturity, issuer, or class of securities.

Truckee Meadows Water Authority
Notes to Financial Statements
June 30, 2025 and 2024

At June 30, 2025 and 2024, the following investments by issuer exceeded 5% of TMWA's total investments:

	June 30, 2025	
U.S. Treasuries	\$ 47,729,193	33 %
Federated Hermes Treasury Obligations	21,041,541	14 %
Federal Home Loan Bank	19,407,408	13 %
Federal Farm Credit Bank	14,523,929	10 %
First American Funds, Inc. - Government Obligations Fund	9,671,948	7 %

	June 30, 2024	
U.S. Treasuries	\$ 56,012,428	33 %
Federal Home Loan Banks	27,966,654	17 %
Federated Hermes Treasury Obligations	25,118,263	15 %
Federal National Mortgage Association	11,183,219	7 %

Investments Measured at Fair Value

TMWA categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. TMWA does not have any investments that are measured using Level 3 inputs.

TMWA had the following recurring fair value measurements as of June 30, 2025:

	Fair Value	Fair Value Measurements Using	
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)
Investments by fair value level			
U.S. Treasuries	\$ 47,729,194	\$ 47,729,194	\$ —
U.S. Agencies	44,379,210	—	44,379,210
Certificates of Deposit	1,964,447	—	1,964,447
Corporate Notes	17,279,227	—	17,279,227
	111,352,078	\$ 47,729,194	\$ 63,622,884
LGIP	2,654,756		
Money Market Mutual Funds*	47,580,345		
	\$ 161,587,179		

Truckee Meadows Water Authority
Notes to Financial Statements
June 30, 2025 and 2024

TMWA had the following recurring fair value measurements as of June 30, 2024:

	Fair Value	Fair Value Measurements Using	
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)
Investments by fair value level			
U.S. Treasuries	\$ 56,012,428	\$ 56,012,428	\$ —
U.S. Agencies	52,038,982	—	52,038,982
Certificates of Deposit	8,399,111	—	8,399,111
Corporate Notes	14,919,202	—	14,919,202
Commercial Paper	2,294,031	—	2,294,031
	133,663,754	\$ 56,012,428	\$ 77,651,326
LGIP	2,530,900		
Money Market Mutual Funds*	40,909,525		
	<u>\$ 177,104,179</u>		

*Money market mutual funds are not held primarily for the purpose of income or profit and have remaining maturities at time of purchase of one year or less. Therefore, the money market mutual funds are recorded at amortized cost.

The following is a description of the valuation methodologies used by TMWA for its Level 2 assets:

U.S. Agencies - Valued using matrix pricing and market corroborated pricing models.

Certificates of Deposit - Valued using interactive date pricing and reference data.

Corporate Notes - Valued using institutional bond quotes based on various market and industry inputs.

Commercial Paper - Valued at fair value based on the observable market prices of inputs for similar securities.

Note 5 - Capital Assets

Capital asset activity for the year ended June 30, 2025 follows:

	Beginning Balance	Increases	Decreases	Ending Balance
Capital assets, not being depreciated				
Construction in progress	\$ 80,894,411	\$ 61,126,547	\$ (34,168,120)	\$ 107,852,838

Note 6 - Leases

TMWA has an agreement to lease cell tower space to CCTM1 LLC. The agreement term began in 1998 and allowed for five 5-year renewal terms after the initial term expired in 2003. TMWA foresees continuing the lease through 2028. Rent was \$6,000 for the first year and is increased based on CPI every five years with the renewal of the lease. TMWA used a borrowing rate of 3.17% to recognize this lease under GASB 87, *Leases*. During the fiscal year ended June 30, 2025, TMWA recognized \$9,691 in lease revenue and \$1,036 in interest revenue related to this agreement. At June 30, 2025, TMWA reported \$27,911 in lease receivables and \$25,034 in deferred inflows of resources, which will be recognized as revenue over the term of the lease, related to this agreement. During the year ended June 30, 2024, TMWA recognized \$9,691 in lease revenue and \$1,354 in interest revenue related to this agreement. At June 30, 2024, TMWA reported \$38,117 in lease receivables and \$34,725 in deferred inflows of resources, which will be recognized as revenue over the term of the lease, related to this agreement.

TMWA has an agreement to lease cell tower space to T-Mobile. The agreement term began in 1998 and allowed for five 5-year renewal terms after the initial term expired in 2003. TMWA foresees continuing the lease through 2028. Rent was \$4,000 for the first year and is increased based on CPI every five years with the renewal of the lease. The third amendment to the agreement also added \$3,000 per year to the base rent. TMWA used a borrowing rate of 3.17% to recognize this lease under GASB 87, *Leases*. During the fiscal year ended June 30, 2025, TMWA recognized \$9,123 in lease revenue and \$1,054 in interest revenue related to this agreement. At June 30, 2025, TMWA reported \$29,018 in lease receivables and \$27,370 in deferred inflows of resources, which will be recognized as revenue over the term of the lease, related to this agreement. During the year ended June 30, 2024, TMWA recognized \$9,123 in lease revenue and \$1,337 in interest revenue related to this agreement. At June 30, 2024, TMWA reported \$38,094 in lease receivables and \$36,493 in deferred inflows of resources, which will be recognized as revenue over the term of the lease, related to this agreement.

TMWA has an agreement to lease cell tower space to AT&T. The agreement term began in 2000 and allowed for three 5-year renewal terms after the initial term expired in 2005. A first amendment to the agreement extended the term for another five years to 2025 and allows for two 5-year renewal terms after the contract expires in 2025. TMWA foresees continuing the lease through 2035. Rent was \$13,800 for the first year and was originally increased based on CPI every five years with the renewal of the lease. The first amendment to the agreement added \$3,600 per year to the base rent and specified that the yearly rent will increase by 10% upon the commencement of each extension term. TMWA used a borrowing rate of 2.78% to recognize this lease under GASB 87, *Leases*. During the fiscal year ended June 30, 2025, TMWA recognized \$21,055 in lease revenue and \$7,013 in interest revenue related to this agreement. At June 30, 2025, TMWA reported \$241,197 in lease receivables and \$221,079 in deferred inflows of resources, which will be recognized as revenue over the term of the lease, related to this agreement. During the year ended June 30, 2024, TMWA recognized \$21,055 in lease revenue and \$7,526 in interest revenue related to this agreement. At June 30, 2024, TMWA reported \$259,670 in lease receivables and \$242,134 in deferred inflows of resources, which will be recognized as revenue over the term of the lease, related to this agreement.

TMWA has an agreement to lease a portion of its land's air space to Lamar Central Outdoor LLC. The agreement term began in 2024 and allows for two 5-year renewal terms after the initial term expires in 2030. Rent was \$4,620 for the first year and will increase 3.0% each year. TMWA used a borrowing rate of 2.37% to recognize this lease under GASB 87, *Leases*. During the year ended June 30, 2025, TMWA recognized \$5,483 in lease revenue and \$646 in interest revenue related to this agreement. At June 30, 2025, TMWA reported \$24,219 in lease receivables and \$25,603 in deferred inflows of resources, which will be recognized as revenue over the term of the lease, related to this agreement. During the year ended June 30, 2024, TMWA recognized \$4,105 in lease revenue and \$225 in interest revenue related to this agreement. At June 30, 2024, TMWA reported \$28,300 in lease receivables and \$31,086 in deferred inflows of resources, which will be recognized as revenue over the term of the lease, related to this agreement.

Note 7 - Long-Term Liabilities

Long-Term Debt

On June 8, 2005, TMWA entered into a loan contract with the State of Nevada Drinking Water State Revolving Fund (DWSRF) to fund TMWA's Arsenic Mitigation Project. TMWA made draws on this contract as construction proceeded, totaling \$4,669,565. The loan constitutes a special limited obligation of TMWA and the principal and interest on the loan will be payable solely from and secured by an irrevocable pledge of the net revenues derived from the operation of the Water System. This loan has a term of 20 years. This loan is subordinate to the 2015A Refunding Bonds, the 2016 Refunding Bonds, the 2017 Refunding Bonds, the 2018 Refunding Bonds, and any future senior lien bonds. The loan is considered paid in full as of June 30, 2025.

On August 15, 2006, TMWA began an inaugural Tax-Exempt Commercial Paper (TECP) program that originally authorized the issuance of up to \$160,000,000 in TECP notes. The first draw was on August 16, 2006 for \$30,000,000, and a second draw was on December 5, 2006 for \$13,000,000. The proceeds from the first two draws were used solely to purchase water rights for future sale of will-serve commitments to developers. A third draw was made on February 15, 2008 for \$25,000,000 to fund certain construction projects on an interim basis. A fourth draw was made on June 28, 2011 for \$11,400,000 for the purpose of redeeming the remaining outstanding Series 2001A Bonds which were callable on July 1, 2011. TMWA redeemed the \$11,400,000 issued in the fourth draw on December 10, 2012. TMWA issued a fifth draw for \$27,000,000 on December 17, 2014 to refund, on an advanced basis, \$26,100,000 in Washoe County water obligations to effect the water utility consolidation between Washoe County and TMWA with proceeds transferred to escrow on the date of issuance. The funds in escrow were distributed to the Washoe County bondholders as of July 1, 2015, the call date of the bonds. On various dates in fiscal year 2016, TMWA redeemed \$7,200,000. On September 7, 2016, TMWA redeemed \$4,400,000, and on September 5, 2017, TMWA redeemed \$9,200,000. On May 15, 2018 TMWA redeemed \$44,200,000 as part of the Series 2018 Water Revenue Refunding. This left an outstanding balance of \$30,000,000 as of June 30, 2018. On September 4, 2018, TMWA redeemed \$6,500,000, on October 2, 2019, TMWA redeemed \$5,000,000, and on March 3, 2020, TMWA redeemed \$2,500,000. This left an outstanding balance of \$16,000,000 as of June 30, 2020. In the first half of fiscal year 2021, TMWA redeemed \$3,000,000 of the \$16,000,000 outstanding. The remaining \$13,000,000 was redeemed in June 2021 as part of the 2021 Subordinate Water Refunding Bonds. TMWA has remaining authorization to issue \$53,600,000 as of June 30, 2025. This authorization expires July 1, 2036. Should TMWA wish to issue any of the remaining balance, new agreements and Board approval would be required.

On July 25, 2009, TMWA entered into a loan contract with the DWSRF, the 2009A DWSRF Loan, to partially fund TMWA's Mogul Bypass Siphon Project. The loan was provided through the American Recovery and Reinvestment Act (ARRA) stimulus funding provided by the federal government. TMWA made draws on this contract as construction proceeded, totaling \$2,401,120. The loan constitutes a special limited obligation of TMWA and the principal and interest on the loan will be payable solely from and secured by an irrevocable pledge of the net revenues derived from the operation of the Water System. This loan has a term of 20 years. This loan is subordinate to the senior lien 2015A Refunding Bonds, the 2016 Refunding Bonds, the 2017 Refunding Bonds, the 2018 Refunding Bonds, and any future senior lien bonds.

On February 11, 2010, TMWA entered into a loan contract with DWSRF, the 2010A DWSRF Loan, to fund TMWA's Glendale Water Treatment Plant Diversion Project. Total construction costs for the Glendale Diversion Project were less than expected. Consequently, TMWA requested and was granted that the remaining loan authorization be able to fund final improvements on the Highland Canal. During fiscal year 2013, the loan was finalized in the total amount of \$4,381,614. The loan constitutes a special limited obligation of TMWA and the principal and interest on the loan are payable solely from and secured by an irrevocable pledge of the net revenues derived from the operation of the Water System. This loan has a term of 20 years. This loan is subordinate to the

senior lien 2015A Refunding Bonds, the 2016 Refunding Bonds, the 2017 Refunding Bonds, the 2018 Refunding Bonds as well as any future senior lien bonds.

On December 31, 2014, TMWA entered into a loan contract with the DWSRF, to transfer the remaining loan balance of the Washoe County Water Utility 2005 DWSRF loan to TMWA. The transfer was in conjunction with the transfer of operations of the Washoe County Water Utility into TMWA on January 1, 2015. The loan contract was entered into by the Washoe County Water Utility to construct the Longley Lane Water Treatment Facility, a facility that was transferred to TMWA. The loan balance of \$9,109,437 was transferred to TMWA under the same terms that existed with Washoe County as the TMWA 2014 DWSRF loan. The original balance of the loan was \$14,162,268. The loan constitutes a special limited obligation of TMWA, and the principal and interest on the loan are payable solely from and secured by an irrevocable pledge of the net revenues, derived from the operation of the Water System. When it was transferred this loan had a remaining term of 10 years. This loan is subordinate to the senior lien 2015A Refunding Bonds, the 2016 Refunding Bonds, the 2017 Refunding Bonds, the 2018 Refunding Bonds as well as any future senior lien bonds. The loan is considered paid in full as of June 30, 2025.

On April 14, 2015, TMWA issued \$28,750,000 in Series 2015A Refunding Bonds which constitute special limited obligations of TMWA. These bonds were sold to refund on a current basis \$33,050,000 in maturities of the Series 2005A Bonds. The proceeds of the refunding bond issue were placed in an irrevocable trust for the purpose of generating financial resources to defease the callable portion of the Series 2005A Bonds. The Series 2005A refunded bonds are considered to be defeased and the liability has been removed from TMWA's Statement of Net Position. The net carrying amount of the old debt exceeded the reacquisition price by \$140,645. The unamortized balance is being amortized as a component of interest income over the remaining life of the old and new debt, which has the same remaining life. This current refunding was undertaken to reduce total debt service payments over approximately 21 years by \$6,563,813 and resulted in an economic gain of \$4,575,309. The funds held in the irrevocable trust were distributed to 2005A bondholders as of July 1, 2015, the call date of the 2005A Bonds. On December 20, 2023, TMWA defeased \$11,485,000 of the bonds, along with \$1,014,912 of the unamortized bond premium. TMWA used current resources for the defeasance and no new debt was issued. The remaining balance due is \$9,645,000 with an associated premium of \$852,314, which will be amortized over the life of the bonds.

On July 30, 2015, TMWA entered into a loan contract with the DWSRF, the 2015B DWSRF Loan, to fund TMWA's surface and groundwater supplies in the North Valleys particularly the Stead area, Lemmon Valley area, and North Virginia Corridor. Of the \$15,000,000 authorized, TMWA made draws on this contract as construction proceeded totaling \$8,971,562. The loan constitutes a special limited obligation of TMWA and the principal and interest on the loan are payable solely from and secured by an irrevocable pledge of the net revenues derived from the operation of the Water System. This loan has a term of 20 years. This loan is subordinate to the senior lien 2015A Refunding Bonds, the 2016 Refunding Bonds, the 2017 Refunding Bonds, the 2018 Refunding Bonds as well as any future senior lien bonds. This loan is also subordinate to the 2005 DWSRF Bonds, the 2009A DWSRF ARRA Bonds, the 2010A DWSRF Bonds, the 2014 DWSRF Bonds, and the 2015B DWSRF Bonds.

On April 12, 2016, TMWA issued \$124,790,000 in Series 2016 Water Revenue Refunding Bonds which constitute special limited obligations of TMWA. These bonds were sold to refund \$148,015,000 in maturities of the Series 2006 Bonds. The proceeds of the refunding bond issue were used to purchase U.S. Government securities that were placed in an irrevocable trust for the purpose of generating financial resources for the future debt service payments of the refunded Series 2006 Bonds. As a result, the refunded bonds were considered to be defeased and the liability has been removed from TMWA's Statement of Net Position. The reacquisition price exceeded the net carrying amount of the old debt by \$3,092,808. The unamortized balance is being amortized as a component of interest expense over the original life of the old debt, which has a shorter remaining life in comparison to the remaining life of the refunding bonds. This current refunding was undertaken to reduce total debt service payments over 22 years by \$4,332,501, and resulted in an economic gain of \$15,025,124. The funds in the irrevocable trust were distributed to 2006 bondholders as of July 1, 2016, the call date of the 2006 Bonds. On December 20, 2023, TMWA defeased \$58,345,000 of the bonds, along with \$6,419,187 of the unamortized

bond premium. TMWA used current resources for the defeasance and no new debt was issued. The remaining balance due is \$66,445,000 with an associated premium of \$7,310,359, which will be amortized over the life of the bonds.

On April 11, 2017, TMWA issued \$147,415,000 in Series 2017 Water Revenue Refunding Bonds which constitute special limited obligations of TMWA. These bonds were sold to refund \$214,290,000 in maturities of the Series 2007 Bonds. The proceeds of the refunding bond issue along with \$32,865,308 from TMWA's cash balances were used to purchase U.S. Government securities that were placed in an irrevocable trust for the purpose of generating financial resources for the future debt service payments of the refunded Series 2007 Bonds. As a result, the refunded bonds were considered to be defeased and the liability has been removed from TMWA's Statement of Net Position. The reacquisition price exceeded the net carrying amount of the old debt by \$289,903. The unamortized balance is being amortized as a component of interest income over the remaining life of the old and new debt, which has the same remaining life. This current refunding was undertaken to reduce total debt service payments over 14 years by \$15,301,534, and resulted in an economic gain of \$15,948,105. The funds in the irrevocable trust were distributed to 2007 bondholders as of July 1, 2017, the call date of the 2007 Bonds.

On May 15, 2018, TMWA issued \$38,835,000 in Series 2018 Water Revenue Refunding Bonds which constitute special limited obligations of TMWA. The proceeds of the bond issue of \$44,601,977 were used to refund or redeem \$44,200,000 in maturities of TECP. This transaction was executed to provide a fixed rate of interest expense over the life of the refunding, which was effected by replacing variable rate TECP debt with fixed rate bonds.

On June 3, 2021, TMWA issued \$13,000,000 in Series 2021 Subordinate Water Revenue Refunding Bonds which constitute special limited obligations of TMWA. The Bonds were sold pursuant to a Continuing Covenant Agreement as a Direct Purchase to Wells Fargo Municipal Capital Strategies, LLC. The proceeds of the bond issue of \$13,000,000 were used to refund or redeem \$13,000,000 in maturities of TECP. This transaction was executed to provide a fixed interest rate over the life of the refunding, which was effected by replacing variable rate TECP debt with fixed rate bonds. The provisions of the loan agreement require level, annual debt service for full repayment of the bonds through fiscal year 2028. This loan is subordinate to the senior lien 2015A Refunding Bonds, the 2016 Refunding Bonds, the 2017 Refunding Bonds and the 2018 Refunding Bonds.

On January 18, 2024, TMWA issued \$61,530,000 in Series 2024 Water Revenue Bonds which constitute special limited obligations of TMWA. The proceeds of the bonds will be used to cover capital expenditures over the next two years.

Truckee Meadows Water Authority
Notes to Financial Statements
June 30, 2025 and 2024

The following schedule summarizes the changes in long-term debt obligations as of June 30, 2025:

	Final Maturity Date	Authorized	Balance July 1, 2024	Additions	Deletions	Balance June 30, 2025	Due in 2025-2026

Compensated Absences

The following schedules summarize the changes in the compensated absences liability as of June 30, 2025 and 2024:

	Beginning Balance	Increases	Decreases	Ending Balance	Due Next Fiscal Year
June 30, 2025	\$ 5,068,736	\$ 4,864,115	\$ 3,918,451	\$ 6,014,400	\$ 1,688,939
June 30, 2024 - Restated	\$ 3,711,520	\$ 3,839,571	\$ 2,482,355	\$ 5,068,736	\$ 1,546,520

Note 8 - Net Position

Restricted Net Position

TMWA records the following restrictions of net position:

Restricted in accordance with bond covenants: TMWA's bond covenants require certain restrictions of TMWA's net position for operations and maintenance, debt service, renewal and replacement, and water rate stabilization.

Restricted for water resource sustainability: This restriction was created to segregate the portion of net position derived from contributions made by developers to fund certain projects that are intended to benefit TMWA's long-term water resources sustainability.

Restricted for net other postemployment benefits: This restriction was created to segregate the portion of net position related to TMWA's net other postemployment benefit asset in the §501(c)(9) Plan. See Note 12 to the financial statements for additional information.

Board Designation

On September 19, 2018, the Board adopted a resolution to designate 3% of total projected water sales for the most recent three year forecast as a rate stabilization fund. This amount was \$11,521,815 and \$11,097,932 as of June 30, 2025 and 2024, respectively. This designation is not reflected as restricted net position but is considered a designated portion of unrestricted net position.

Note 9 - Contingent Liabilities

Mt. Rose Fan Domestic Well Program

As part of the transfer of operations with the Washoe County water utility, TMWA agreed to continue Washoe County's Mt. Rose-Galena Fan Domestic Well Mitigation Program, which provides for the reimbursement of specific well deepening costs or water system connection charges, incurred by property owners within the program area, whom experienced or will experience an "unreasonable adverse effect" as a result of municipal groundwater pumping. TMWA's continuation of the program provides continuity for domestic well owners in the specific program and provides protection of shared groundwater resources in the program area. TMWA's budget includes projected costs for administering the domestic well mitigation plan.

Litigation

From time to time, TMWA is named as a party to various lawsuits, claims, or other legal and regulatory proceedings that arise in the ordinary course of TMWA's business. TMWA accrues reserves when a loss is probable, and the amount of such loss can be reasonably estimated. Management does not believe that the outcome of these proceedings, individually and collectively, will have a material effect on TMWA's financial position.

Note 10 - Risk Management

TMWA is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. TMWA is responsible for group health insurance premiums payable to the City of Reno for coverage in the City's self-funded health insurance program. All other significant risks are covered by commercial insurance purchased from independent third parties. There have been no settlements in excess of insurance coverage for the past three years.

Note 11 - Defined Benefit Pension Plan and Other Employee Benefits

Defined Benefit Pension Plan

Plan Description

TMWA contributes to the Public Employees' Retirement System of the State of Nevada (PERS). PERS administers a cost-sharing, multiple-employer, defined benefit public employees' retirement system. PERS was established by the Nevada Legislature in 1947, effective July 1, 1948. PERS is administered to provide a reasonable base income to qualified employees who have been employed by a public employer and whose earnings capacities have been removed or substantially impaired by age or disability.

Benefits Provided

Benefits, as required by the Nevada Revised Statutes (NRS or statute), are determined by the number of years of accredited service at time of retirement and the member's highest average compensation in any 36 consecutive months with special provisions for members entering PERS on or after January 1, 2010 and July 1, 2015. Benefit payments to which participants or their beneficiaries may be entitled under the plan include pension benefits, disability benefits, and survivor benefits.

Monthly benefit allowances for members are computed as 2.5% of average compensation for each accredited year of service prior to July 1, 2001. For service earned on and after July 1, 2001, this multiplier is 2.67% of average

compensation. For members entering PERS on or after January 1, 2010, there is a 2.5% multiplier. Members entering PERS on or after July 1, 2015 have a 2.25% multiplier. PERS offers several alternatives to the unmodified service retirement allowance which, in general, allow the retired employee to accept a reduced service retirement allowance payable monthly during his or her lifetime and various optional monthly payments to a named beneficiary after his or her death.

Post-retirement increases are provided by authority of NRS 286.575 - .579.

Vesting

Members entering PERS prior to January 1, 2010, are eligible for retirement at age 65 with five years of service, at age 60 with ten years of service, or at any age with thirty years of service. Members entering PERS on or after January 1, 2010, are eligible for retirement at age 65 with five years of service, at age 62 with ten years of service, or at any age with thirty years of service. Members entering PERS on or after July 1, 2015 are eligible for retirement at age 65 with five years of service, at age 62 with ten years of service, at age 55 with thirty years of service, or at any age with thirty-three and a third years of service.

The normal ceiling limitation on monthly benefits allowances is 75% of average compensation. However, a member who has an effective date of membership before July 1, 1985, is entitled to a benefit of up to 90% of average compensation. Members become fully vested as to benefits upon completion of five years of service.

Contributions

The authority for establishing and amending the obligation to make contributions and member contribution rates is set by statute. New hires, in agencies which did not elect the Employer-Pay Contribution (EPC) plan prior to July 1, 1983, have the option of selecting one of two contribution plans.

Under the Employee/Employer-Pay Plan, contributions are shared equally by employees and employer. Under the Employer-Pay Plan, employees pay for their portion of contributions through a salary reduction, and the employer pays 100% of employees' retirement contributions. At TMWA, employees are initially enrolled in the Employee/Employer-Pay Plan and then may choose to change their enrollment to the Employer-Pay Plan.

PERS' basic funding policy provides for periodic contributions at a level pattern of cost as a percentage of salary throughout an employee's working lifetime in order to accumulate sufficient assets to pay benefits when due.

PERS receives an actuarial valuation on an annual basis indicating the contribution rates required to fund PERS on an actuarial reserve basis. Contributions actually made are in accordance with the required rates established by the Nevada Legislature. These statutory rates are increased/decreased pursuant to NRS 286.421 and 286.450.

The actuarial funding method used is the Entry Age Normal Cost Method. It is intended to meet the funding objective and result in a relatively level long-term contributions requirement as a percentage of salary. The employer-pay contribution (EPC) rate was 33.50% for fiscal years June 30, 2025 and 2024. As of July 1, 2025, the EPC rate increased to 36.75%. TMWA's contributions were \$5,308,925 and \$4,837,476 for the years ended June 30, 2025 and 2024, respectively.

PERS Investment Policy

PERS' policies, which determine the investment portfolio target asset allocation, are established by the PERS Board. The asset allocation is reviewed annually and is designed to meet the future risk and return needs of PERS.

The following was the PERS Board adopted policy target asset allocation as of June 30, 2024:

	Target Allocation	Long-Term Geometric Expected Real Rate of Return
Domestic Equity	42%	5.50%
International Equity	18%	5.50%
Domestic Fixed Income	28%	2.25%
Private Markets	12%	7.15%

The following was the PERS Board adopted policy target asset allocation as of June 30, 2023:

	Target Allocation	Long-Term Geometric Expected Real Rate of Return
Domestic Equity	42%	5.50%
International Equity	18%	5.50%
Domestic Fixed Income	28%	0.75%
Private Markets	12%	6.65%

Net Pension Liability

At June 30, 2025, TMWA reported a liability for its proportionate share of the net pension liability of \$60,778,967. The net pension liability was measured as of June 30, 2024, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date.

At June 30, 2024, TMWA reported a liability for its proportionate share of the net pension liability of \$60,226,778. The net pension liability was measured as of June 30, 2023, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date.

TMWA's proportion of the net pension liability was based on TMWA's share of contributions in the PERS pension plan relative to the total contributions of all participating PERS employers and members. At June 30, 2024 and 2023, TMWA's proportion was 0.3364 and 0.3300 percent, respectively, representing an increase of 0.0064 percent and an increase of 0.0121 percent from its proportion measured at June 30, 2023 and 2022, respectively.

Pension Liability Discount Rate Sensitivity

The following presents the net pension liability of TMWA measured as of June 30, 2024 and 2023, calculated using the discount rate of 7.25%, and what TMWA's net pension liability would be if it were calculated using a discount rate that is one percentage-point lower or one percentage-point higher than the discount rates used in each year's valuation:

Truckee Meadows Water Authority
Notes to Financial Statements
June 30, 2025 and 2024

	1% Decrease in Discount Rate (6.25%)	Discount Rate (7.25%)	1% Increase in Discount Rate (8.25%)
Net Pension Liability, June 30, 2024	\$ 97,739,937	\$ 60,778,967	\$ 30,285,764
	1% Decrease in Discount Rate (6.25%)	Discount Rate (7.25%)	1% Increase in Discount Rate (8.25%)
Net Pension Liability, June 30, 2023	\$ 93,721,709	\$ 60,226,778	\$ 32,583,626

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in the PERS ACFR, available on the PERS website, www.nvpers.org.

Actuarial Assumptions

TMWA's June 30, 2025 net pension liability was measured as of June 30, 2024, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. TMWA's June 30, 2024 net pension liability was measured as of June 30, 2023, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liability was determined using the following actuarial assumptions, applied to all periods included in the measurement:

	June 30, 2024	June 30, 2023
Inflation Rate	2.50%	2.50%
Payroll Growth	3.50% including inflation	3.50% including inflation
Investment Rate of Return	7.25%	7.25%
Productivity Pay Increase	0.50%	0.50%
Projected Salary Increases	4.20% to 9.10%, depending on service. Rates include inflation and productivity increases.	4.20% to 9.10%, depending on service. Rates include inflation and productivity increases.
Consumer Price Index	2.50%	2.50%
Other Assumptions	Same as those used in the June 30, 2024 funding actuarial valuation	Same as those used in the June 30, 2023 funding actuarial valuation

For the year ended June 30, 2024, mortality rates for non-disabled regular members were based on the Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Table with rates increased by 30% for males and 15% for females, projected generationally with the two-dimensional mortality improvement scale MP-2020. Mortality rates for disabled regular members were based on the Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Table with rates increased by 20% for males and 15% for females, projected generationally with the two-dimensional mortality improvement scale MP-2020.

For the year ended June 30, 2023, mortality rates for non-disabled regular members were based on the Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Table with rates increased by 30% for males and 15% for females, projected generationally with the two-dimensional mortality improvement scale MP-2020. Mortality rates for disabled regular members were based on the Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Table with rates increased by 20% for males and 15% for females, projected generationally with the two-dimensional mortality improvement scale MP-2020.

Actuarial assumptions used in the June 30, 2024 and 2023 valuations were based on the results of the experience review issued September 10, 2021.

The projection of cash flows used to determine the discount rate of 7.25% assumed plan contributions will be made in amounts consistent with statutory provisions and recognizing the plan's current funding policy and cost-sharing mechanism between employers and members. For this purpose, all contributions that are intended to fund benefits for all plan members and their beneficiaries are included, except that projected contributions that are intended to fund the service costs for future plan members and their beneficiaries are not included.

Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability as of June 30, 2024 and June 30, 2023.

Pension Expense, Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the years ended June 30, 2025 and 2024, TMWA recognized pension expense of \$13,044,396 and \$13,565,438, respectively.

At June 30, 2025, TMWA reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 12,894,041	\$ —
Changes in assumptions or other inputs	3,921,840	—
Net difference between projected and actual earnings on pension plan investments	—	5,987,512
Changes in TMWA's proportion and differences between TMWA's contributions and TMWA's proportionate contributions	2,776,418	—
TMWA's contributions subsequent to the measurement date	5,308,925	—
	<u>\$ 24,901,224</u>	<u>\$ 5,987,512</u>

Deferred outflows of resources of \$5,308,925 resulted from TMWA's contributions subsequent to the measurement date and will be recognized as a reduction of the net pension liability in the year ended June 30, 2026.

At June 30, 2024, TMWA reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 7,850,193	\$ —
Changes in assumptions or other inputs	5,644,395	—
Net difference between projected and actual earnings on pension plan investments	—	563,724
Changes in TMWA's proportion and differences between TMWA's contributions and TMWA's proportionate contributions	3,211,421	20,988
TMWA's contributions subsequent to the measurement date	4,837,476	—
	<u>\$ 21,543,485</u>	<u>\$ 584,712</u>

Deferred outflows of resources of \$4,837,476 resulted from TMWA's contributions subsequent to the measurement date and were recognized as a reduction of the net pension liability in the year ended June 30, 2025.

The average of the expected remaining service lives of all employees that are provided with pensions through PERS (active and inactive employees) determined at July 1, 2023 (the beginning of the measurement period ended June 30, 2024) is 5.64 years.

Other estimated amounts reported by TMWA as deferred outflows of resources and deferred inflows of resources related to pensions at June 30, 2025 will be recognized in pension expense as follows:

Year Ending June 30,	
2026	\$ 2,583,224
2027	8,563,623
2028	1,152,945
2029	266,835
2030	1,038,160

Additional Information

The PERS ACFR includes additional information including information supporting the schedule of employer allocations and the schedule of pension amounts by employer. This report is available on the PERS website at www.nvpers.org under Quick Links – Publications.

Deferred Compensation Plans

All employees of TMWA are eligible to participate in a Section 457 Deferred Compensation Plan, monies of which are maintained in a trust, separate from the general assets of TMWA. In addition to the Section 457 Deferred Compensation Plan, all employees are eligible to participate in a Section 401(a) Money Purchase Retirement Plan, monies of which are maintained in a trust, separate from the general assets of TMWA. For the years ended June 30, 2025 and June 30, 2024, TMWA had matching contributions totaling \$2,112,011, and \$1,934,079, respectively.

Note 12 - Other Postemployment Benefit (OPEB) Plans

TMWA has two Other Postemployment Benefit (OPEB) Plans referred to as the §501(c)(9) and §115 plans. The §501(c)(9) plan was established for the benefit of transferred employees from Sierra Pacific Power Company and all subsequent new hires until the plan closed, effective December 13, 2018. The §115 Plan plan was formed to provide postemployment benefits for employees who transferred from Washoe County as a result of the water utility consolidation. Both plans reference the Internal Revenue Code sections under which the plans were formed. Both plans' investments are held by the Nevada Retirement Benefits Investment Board.

Census data as of June 30, 2025 for both plans is as follows:

	§501(c)(9) Plan	§115 Plan
Retirees currently receiving benefits	73	9
Retirees entitled to, but not yet receiving benefits	1	1
Active plan members	135	11
Total	209	21

Census data as of June 30, 2024 for both plans is as follows:

	§501(c)(9) Plan	§115 Plan
Retirees currently receiving benefits	70	9
Retirees entitled to, but not yet receiving benefits	1	1
Active plan members	143	12
Total	214	22

Plan Descriptions, Eligibility Information and Funding Policies

§501(c)(9) Plan

Plan Description. The §501(c)(9) plan known as the Truckee Meadows Water Authority Post-Retirement Medical Plan and Trust (Plan), is a single-employer defined benefit OPEB plan that was established to provide eligible TMWA employees with postemployment health benefits. The Plan was amended to provide post-retirement life insurance benefits in July 2011. Pursuant to Nevada State Administrative Regulations, adopted in September 2008, the Plan is governed by not less than three, but not more than five trustees. Four trustees were appointed by the TMWA Board: two from non-represented employees and two from represented employees. The Plan issues a financial report that includes the financial statements and required supplementary information. That report may be obtained by contacting TMWA in writing at P.O. Box 30013, Reno, NV 89520-3013.

Eligibility. Effective December 13, 2018, the Board adopted a resolution to close the Plan to employees hired after December 13, 2018. Existing employees and plan participants currently receiving benefits were not impacted by this resolution. There are three employee classifications eligible for benefits: a pre-January 1, 1998 collective bargaining unit group, a post-December 31, 1997 collective bargaining unit group, and a group for management, professional, administrative, and technical (MPAT) personnel hired prior to December 14, 2018. Eligibility requirements benefit levels, employee contributions, and employer contributions are amended through TMWA's collective bargaining agreements for its represented employees and by the TMWA Board with respect to MPAT employees.

Employees must have at least ten years of service to be eligible for benefits and must be at least 55 years of age. The pre-January 1, 1998 group of represented employees will receive a subsidy as a percentage of the total health premium, dependent upon years of service and age at retirement, with a maximum subsidy of 85% with 20 years

of credited service. Employees with 20 or more years of service electing the Medicare Risk Contract would pay nothing towards health premiums. For this group, dependents are also covered. The post-December 31, 1997 group of represented employees will receive a total subsidy of \$1,250 times years of service towards health care premiums. This amount does not grow with interest and once exhausted a retiree may convert to COBRA, but only for the 18 month continuation period.

For MPAT employees, the annual subsidy is \$235 times years of service, up to 30 years, prorated for each month of retirement while under the age of 65. On or after the age of 65, the subsidy is \$105 times years of service prorated for each month of retirement while age 65 and older. If an MPAT employee retires and draws benefits before age 62, the subsidy is reduced by 5% for each full year retirement precedes age 62.

There is no extra subsidy for spousal or dependent coverage except continuation benefits provided for under COBRA. Retirees are responsible for the remaining portion of premiums.

Funding Policy. Beginning in fiscal year 2011, the plan has funded retiree benefits through its Voluntary Employee Benefit Association (VEBA) that TMWA established as an irrevocable trust for funding of the postemployment health benefits. TMWA funds the plan based on the actuarially determined contribution (ADC) each year.

§115 Plan

Plan Description. On December 17, 2014, TMWA formed the Truckee Meadows Water Authority OPEB Trust Fund (§115 Plan), a single-employer defined benefit OPEB plan that was established to provide certain eligible TMWA employees with postemployment health benefits. This specific plan was formed to provide postemployment benefits to qualified transferred Washoe County employees as a result of the water utility transfer of operations. STMGID had no employees and was contractually operated by Washoe County. The §115 Plan is a closed plan that will provide future benefits to the remaining eligible transferred employees, and no new beneficiaries can be enrolled in this plan. The Plan issues a financial report that includes the financial statements and required supplementary information. That report may be obtained by contacting TMWA in writing at P.O. Box 30013, Reno, NV 89520-3013.

Eligibility. There are two employee classifications eligible for benefits in this plan: Tier I and Tier II classifications.

For Tier I retirees that have at least ten years but less than 15 years of combined full-time employment with Washoe County and/or TMWA, the maximum benefits payable by the §115 Plan is 50% of the premium for coverage of such retiree under the benefit plans. For Tier I employees that have at least fifteen years but less than twenty years of combined full-time employment with Washoe County and/or TMWA, the maximum benefits payable by the §115 Plan is 75% of the premium for coverage of such retiree under the benefit plans. For Tier I employees that have at least twenty years of combined full-time employment with Washoe County and/or TMWA, the maximum benefits payable by the §115 Plan is 100% of the premium for coverage of such retiree under the benefit plans.

Tier I retirees who have attained the Medicare Eligibility Age (currently age 65) during a plan year must enroll in and pay the cost of Medicare Part “A” and Medicare Part “B” or Medicare Part “C” coverage, and the §115 Plan will become the secondary payer regardless of whether the retiree enrolls in the Medicare program or not. The Medicare Eligibility Age is currently defined as age 65 but will be changed if Medicare changes the eligibility age.

For Tier II retirees the maximum benefits to be paid by the §115 Plan who have not attained Medicare Eligibility Age (currently age 65) is to be the same amount as the premium paid for group health coverage by an employer for coverage of non-state employees under the Nevada State Public Employee Benefit Plan (PEBP) Retiree Health Insurance plan. The 2003 Nevada Legislature passed legislation (AB 286) that afforded public employees of Nevada political subdivisions the opportunity to enroll, upon their retirement in the PEBP Retiree Health Insurance Plan and obligated public employers of enrolled retirees to pay a portion of the medical premium on the retiree's behalf (the Subsidy). Tier II Retirees are entitled to receive the Subsidy from the §115 Plan towards their coverage under the employer Benefit Plans rather than the PEBP Retiree Health Plan.

Tier II retirees who have attained the Medicare Eligibility Age (currently age 65) or older instead receive benefits equal to the equivalent of the State of Nevada's Medicare Exchange Retiree HRA Contribution Subsidy based upon the combined years of service with Washoe County and/or TMWA and must elect Medicare. The Medicare Eligibility Age is currently defined as age 65 but will be changed if Medicare changes the eligibility age. In order to receive the benefits described, the Tier II employee must be an employee of TMWA immediately prior to drawing their retirement benefits.

Funding Policy. The plan funds retiree benefits through an irrevocable trust for funding of the postemployment health benefits. TMWA funds the §115 Plan based on the ADC each year.

OPEB Expense and Net Position

Total OPEB Expense (Benefit) recognized for fiscal years June 30, 2025 and 2024 is below:

	§501(c)(9) Plan	§115 Plan	Total
2025	\$ (758,722)	\$ 43,991	\$ (714,731)
2024	\$ (801,540)	\$ 41,260	\$ (760,280)

Thereafter	(30,245)	—

Actuarial Valuation Assumptions

The total OPEB liability as of December 31, 2024 and December 31, 2023 was determined using the following actuarial assumptions.

Healthcare trend rate (both plans) - TMWA plan medical premiums and per capita claims costs are assumed to increase at the following rates:

Effective January 1	Premium Increase	Effective January 1	Premium Increase
2024	Actual	2040-2043	4.8%
2025	6.5%	2044-2049	4.7%
2026	6.0%	2050-2059	4.6%
2027	5.5%	2060-2065	4.5%
2028	5.4%	2066-2067	4.4%
2029	5.3%	2068-2069	4.3%
2030	5.2%	2070	4.2%
2031	5.1%	2071-2072	4.1%
2032-2037	5.0%	2073-2074	4.0%
2038-2039	4.9%	2075 & Later	3.9%

Additional significant assumptions are listed below for each plan:

Assumption	§501(c)(9) Plan	§115 Plan
Valuation Date	December 31, 2023	December 31, 2023
Funding Method	Entry Age Normal Cost, level percent of pay	Entry Age Normal Cost, level percent of pay
Asset Valuation Method	Fair value of assets	Fair value of assets
Mortality	MacLeod Watts Scale 2022 applied generationally from 2010	MacLeod Watts Scale 2022 applied generationally from 2010
Long-Term Return on Assets and Discount Rate	6.0% net of plan investment and trust expenses	6.0% net of plan investment and trust expenses
Participants Valued	Only current active employees and retired participants and covered dependents are valued. This plan is now closed.	Only current active employees and retired participants and covered dependents are valued. This plan is now closed.
Salary Increase	3.0% per year; since benefits do not depend on salary, this is used to allocate the cost of benefits between service years.	3.0% per year; since benefits do not depend on salary, this is used to allocate the cost of benefits between service years.
General Inflation Rate	2.5% per year	2.5% per year
Medicare Eligibility	Absent contrary data, all individuals are assumed to be eligible for Medicare Parts A and B at 65. Retirees over age 65 who are not eligible for Medicare are assumed to remain ineligible.	Absent contrary data, all individuals are assumed to be eligible for Medicare Parts A and B at 65.
Employer Cost Sharing	<p>IBEW Pre - 1998 Hires: Increases in the PRMPT-paid portion of healthcare premiums are assumed to increase at the same rates as medical trend (described above).</p> <p>IBEW Post-1997 Hires: The \$1,250 service multiplier is assumed to remain fixed at its current level in all future years. Retirees are expected to exhaust the lifetime allowance 4 years following retirement.</p> <p>MPAT: The \$235 (pre-65) and \$105 (post-65) service multipliers are assumed to remain fixed at their current level in all future years.</p>	<p>Tier 1: The Trust-paid portion of healthcare premiums is assumed to increase at the same rates as medical trend (described above).</p> <p>Tier 2: The TMWA subsidy provided prior to age 65 is assumed to increase at the same rates as medical trend. The subsidy provided at ages 65 and above is assumed to increase by 4.5% per year.</p>

GASB Statement No. 75 allows reporting liabilities as of any fiscal year end based on: (1) a *valuation date* no more than 30 months plus 1 day prior to the close of the fiscal year end; and (2) a *measurement date* up to one year prior to the close of the fiscal year. The following dates were used for this report:

Fiscal Year End	June 30, 2025
Measurement Date	December 31, 2024
Measurement Period	January 1, 2024 to December 31, 2024
Valuation Date	December 31, 2023
Fiscal Year End	June 30, 2024
Measurement Date	December 31, 2023
Measurement Period	January 1, 2023 to December 31, 2023
Valuation Date	December 31, 2023

The discount rate used for the fiscal years ended June 30, 2025 and 2024 is 6.0%. The Healthcare Cost Trend Rate for the fiscal years ended June 30, 2025 and 2024 were assumed to start at 6.5% (increase effective January 1, 2025) and grade down to 3.9% for years 2025 and later. The impact of a 1% increase or decrease in these assumptions is shown in the charts below.

Measurement Date - December 31, 2024

<i>§501(c)(9) Plan</i>	Discount Rate			Medical Cost Inflation

OPEB Plans Fiduciary Net Position

Detailed information about the OPEB plans fiduciary net position are available in separately issued financial statements and can be requested by contacting TMWA's Finance Department at P.O. Box 30013, Reno, NV 89520-3013.

Note 13 - Commitments

TMWA has committed \$800,000 as a contribution to the Truckee River Fund of the Community Foundation of Western Nevada for the purposes of water shed protection and enhancements to the Truckee River that will benefit the water customers of TMWA. This payment was made in August 2025.

Under a Water Resource Purchase Agreement effective March 2022, TMWA committed to purchasing 400 acre-feet of water rights from Fish Springs Ranch, LLC for a total purchase price of \$10 million. The purchase price is payable in ten \$1 million tranches over ten years. The first payment was made in November 2022.

From time to time, TMWA enters into agreements with developers for water infrastructure that benefits both new development and existing customers. TMWA is obligated to reimburse the developers for the portion of the

infrastructure that benefits existing customers. As of June 30, 2025, TMWA is under contract for five such agreements. The commitment amounts, likely payable over the next one to three years, are based on the final construction costs which are not all known as of June 30, 2025, but are estimated to be up to \$9.0 million.

Note 14 - Impairment Loss

In September 2024, a fast-moving wildfire ignited in Davis Creek Regional Park in Washoe Valley, Nevada. The "Davis Fire" burned nearly 6,000 acres and destroyed numerous structures. During this emergency, TMWA's Old Washoe Well 4 facility sustained physical damage. Specifically, the well building and the equipment housed within it were completely lost. Underground well components were not affected.

TMWA followed GASB Statement No. 42, *Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries*, to account for the activity. TMWA used the Restoration Cost Approach to calculate an impairment loss and netted the insurance recovery against it as detailed below:

Impairment Loss	\$ 579,800
Less: Insurance Recovery	(94,600)
Net Impairment Loss	<u>\$ 485,200</u>

TMWA included the Net Impairment Loss in Services and Supplies on the Statement of Revenues, Expenses, and Changes in Net Position for the year ended June 30, 2025.

The Old Washoe Well 4 underground components that were not damaged have a remaining carrying value of \$145,000 and were considered idle as of June 30, 2025. Reconstruction of the well is in progress, and the well is expected to be placed back in service during the fiscal year ended June 30, 2026.

An additional insurance recovery will likely be received during the fiscal year ended June 30, 2026 and will be recorded as nonoperating revenue when the amount becomes realizable.

Note 15 - Restatement

TMWA adopted GASB Statement No. 101, *Compensated Absences*, in the fiscal year ended June 30, 2025. The implementation of this standard requires that liabilities for compensated absences be recognized for leave that has not been used and for leave that has been used but not yet paid in cash or settled through noncash means. Changes adopted to conform to the provisions of the statement must be reported as a change in accounting principle in accordance with GASB Statement No. 100, *Accounting Changes and Error Corrections*. Beginning net position for the year ended June 30, 2024 was not restated as the net impact of the change was immaterial. However, the below amounts previously reported for the year ended June 30, 2024 were restated as follows:

	June 30, 2024 As Previously Reported	GASB 101 Implementation	June 30, 2024 As Restated
Current portion of compensated absences	\$ 590,937	\$ 955,583	\$ 1,546,520
Compensated absences, net of current portion	3,213,205	309,011	3,522,216
Unrestricted net position	37,941,681	(1,264,594)	36,677,087
Salaries and wages	30,637,686	1,264,594	31,902,280

Note 16 - Change in Estimate

Per GASB Statement No. 100, *Accounting Changes and Error Corrections*, accounting estimates are outputs determined based on inputs such as data, assumptions, and measurement methodologies. A *change* in an accounting estimate occurs when inputs change. Changes to inputs result from a change in circumstance, new information, or more experience.

During the year ended June 30, 2025, TMWA updated its measurement methodology for the Net Investment in Capital Assets component of Net Position based on additional experience. The newly adopted measurement methodology is preferable to the measurement methodology used before the change because it better satisfies the qualitative characteristics of financial reporting. In particular, TMWA believes the new methodology improves financial statement reliability and comparability by proportionately allocating prior principal payments on the 2016 and 2017 refunding bonds outstanding to the percentage of bonds from the original issuance of the 2001A bond proceeds that were not used for capital purposes.

The below financial statement line items were affected by this change in estimate:

	<u>June 30, 2025</u>
Net Position	
Net investment in capital assets	\$ 883,414,142
Restricted for operations and maintenance	14,613,579
Unrestricted	56,648,848

Note 17 - Subsequent Events

In August 2025, TMWA executed a Power Purchase Agreement (PPA) with Switched On LLC for the sale of hydroelectric power generated from TMWA's three run-of-the-river hydroelectric facilities located along the Truckee River. The PPA will become effective following the expiration of TMWA's existing PPAs with Sierra Pacific Power Company in 2028 and 2029. The terms of the new PPA include an initial price of \$120/MWh, escalating at 1% annually for 20 years.

In September 2025, TMWA finalized a \$30 million grant agreement with the Bureau of Reclamation to fund the construction of the two million gallon per day Advanced Purified Water treatment facility at American Flat. Per the terms of the Interlocal Agreement with City of Reno, TMWA will share these funds with the City of Reno according to the agreed upon cost split.

Notes to Schedule

*Historical information is required only for measurement periods for which GASB Statement No. 75 is applicable. Future years' information will be disclosed up to 10 years as information becomes available.

⁽¹⁾ Effective December 13, 2018, the Board adopted a resolution to close the Plan to employees hired on or after December 13, 2018.

⁽²⁾ In 2022, mortality tables were updated from MacLeod Watts Scale 2018 to MacLeod Watts Scale 2022. The Healthcare Cost Trend Rate for the fiscal year ended June 30, 2025 was assumed to start at 6.5% (increase effective January 1, 2025) and grade down to 3.9% for years 2075 and later. The Healthcare Cost Trend Rate for the fiscal year ended June 30, 2024 was assumed to start at 5.8% (increase effective January 1, 2023) and grade down to 3.9% for years 2076 and later. In 2020, mortality tables were updated from MacLeod Watts Scale 2017 to MacLeod Watts Scale 2018; and the medical trend model was updated from combined sources, Nevada Public Employee Benefit Plan along with other healthcare trends, to the Getzen healthcare trend model.

⁽¹⁾ In 2022, mortality tables were updated from MacLeod Watts Scale 2018 to MacLeod Watts Scale 2022. The Healthcare Cost Trend Rate for the fiscal year ended June 30, 2025 was assumed to start at 6.5% (increase effective January 1, 2025) and grade down to 3.9% for years 2075 and later. The Healthcare Cost Trend Rate for the fiscal year ended June 30, 2024 was assumed to start at 5.8% (increase effective January 1, 2023) and grade down to 3.9% for years 2076 and later. In 2020, mortality tables were updated from MacLeod Watts Scale 2017 to MacLeod Watts Scale 2018; and the medical trend model was updated from combined sources, Nevada Public Employee Benefit Plan along with other healthcare trends, to the Getzen healthcare trend model.

Statistical Section

Truckee Meadows Water Authority

This part of the Truckee Meadows Water Authority Annual Comprehensive Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about TMWA's overall financial health.

Section Contents**Schedule No.****Financial Trends****1-6**

These schedules contain trend information to help the reader understand how TMWA's financial performance and well-being have changed over time.

Revenue Capacity**7-8**

These schedules contain information to help the reader assess the factors affecting TMWA's ability to generate its water sales and other revenues.

Debt Capacity**9**

This schedule presents information to help the reader assess the affordability of TMWA's current levels of outstanding debt, and its ability to issue additional future debt.

Demographic and Economic Information**10-12**

These schedules offer demographic and economic indicators to help the reader understand the environment within which TMWA's financial activities take place and to help make comparisons over time and with other utilities.

Operating Information**13-17**

These schedules contain information about TMWA's operations and resources to help the reader understand how TMWA's financial information relates to the services it provides and the activities it performs.

Debt Ratios**18-19**

These schedules contain information about changes in TMWA's debt and its debt in relation to service connections.

Sources: Unless otherwise noted, the information in these schedules is derived from the Annual Comprehensive Financial Report for the relevant year.

⁽¹⁾ Includes retail residential, commercial, irrigation, and wholesale water sales net of bad debt expense.

⁽²⁾ Reflects hydroelectric revenues, other miscellaneous operating revenues from fees and charges, as well as gross investment income.

⁽³⁾ Includes water supply, treatment, distribution, hydroelectric power plant maintenance, customer service, water resource planning, conservation programs, administration, and inspection services. Wages and salaries, employee benefits, and services and supplies comprise these expenses.

⁽⁴⁾ The Authority is required to pay property taxes on water rights and storage facilities located in California.

⁽⁵⁾ This schedule does not include the payments on the DWSRF loan or the 2021 Refunding Bonds, which are subordinate to the 2015-A, 2016, 2017 and 2018 Refunding Bonds.

⁽⁶⁾ TMWA's bond covenants require a minimum coverage of 1.25x total principal and interest payments. In fiscal years 2017, 2018 and 2019, TMWA deferred principal payments on debt which increased the debt coverage ratio.

⁽¹⁾ Nevada Revised Statutes Chapter 612 stipulate that actual employment for individual employers may not be published. The Nevada Department of Employment Training and Rehabilitation outsources the publication of this information to Infogroup and Nevada Workforce. Infogroup publishes employee counts in ranges of 5,000. The number of employees are estimated using the midpoint.

⁽²⁾ International Game Technology was acquired by Gtech in 2015 becoming International Game Technology PLC.

Truckee Meadows Water Authority

**Independent Auditor's Report on Internal Control over Financial Reporting and on
Compliance and Other Matters Based on an Audit of Financial Statements
Performed in Accordance with *Government Auditing Standards***

To the Board of Directors
Truckee Meadows Water Authority
Reno, Nevada

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*), the financial statements of the business-type activities and the fiduciary activities of the Truckee Meadows Water Authority ("TMWA"), as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise TMWA's basic financial statements, and have issued our report thereon dated November 17, 2025.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered TMWA's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of TMWA's internal control. Accordingly, we do not express an opinion on the effectiveness of TMWA's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of TMWA's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether TMWA's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the TMWA's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering TMWA's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

November 17, 2025

Independent Auditor's Report on Compliance for the Major Federal Program; Report on Internal Control Over Compliance Required by the Uniform Guidance; and Report on the Schedule of Expenditures of Federal Awards Required by the Uniform Guidance

To the Board of Directors
Truckee Meadows Water Authority
Reno, Nevada

Report on Compliance for the Major Federal Program

Opinion on the Major Federal Program

We have audited Truckee Meadows Water Authority's ("TMWA") compliance with the types of compliance requirements identified as subject to audit in the OMB *Compliance Supplement* that could have a direct and material effect on TMWA's major federal program for the year ended June 30, 2025. TMWA's major federal program is identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

In our opinion, TMWA complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on its major federal program for the year ended June 30, 2025.

Basis for Opinion on the Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America (GAAS); the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*); and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of TMWA and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for the major federal program. Our audit does not provide a legal determination of the TMWA's compliance with the compliance requirements referred to above.

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules and provisions of contracts or grant agreements applicable to the TMWA's federal program.

Auditor's Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on the TMWA's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material, if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about the TMWA's compliance with the requirements of the major federal program as a whole.

In performing an audit in accordance with GAAS, *Government Auditing Standards*, and the Uniform Guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the TMWA's compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- Obtain an understanding of the TMWA's internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of the TMWA's internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

Report on Internal Control over Compliance

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below we did identify certain deficiencies in internal control over compliance that we consider to be material weaknesses.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiency in internal control over compliance described in the accompanying schedule of findings and questioned costs as item 2025-001, to be a material weakness.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

Government Auditing Standards requires the auditor to perform limited procedures on TMWA's response to the internal control over compliance findings identified in our compliance audit described in the accompanying schedule of findings and questioned costs. The TMWA's response was not subjected to the other auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Expenditures of Federal Awards Required by the Uniform Guidance

We have audited the financial statements of the business-type activities and the fiduciary activities of TMWA as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise the TMWA's basic financial statements. We issued our report thereon dated November 17, 2025, which contained unmodified opinions on those financial statements. Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by the Uniform Guidance and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

A handwritten signature in cursive script that reads "Eide Bailly LLP".

December 12, 2025

Auditor's Comments

To the Board of Directors
Truckee Meadows Water Authority
Reno, Nevada

In connection with our audit of the financial statements of the Truckee Meadows Water Authority ("TMWA") as of and for the year ended June 30, 2025, and the related notes to the financial statements, nothing came to our attention that caused us to believe that TMWA failed to comply with the specific requirements of Nevada Revised Statutes cited below. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance. Accordingly, had we performed additional procedures, other matters may have come to our attention regarding TMWA's noncompliance with the requirements of Nevada Revised Statutes cited below, insofar as they relate to accounting matters.

Current Year Statute Compliance

The required disclosure on compliance with Nevada Revised Statutes and the Nevada Administrative Code is contained in Note 2 to the financial statements.

Progress on Prior Year Statute Compliance

There were no potential statute violations reported in the June 30, 2024 audit report.

Prior Year Recommendations

Corrective action for finding 2024-001 has been implemented.

Current Year Recommendations

No current year findings noted.

A handwritten signature in dark ink that reads "Eide Bailly LLP".

Total U.S. Department of the Treasury			<u>1,305,438</u>	<u>—</u>
Total Federal Financial Assistance			<u><u>\$ 1,437,530</u></u>	<u><u>\$ —</u></u>

Note 1 - Basis of Presentation

The accompanying schedule of expenditures of federal awards (Schedule) includes the federal award activity of the Truckee Meadows Water Authority (TMWA) under programs of the federal government for the year ended June 30, 2025. The information in this Schedule is presented in accordance with the requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of TMWA, it is not intended to and does not present the financial position, changes in net position, or cash flows of TMWA.

Note 2 - Summary of Significant Accounting Policies

Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement.

Note 3 - Indirect Cost Rate

TMWA has not elected to use the 10 percent de minimis indirect cost rate for federal awards executed prior to October 1, 2024, or the 15 percent de minimus indirect cost rate for those executed on or after October 1, 2024.

Section I – Summary of Auditor’s Results

Financial Statements

Type of auditor's report issued:	Unmodified
Internal control over financial reporting:	
Material weaknesses identified	No
Significant deficiencies identified not considered to be material weaknesses	None reported
Noncompliance material to financial statements noted?	No

Federal Awards

Internal control over major program:	
Material weaknesses identified	Yes
Significant deficiency identified not considered to be material weaknesses	No
Type of auditor's report issued on compliance for the major program:	Unmodified
Any audit findings disclosed that are required to be reported in accordance with Uniform Guidance 2 CFR 200.516 (a)	Yes

Identification of major program:

<u>Name of Federal Program</u>	<u>Federal Financial Assistance Listing</u>
COVID-19 Coronavirus State and Local Fiscal Recovery Funds	21.027
Dollar threshold used to distinguish between Type A and Type B programs:	\$750,000
Auditee qualified as low-risk auditee?	No

Section II – Financial Statement Findings

None.

Section III – Findings and Questioned Costs for Federal Awards

**2025-001 U.S. Department of the Treasury
Coronavirus State and Local Fiscal Recovery Funds, 21.027**

**Other
Material Weakness in Internal Control over Compliance**

Grant Award Number: ARPA00849

Criteria: Management is responsible for establishing and maintaining an effective system of internal control over financial reporting and over compliance. Title 2 *Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance) requires TMWA to prepare a Schedule of Expenditures of Federal Awards (SEFA) as prescribed by section 200.510(b) showing total federal financial assistance expenditures for the year.

Condition: An expenditure was originally included on the June 30, 2025 SEFA. However, the expenditure should have been reported on the June 30, 2024 SEFA.

Cause: TMWA did not have adequate internal controls to ensure total federal financial assistance expenditures were reported on the SEFA in the correct period.

Effect: Prior to correction, federal financial assistance expenditures were overstated on the June 30, 2025 SEFA by \$128,805 for the grant.

Questioned Costs: None

Context/Sampling: This was the only expenditure for this grant award originally included on the SEFA, and therefore represented the full population.

*Repeat Finding from
Prior Year:* No

Recommendation: We recommend TMWA enhance internal controls to ensure federal financial assistance expenditures are reported on the SEFA in the correct period.

*Views of Responsible
Officials:* Management agrees with the finding.

Single Audit Findings

Finding 2025-001

Finding Summary: Truckee Meadows Water Authority did not report a federal financial assistance expenditure in the correct period.

Corrective Action Plan: Truckee Meadows Water Authority has updated its internal controls to better ensure federal financial assistance expenditures are reported in the correct period going forward.

Responsible Individuals: Sophia Cardinal, Financial Controller
Matt Bowman, Chief Financial Officer

Completion Date: December 2025

**Popular Annual
Financial Report**

This Popular Annual Financial Report is based on accounting standards and audited information that is fully represented in TMWA's Annual Comprehensive Financial Report, which can be found at tmwa.com/financial-information.

To Our Customers

On behalf of Truckee Meadows Water Authority (TMWA), I am pleased to present our 2025 Popular Annual Financial Report (PAFR).

This report is a companion piece to TMWA's Annual Comprehensive Financial Report (ACFR) for fiscal year 2025 (FY25), which accounts for financial activity from July 1, 2024 to June 30, 2025. The ACFR is a detailed, formal document required for legal compliance and financial transparency. It is also over 100 pages long, and we understand its size and detail can be daunting.

To provide a useful and insightful summary of the information, this document distills TMWA's core financial information into an engaging, easily digestible format. Our goal is to provide financial accountability in a way that is more accessible to the public.

This document presents a clear and concise explanation of TMWA's financial position, with breakdowns of revenue, expenses, capital expenditures, and how we fund essential services. It also provides direct links into key forms and reports within the ACFR if you want to dive deeper into the accounting.

I encourage you to use this report to understand how TMWA manages and protects its financial standing. As a community-owned water utility, the public's understanding of how TMWA ensures the delivery of high-quality water to customers is key to our shared success.

Best regards,

A handwritten signature in black ink that reads "Matt Bowman". The signature is fluid and cursive, with a long horizontal stroke at the end.

Matt Bowman, Chief Financial Officer

Truckee Meadows Water Authority

Truckee Meadows Water Authority's Board of Directors: A Multi-Jurisdictional Governing Board

TMWA is a community-owned water utility. Its Board of Directors (Board) is comprised of seven elected officials from Reno, Sparks, and Washoe County. TMWA has no financial interdependence with any of its governing municipalities.

Leadership positions pictured below reflect TMWA's Board in FY25 (July 1, 2024-June 30, 2025). For fiscal year 2026, Clara Andriola was elected to serve as Chair with Paul Anderson chosen as Vice Chair. Both terms began on July 1, 2025.

While representing each jurisdiction, board members collectively make policy decisions and issue directives with a regional perspective. This leadership body oversees TMWA's ongoing mission to provide exceptional, high-quality drinking water to residents throughout the Truckee Meadows.

Your Water Authority

TMWA provides drinking water to over 475,000 residents in Reno, Sparks, and Washoe County — a service area that stretches 171 square miles. The primary source of water is the Truckee River, which flows from Lake Tahoe and other tributaries upstream of the Truckee Meadows.

FY25 performance

Financial ratings

Meeting Our Obligations

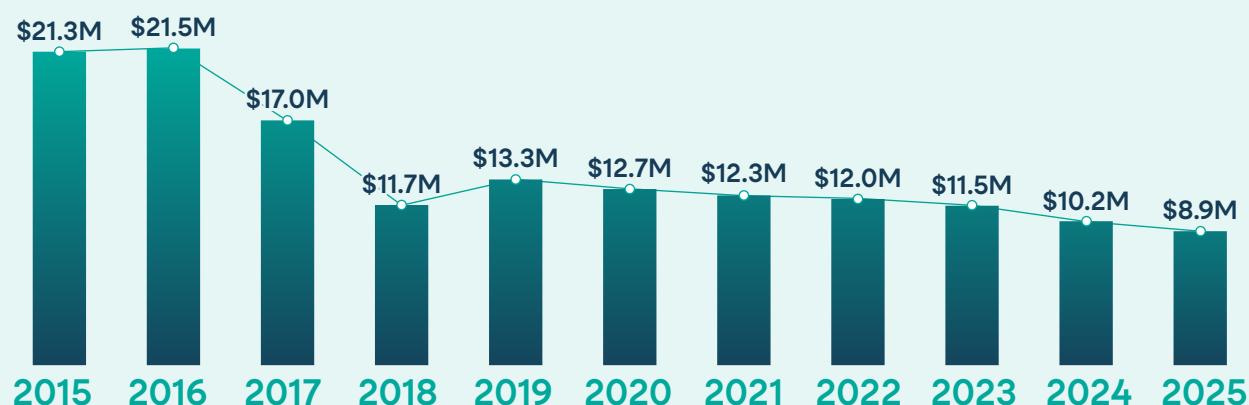

By issuing bonds to purchase Sierra Pacific Power Company's water business in 2001, TMWA became responsible for a debt repayment of \$452 million. This important investment secured permanent local control of our water resources.

As of June 30, 2025, TMWA's total outstanding debt was \$305.5 million. Over the past decade, TMWA has reduced interest expense by 59% and has reduced outstanding principal on its debt by \$201.6 million.

A notable activity in FY25 was TMWA's debt obligation fulfillment to the Nevada's State Revolving Fund (SRF) for two bonds. One payoff was for a \$4.7 million bond issued in 2005, and the other was for a \$9.1 million bond issued in 2014.

The diligent fulfillment of debt obligations since its founding factors into why Moody's, S&P, and Fitch assign high bond market ratings to TMWA. Favorable bond ratings help keep the cost of borrowing low.

TMWA's Reduced Interest Expense Over the Past 10 Years

Get insight into TMWA's Debt Management on page 51 of the ACFR.

Where TMWA Stands

TMWA stands tall within the hierarchy of credit rating categories. The table below demonstrates TMWA's financial position, according to the top three rating agencies in the United States.

Bond Rating			Rating Category
FITCH	MOODY'S	S&P	
✓ AAA	Aaa	AAA	✓ PRIME
AA+	Aa1	✓ AA+	✓ HIGH GRADE
AA	✓ Aa2	AA	
AA-	Aa3	AA-	
A+	A1	A+	UPPER MEDIUM GRADE
A	A2	A	
A-	A3	B	
B +/-	Baa 1 2 3	BBB +/-	LOWER MEDIUM GRADE

Bond ratings are expressed as letters ranging from “AAA” or “Aaa” which is the highest grade, to “D” (“junk”), which is the lowest grade. Different rating services use the same letter grades but use various combinations of uppercase and lowercase letters to differentiate themselves.

Factors That Led to TMWA's AAA Bond Designation From Fitch Ratings Include:

Very Low Operating Cost Burden and Manageable Capital Needs

TMWA has a ‘very low and quite stable’ operational cost burden. Projected infrastructure investments are expected to outpace the depreciation of existing assets, ensuring the necessary improvements are planned to appropriately maintain TMWA's water system infrastructure.

Affordable Rates and Strong Local Economy

TMWA has the ability to determine rates and makes them affordable. Further, the economy of TMWA's service territory is stable, as evidenced by steady growth, diversification, and low unemployment in the Truckee Meadows over the last decade.

Financial Performance with Reductions in Debt

TMWA's financial profile is considered ‘exceptionally strong’ with performance that has historically exceeded market expectation. TMWA's debt reductions have ensured financial flexibility and strong liquidity.

Agreement Secures Bright Future for TMWA Hydroelectric Power Generation

In August 2025, TMWA executed a 20-year Power Purchase Agreement (PPA) with Switch, a provider of AI, cloud, and enterprise data centers for the sale of electric power from TMWA's three hydroelectric facilities. This agreement takes effect in 2028 and yields a significant financial advantage for TMWA, with over \$100 million in revenue projected over its lifespan. This will help keep water rates low for TMWA customers.

In comparison, over the past 10 years TMWA's total hydroelectric revenue was \$30.5 million under the current PPA with NV Energy. The highest annual revenue ever generated by TMWA's hydroelectric facilities was \$4.2 million in fiscal year 2024.

The Switch PPA results in increased revenue and provides additional funds to address facility modernization for TMWA's three hydroelectric facilities on the Truckee River. These plants are all over 100 years old and generate power using turbines driven by river flow.

Finally, the agreement fulfills TMWA's goal to continue producing renewable energy for decades to come and to secure a revenue stream that benefits customers.

See Item #8 from the August 2025 Board of Directors Meeting

Advanced Meter Infrastructure Installations are Complete

This past summer, TMWA completed its Advanced Meter Infrastructure (AMI) project, providing more information for customers to manage their water use than ever before.

AMI Quick facts

137k

Total Meters Installed

Over 137,000 new water meters in homes and businesses

6 yrs

Project Duration

Approximately six years from 2018 – 2025

\$420k

Operational Savings

Reduces the cost for manual meter reading, resulting in approximately \$420,000 of operational savings per year for TMWA.

Account Management

- ✓ Tracks water use by the hour, in near real-time
- ✓ Centralizes a way to identify and pinpoint water loss
- ✓ Includes leak detection alerts

TMWA's Rainy-day Fund: Restricted vs. Unrestricted Cash Reserves

Similar to the way personal savings accounts help to cover unexpected household expenses, TMWA maintains cash reserves to ensure the stability and reliability of our community's water system. However, these reserves aren't a measure of wealth; instead, they are used as a strategic financial planning tool allowing TMWA to prepare for the future and manage unexpected events.

TMWA separates its reserves into two key "buckets" for responsible management: Restricted and Unrestricted cash reserves. TMWA's strategy involves balancing these two types of reserves to create a comprehensive financial safety net.

Restricted Cash Reserves

- **What they are:** Funds that can only be spent on pre-defined items to support operations and meet legal or contractual requirements, like bond covenants.
- **Benefit:** They provide assurance to lenders and regulators that TMWA can meet its critical obligations, which can reduce the cost of debt.

Unrestricted Cash Reserves

- **What they are:** Funds that have flexibility in how they are used, serving as a vital strategic allocation tool that helps provide operational stability if needed.
- **Benefit:** They offer maximum flexibility to respond to financial stressors, like a sudden drop in revenue, or to fund unanticipated infrastructure or equipment failures.

While unrestricted cash reserves are more flexible, there are policies for holding minimum balances. Guidelines include:

- ✓ Fund four months of operating expenses, with two months held as a restricted reserve. Combined, these equate to six months of operating reserve.
- ✓ Cover one year of debt service.
- ✓ Cover repair and replacement items, representing a balance of \$30 million.
- ✓ Mitigate unforeseen one-time events like infrastructure or major equipment failures, representing 1% of total depreciable assets.

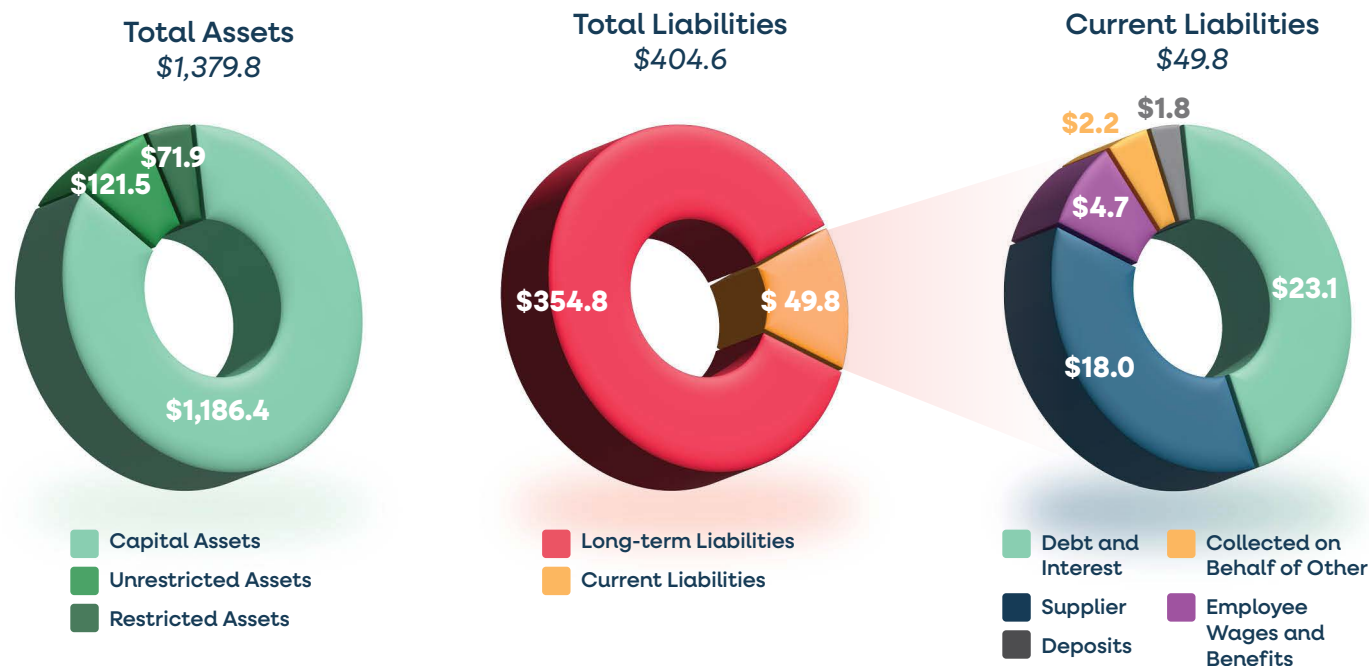

In addition to the unrestricted reserves required above, TMWA maintains a Rate Stabilization Fund (\$11.5 million as of June 30, 2025), which further protects customers from rate increases due to emergencies or other unforeseen events.

***Review TMWA's cash reserves
on page 30 of the ACFR.***

The Big Picture on TMWA's Financial Position

Net Position (formally, the Statement of Net Position) provides a point-in-time 'snapshot' of the financial status for governmental organizations. Much like a balance sheet, Net Position provides insight into what government agencies own (assets) and what they owe (liabilities) at the end of each fiscal year. The charts below show TMWA's assets and liabilities as of June 30, 2025.

At-A-Glance (in millions)

Statement of Net Position (in millions)

	2025	2024	2023	2022
Unrestricted Current Assets	120.7	117.3	170.1	189.4
Restricted Current Assets	36.5	69.6	28.7	33.3
Long-Term Restricted and Other Assets	30.2	28.8	27.5	26.1
Net Other Post Employment Benefits Asset	6	4.7	3.1	6.0
Capital Assets, Net	1,186.4	1,132.9	1,083.9	1,052.0
Total Assets	1,379.8	1,353.3	1,313.3	1,300.8
Deferred Outflow of Resources	26.3	23.1	25.5	22.4
Total Assets and Deferred Outflow of Resources	1,406.1	1,376.4	1,338.8	1,323.3
Total Current Liabilities	49.8	60.9	50.6	46.8
Long Term Debt Outstanding	289.2	309.9	333.9	355.4

Restricted	50.1	45.6	43.7	50.7
Unrestricted	56.7	36.6	97.6	116.6
Total Net Position	\$990.2	\$935.3	\$890.5	\$860.3

Change in Net Position

Change in Net Position (formally, the Statement of Revenues, Expenses and Changes in Net Position) is a financial statement focusing on a particular time period. This statement (below) covers TMWA's fiscal year from July 1 to June 30. Much like an income statement, it primarily covers revenues and expenses.

Change in Net Position (in millions)

	2025	2024	2023	2022
Operating Revenues	132.3	122.4	113.1	114.6
Operating Expenses	129.4	122.3	114.4	98.6
Operating Income (Loss)	2.9	0.1	(1.3)	16.0
Nonoperating Revenues (Expenses), Net	(1.0)	(5.3)	(10.8)	(21.5)
Income (Loss) before Capital Contributions	1.9	(5.2)	(12.1)	(5.5)
Capital Contributions, Net	53.0	50.0	42.3	51.6
Change in Net Position	54.9	44.8	30.2	46.1
Net Position — Beginning of Year	935.3	890.5	860.3	814.2
Net Position — End of Year	\$990.2	\$935.3	\$890.5	\$860.3

Review Change in Net Position details on page 32 of the ACFR.

Explanation of Terms

UNRESTRICTED ASSETS: Assets such as cash, accounts receivable, deposits, and prepaid expenses that can be used and managed with flexibility.

RESTRICTED ASSETS: Assets that must be used for specific purposes.

CAPITAL ASSETS: Fixed physical assets, such as water mains, treatment plants, pump and pressure regulating stations, water tanks, vehicles, etc.

DEFERRED FLOW OF RESOURCES: Accounting for revenue or expenses that will occur in the future.

TOTAL NET POSITION: Balance of a governmental organization's assets against its liabilities.

OPERATING REVENUES: Money generated from water, hydroelectric, and other operating sales. From this amount, operating expenses are subtracted to determine operating income or loss.

OPERATING EXPENSES: Costs that are directly associated with day-to-day operation, such as wages, benefits, and services/supplies.

NONOPERATING REVENUE OR EXPENSES: Income or costs that are not directly attributable to core business operations (i.e., interest expense and investment income).

CAPITAL CONTRIBUTIONS: Grant proceeds or funds that are invested into TMWA's infrastructure.

Loss Happens: Davis Wildfire Damages Critical Groundwater Well

TMWA is currently addressing the loss of a critical groundwater well due to the destructive Davis Fire that rapidly burned through 5,824 acres between south Reno and Davis Creek campground in September of 2024.

As the fire spread, it critically damaged the above-ground infrastructure at Old Washoe Well 4, a key water source for the Old Washoe Estates Pressure Zone. TMWA engineers estimate that 80% of the well's infrastructure was a total loss.

The salvageable assets were located underground and remain reusable or in serviceable condition. As a result, TMWA recorded a permanent loss of \$579,800 in FY25.

To date, TMWA has received initial insurance proceeds of \$94,600, with additional insurance proceeds anticipated in FY26.

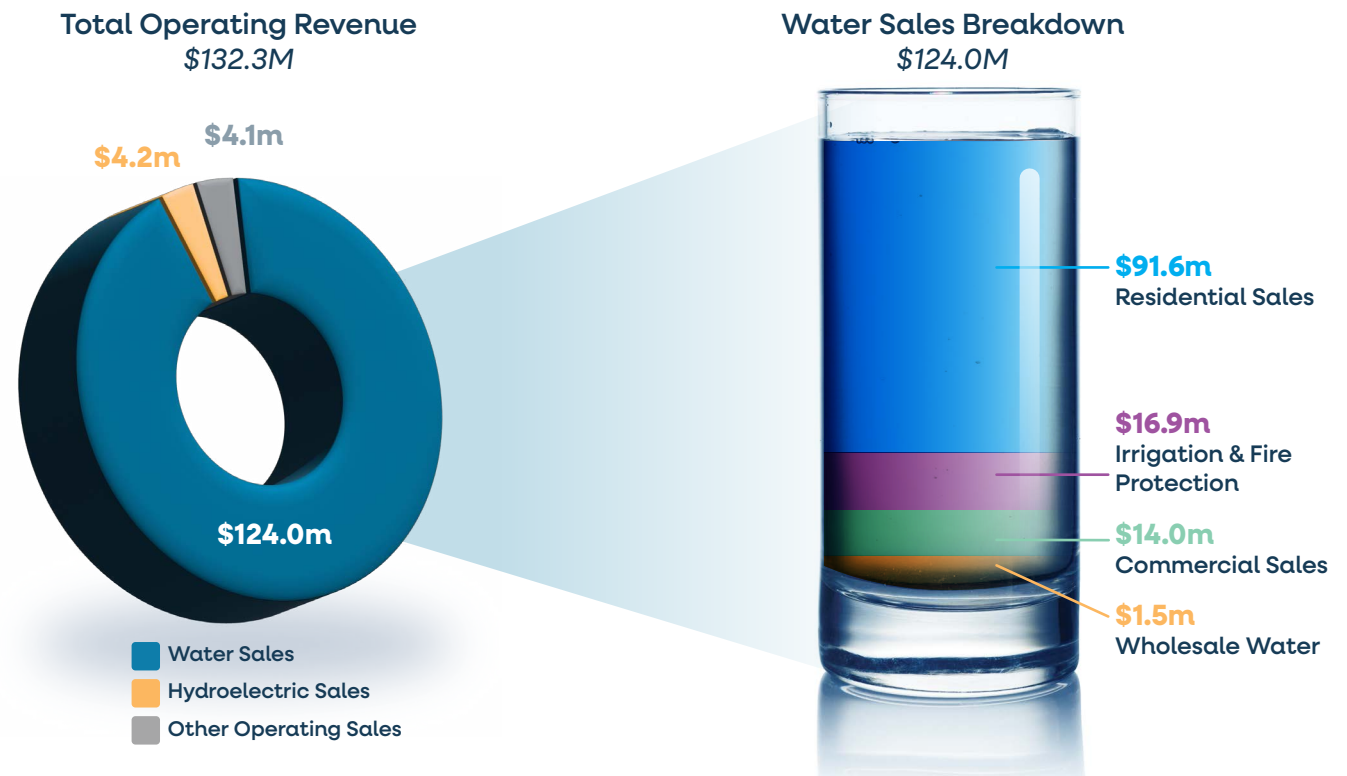

Ensuring Water Service Delivery During Disaster

Despite power loss and damage to one of its wells, TMWA ensured water service delivery to the Old Washoe Estates during and after the fire through consistent generator refueling, maintenance of pressure regulating stations, periodic visits by diesel technicians, and delivery of water disinfection chemicals to ensure water availability to customers. Additional measures taken during the incident included:

- ✓ **Maximizing Storage:** Upon being alerted to the fire, TMWA operators immediately followed emergency response protocol, which included raising water storage levels in all tanks within the fire zone. This also ensured the maximum amount of water was available for firefighting.
- ✓ **Coordination and Safety:** TMWA worked closely with law enforcement, fire department Incident Commanders, and the Regional Emergency Operations Center to ensure staff and contractors could safely maintain water-delivery operations.
- ✓ **Maintaining System Settings:** Smaller portable generators were utilized at various locations to maintain critical operating settings, such as pressure transducers, pump on/off signals, tank elevation data, and cameras needed for situational awareness.

Review the fiscal impact of this natural disaster on page 69 of the ACFR.

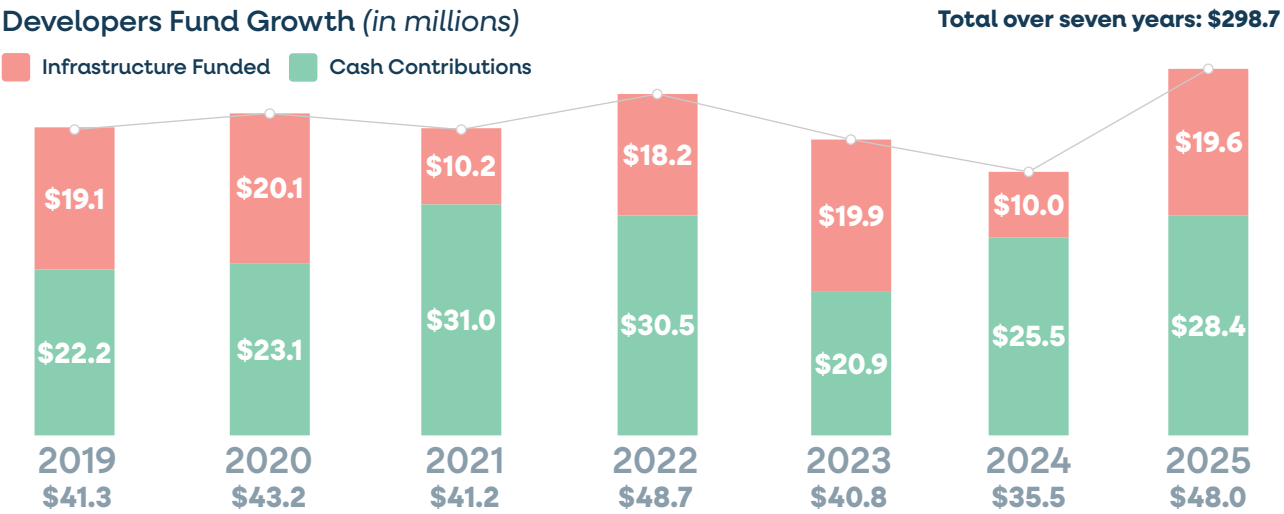

Incoming: Water Sales Provide 94% of TMWA's Operating Revenue

Growth Paying for Growth

Neither TMWA nor its customers pay for new infrastructure needed for residential or commercial development. To protect ratepayers from the short and long-term costs of service-area expansion, fees and infrastructure contributions from developers are required. Over the past seven years, total developer contributions for new growth have exceeded \$299 million.

New development projects are approved by the county and cities. Water rights must be dedicated to TMWA before building can begin for any new project. For every gallon of surface water needed to serve new development, an additional 11% of water rights are required and must be dedicated to TMWA for drought storage. This ensures the region will always have enough resources to meet dedicated water rights.

Outgoing: How TMWA Spends By the Dollar

TMWA's Spending Allocations, Represented As Cents on the Dollar

Explanation of Expenses

SALARIES, WAGES & EMPLOYEE BENEFITS

Compensation paid to our workforce in performing TMWA's day-to-day operations.

SERVICES & SUPPLIES

Non-payroll related expenses of day-to-day operations, (i.e., treatment supplies, infrastructure maintenance, distribution, customer service, etc.).

PRINCIPAL & INTEREST ON CUSTOMER RELATED DEBT

Principal and interest payments on all loans outstanding except those associated with service territory expansion.

REHABILITATIVE CAPITAL SPENDING

The cost of replacing and maintaining existing capital assets, (i.e., water treatment plants, infrastructure replacements, storage tanks, etc.).

Review Revenue and Expense Details on page 32 of the ACFR

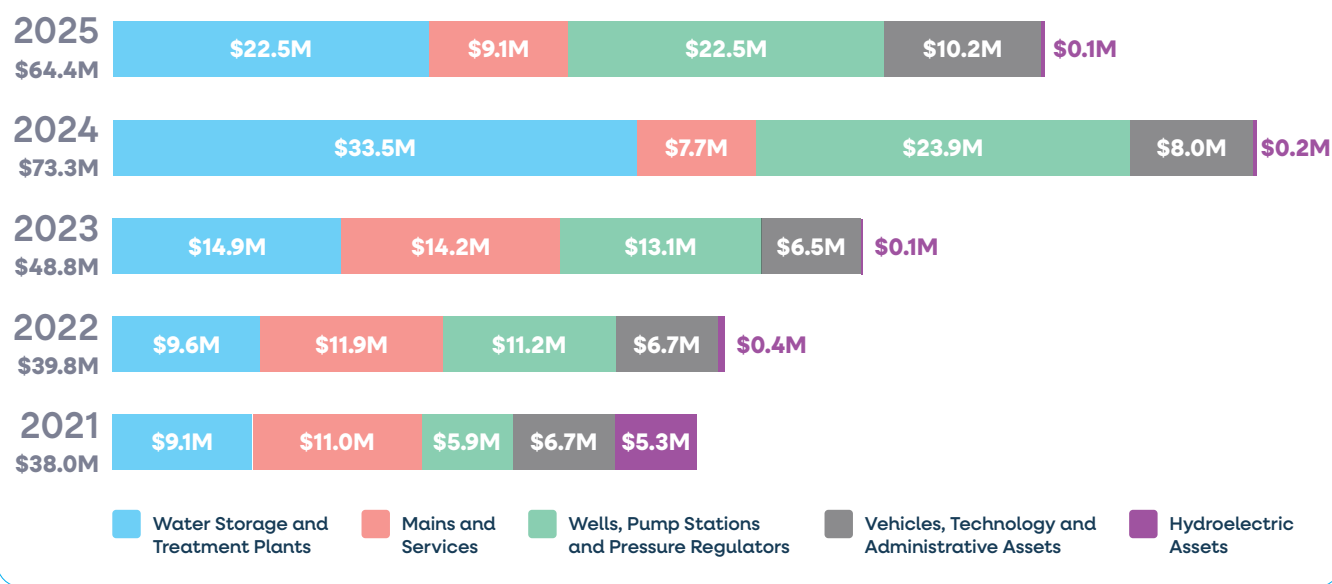

Capital Projects That Keep Water Flowing

Day or night, when customers turn on their taps, they expect water to flow. This means 24/7 operations for TMWA.

With a system in constant operation, there is always something within our extensive infrastructure requiring maintenance, rehabilitation, or replacement.

An overview of projected capital expenditures for the next five years can be found in TMWA's current [Water System Facility Plan](#). This plan includes priority water facility improvements, new infrastructure requirements, and projected capital improvement costs through 2040.

Capital Spending by Category

New Hydroelectric Facility Leverages Existing Infrastructure, Reduces Cost to Treat Water

The Orr Ditch Hydroelectric Facility is in its final phase of development and is set to come online in Spring 2026. This innovative capital improvement project began three years ago and stands out by leveraging existing infrastructure to create new value to TMWA's operation.

Specifically, the project capitalizes on the existing pipeline connecting the Chalk Bluff Water Treatment Plant (Chalk Bluff) and the Orr Ditch. The facility uses this existing gravity-fed conveyance to drive two new power generating turbines located below Chalk Bluff. Using the existing canal eliminates the need for a new diversion from the river, which also simplified the permitting process with the Federal Energy Regulatory Commission.

Importantly, power from Orr Ditch will be managed by TMWA and used as a clean energy supply for Chalk Bluff, the region's primary water treatment facility. Generating TMWA's own power at this key location during the off-peak months of November-April will substantially reduce the facility's power cost, which is one of TMWA's largest single expenses.

This project was constructed in conjunction with the replacement of the Orr Ditch booster pump station which provides a redundant supply of water to Chalk Bluff. The total project cost was approximately \$40 million and was funded partially (\$1.5 million) by grant proceeds from the Nevada Department of Conservation and Natural Resources. TMWA expects to receive additional funding of approximately \$4 million through refundable tax credits. These proceeds are expected in fiscal year 2027.

***See Agenda Item #6 from
the February 2020 Board
of Directors Meeting***

Developing a Sustainable Water Resource: An Update on the American Flat Project

After more than 15 years of research, pilot testing, and demonstration projects in partnership with the City of Reno, progress continues on the Advanced Purified Water Facility (APWF) at American Flat north of Reno.

The new facility will produce approximately two million gallons per day of drought-proof, high-quality drinking water. To date, most of the funding secured has come from a combination of local, state and federal sources. These include:

EPA and State Revolving Funds: \$128 Million

The U.S. Environmental Protection Agency (EPA) announced in October 2024 that it was supporting the project with \$128 million, which includes:

- ✓ \$70 million loaned through Nevada's Clean Water State Revolving Fund,
- ✓ \$55 million loaned through the Nevada Division of Environmental Protection's Drinking Water State Revolving Fund, and
- ✓ \$3 million in congressionally directed spending.

Bureau of Reclamation Grant: \$30 Million

TMWA and the City of Reno were awarded a \$30 million federal WaterSMART grant from the Department of Interior's Bureau of Reclamation for the planning, design, and construction of the facility.

Remaining Funds

Additional funding is provided through agency partnership, with 70% of the remaining funds coming from the City of Reno and 30% from TMWA.

Construction is slated for Summer 2026 and is expected to last several years, followed by a period of extensive testing and monitoring. During this period, the A+ Water from American Flat will be used for agriculture, ultimately becoming a new groundwater resource for TMWA's drinking water distribution.

***Stay updated on the
American Flat project.***

Integrating It All

This document is a high-level overview of [TMWA's Annual Comprehensive Financial Report](#), which offers a detailed review of multiple financial statements as well as the policies that guide TMWA's approach to managing funds.

This annual financial report gives insight into the fiscal health of TMWA's operations year after year. Beyond annual financial reporting, TMWA has an integrated planning approach across three areas of focus: Funding, Facilities, and Water Resources.

TMWA's Funding Plan projects into the next five years, whereas the Facility and Water Resource Plans look 20+ years into the future. Although these are three distinct planning efforts, the implementation of the plans is integrated.

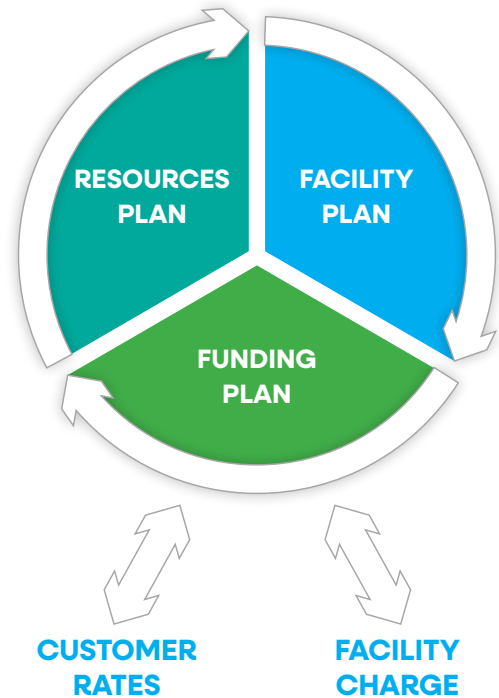

For example:

The **Water Resource Plan** estimates water supply and demand, giving insight into the facility capacity that will be needed for TMWA's future infrastructure.

The **Facility Plan** identifies the condition of TMWA's existing capital assets and project expansions needed to meet future growth, as identified in the Water Resource Plan. Facility charges are calculated based on the Facility Plan and are what builders and developers pay to connect new construction to the water system. This keeps customer rates protected from the cost of new developments, ensuring growth pays for growth.

The **Funding Plan** is a five-year operations plan that also incorporates the Five-Year Capital Improvement Plan. It is a thorough analysis of all revenues and expenses, as well as any capital improvements and infrastructure needed—with an assessment of overall spending and identification of funding options.

This integrated planning approach is how TMWA can both ensure the delivery of high-quality drinking water while keeping customer rates as low as possible. To see all of TMWA's most recent plans, go to tmwa.com/planning.

TMWA

FY25 Annual Comprehensive Financial Report

February 3, 2026

**Truckee Meadows
Water Authority**

Quality. Delivered.

Purpose of the ACFR

- Provides complete picture
- Demonstrates compliance
- Supports decision-making
- Offers transparency

FY25 ACFR Takeaways

1. Auditor Reports – Basic Financials and Single Audit
2. Debt payoff
3. Impairment Loss
4. GASB 101

Auditor Reports

Basic Financial Statements

- Report on Audit of Financial Statements

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities and the fiduciary activities of the Truckee Meadows Water Authority, as of June 30, 2025 and 2024, and the respective changes in financial position, and, where applicable, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

- Report on Internal Control

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Auditor Reports

Single Audit

- Report on Compliance for the Major Federal Program

Opinion on the Major Federal Program

We have audited Truckee Meadows Water Authority's ("TMWA") compliance with the types of compliance requirements identified as subject to audit in the OMB *Compliance Supplement* that could have a direct and material effect on TMWA's major federal program for the year ended June 30, 2025. TMWA's major federal program is identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

In our opinion, TMWA complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on its major federal program for the year ended June 30, 2025.

Auditor Reports

Single Audit (Continued)

- Report on Internal Control Over Compliance Required by the Uniform Guidance

significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiency in internal control over compliance described in the accompanying schedule of findings and questioned costs as item 2025-001, to be a material weakness.

Debt Payoff

Paid off two State Revolving Fund bonds in FY25
 Represents diligent fulfillment of debt obligations
 Interest expense: \$21.3M in 2015 vs \$8.9M in 2025

	Final Maturity Date	Authorized	Balance July 1, 2024	Additions	Deletions	Balance June 30, 2025	Due in 2025-2026

Impairment Loss

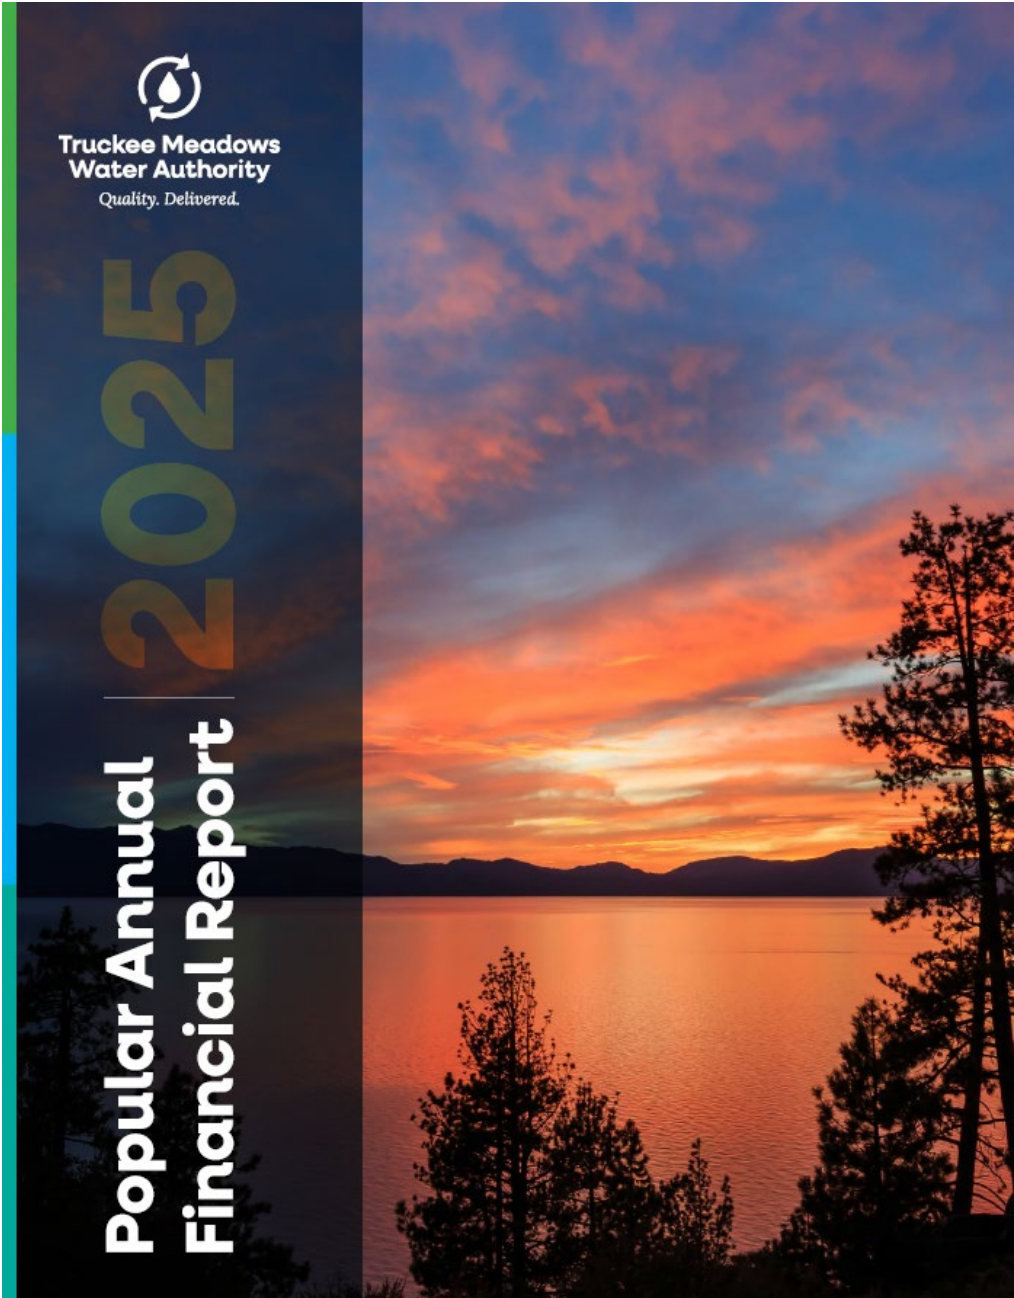

- Davis Fire in September 2024
- Old Washoe Well 4 Facility

GASB 101

Compensated Absences

- Establishes a uniform model for recognizing and measuring liabilities related to employee leave benefits
- Requires recognition of a liability for:
 - Unused leave
 - Leave that has been used but not yet paid
- Results in a larger liability

Thank You to the Team!

TO: Board of Directors
THRU: John R. Zimmerman, General Manager
FROM: Matt Bowman, Chief Financial Officer
DATE: November 20, 2025
SUBJECT: Presentation of financial performance for first quarter fiscal year 2026

Summary

Please refer to Attachments A-1 and A-2 for full Statements of Revenues, Expenses and Changes in Net Position for both actual to budget and year-over-year comparisons as discussed in the report below.

Budget to Actual

	Actual YTD 2026	Budget YTD 2026	Variance \$	Variance %
CHANGE IN NET POSITION	\$ 28,915,530	\$ 28,836,604	\$ 78,926	— %

Change in net position was \$0.1m or 0% higher than budget through Q1 2026. This was driven by lower operating income, lower operating expenses, higher investment earnings and lower capital contributions.

Year over Year

	Actual YTD 2026	Actual YTD 2025	Variance \$	Variance %
CHANGE IN NET POSITION	\$ 28,915,530	\$ 37,709,068	\$ (8,793,538)	(23)%

Change in net position was \$8.8m or 23% lower than the prior year. The largest driver of this decrease was the recognition of a \$9.0m credit to will serve revenue resulting from a resource exchange agreement with TRIGID and TRIC related to the effluent pipeline to TRIGID in the prior year. TMWA received the cash in 2021, but held it on deposit until effluent was delivered via the pipeline, per the terms of the agreement. This occurred in the first quarter at which point \$9.0m was recognized as will serve revenue.

Revenue

Budget to Actual

	Actual YTD 2026	Budget YTD 2026	Variance \$	Variance %
OPERATING REVENUES				
Charges for Water Sales	48,028,621	48,802,387	(773,766)	(2)%
Hydroelectric Sales	1,075,374	860,339	215,035	25 %
Other Operating Sales	795,066	1,145,984	(350,918)	(31)%
Total Operating Revenues	49,899,061	50,808,710	(909,649)	(2)%

Operating revenue was \$0.9m or 2% lower than budget through Q1 2026. Water sales were within 2% of budget, hydroelectric revenue was 25% higher than budget and other operating sales were 31% lower than budget. Hydroelectric revenue surpassed the budget as a result of strong river flows and reduced maintenance downtime compared to what had been planned, allowing for increased generation. Other operating sales were below budget primarily due to reduced new business inspection fees resulting from lower project related activity levels.

Year over Year

	Actual YTD 2026	Actual YTD 2025	Variance \$	Variance %
OPERATING REVENUES				
Charges for Water Sales	48,028,621	47,092,739	935,882	2 %
Hydroelectric Sales	1,075,374	1,022,489	52,885	5 %
Other Operating Sales	795,066	1,332,034	(536,968)	(40)%
Total Operating Revenues	49,899,061	49,447,262	451,799	1 %

Year over year, operating revenues were higher by \$0.5m or 1% due primarily to higher water sales. Water consumption remained flat compared to FY 2025.

Operating Expenses

Budget to Actual

	Actual YTD 2026	Budget YTD 2026	Variance \$	Variance %
OPERATING EXPENSES				
Salaries and Wages	9,234,502	9,457,288	(222,786)	(2)%
Employee Benefits	4,235,637	4,724,046	(488,409)	(10)%
Services and Supplies	12,140,472	13,397,755	(1,257,283)	(9)%
Total Operating Expenses Before Depreciation	25,610,611	27,579,089	(1,968,478)	(7)%
Depreciation	9,111,906	9,226,061	(114,155)	(1)%
Total Operating Expenses	34,722,517	36,805,150	(2,082,633)	(6)%

Total operating expenses were \$2.1m or 6% lower than budget through Q1 2026. Salaries and wages and benefits were lower primarily due primarily to position vacancies. Services and supplies were \$1.3m or 9% lower due to various expense categories. Two of the larger variances are electrical costs, which were lower by \$0.3m and chemicals were lower by \$0.2m.

Year over Year

	Actual YTD 2026	Actual YTD 2025	Variance \$	Variance %
OPERATING EXPENSES				
Salaries and Wages	9,234,502	8,579,136	655,366	8 %
Employee Benefits	4,235,637	3,870,399	365,238	9 %
Services and Supplies	12,140,472	12,180,231	(39,759)	— %
Total Operating Expenses Before Depreciation	25,610,611	24,629,766	980,845	4 %
Depreciation	9,111,906	9,011,970	99,936	1 %
Total Operating Expenses	34,722,517	33,641,736	1,080,781	3 %

Year over year operating expenses were \$1.1m or 3% higher compared to the prior year. Salaries and wages and benefits are higher than prior year to due to Labor Market Index (LMI) increases, step increases, and additions to staff during FY 2025 and Q1 2026. Services and supplies remained flat year over year.

Non-Operating Revenues (Expenses)

Budget to Actual

	Actual YTD 2026	Budget YTD 2026	Variance \$	Variance %
NONOPERATING REVENUES (EXPENSES)				
Investment Earnings	1,285,673	1,084,284	201,389	19 %
Net Increase (Decrease) in FV of Investments	384,929	—	384,929	— %
Gain (Loss) on Disposal of Assets	179,154	(375,000)	554,154	(148)%
Amortization of Bond/note Issuance Costs	—	—	—	— %
Interest Expense	(2,110,819)	(2,228,561)	117,742	(5)%
Total Nonoperating Revenues (Expenses)	(261,063)	(1,519,277)	1,258,214	(83)%

Nonoperating expenses were \$1.3m or 83% lower than budget through Q1 2026. There was a net increase in the fair value of investments as market interest rates continue to drop. This trend will continue if rates continue to fall in 2025 and 2026.

Year over Year

	Actual YTD 2026	Actual YTD 2025	Variance \$	Variance %
NONOPERATING REVENUES (EXPENSES)				
Investment Earnings	1,285,673	1,474,848	(189,175)	(13)%
Net Increase (Decrease) in FV of Investments	384,929	1,939,540	(1,554,611)	(80)%
Gain (Loss) on Disposal of Assets	179,154	21,830	157,324	721 %
Amortization of Bond/note Issuance Costs	—	—	—	— %
Interest Expense	(2,110,819)	(2,220,619)	109,800	(5)%
Total Nonoperating Revenues (Expenses)	(261,063)	1,215,599	(1,476,662)	(121)%

Net nonoperating expenses were \$0.3m compared to net nonoperating revenue of \$1.2m in the prior year for a change of \$1.5m or 121%, primarily due to the fair value adjustments in investment holdings. The adjustment in the prior year was significantly higher than the current year caused by a higher decline in the 5-year Treasury rate—19% in Q1 2025 compared to only 3% in Q1 2026.

Capital Contributions

Budget to Actual

	Actual YTD 2026	Budget YTD 2026	Variance \$	Variance %
CAPITAL CONTRIBUTIONS				
Grants	3,000,000	3,033,707	(33,707)	(1)%
Water Resource Sustainability Program	158,928	154,127	4,801	3 %
Developer Infrastructure Contributions	7,118,316	3,237,805	3,880,511	120 %
Developer Will-serve Contributions (Net of Refunds)	526,765	838,350	(311,585)	(37)%
Developer Capital Contributions - Other	341,000	—	341,000	— %
Developer Facility Charges (Net of Refunds)	1,817,200	3,779,207	(1,962,007)	(52)%
Contributions from Others	—	34,125	(34,125)	(100)%
Contributions from Other Governments	1,037,840	5,275,000	(4,237,160)	(80)%
Net Capital Contributions	14,000,049	16,352,321	(2,352,272)	(14)%

Capital contributions were \$2.4m or 14% lower than budget. Contributing to the variance is lower contributions from other governments and lower developer facility charges. Contributions from other governments accounts for payments from City of Reno related to American Flat. Spending will come later in the year, at which point contributions from City of Reno will increase. Lower facility charges are due to less new business projects. The largest offsetting variances are related to higher non-cash developer infrastructure contributions, offset by lower contributions related to the American Flat APW facility. During the quarter, developer infrastructure contributions included a substantial amount of assets completed, inspected, and dedicated to TMWA from Quilici Ranch and Talus Valley, totaling \$4.7m in Q1. This figure does not necessarily represent the current level of project activity, but rather the completion of entire projects or specific project segments.

Year over Year

	Actual YTD 2026	Actual YTD 2025	Variance \$	Variance %
CAPITAL CONTRIBUTIONS				
Grants	3,000,000	241,156	2,758,844	1,144 %
Water Resource Sustainability Program	158,928	158,272	656	— %
Developer Infrastructure Contributions	7,118,316	2,478,636	4,639,680	187 %
Developer Will-serve Contributions (Net of Refunds)	526,765	9,850,040	(9,323,275)	(95)%
Developer Capital Contributions - Other	341,000	4,217,497	(3,876,497)	(92)%
Developer Facility Charges (Net of Refunds)	1,817,200	3,259,405	(1,442,205)	(44)%
Contributions from Other Governments	1,037,840	482,937	554,903	115 %
Net Capital Contributions	14,000,049	20,687,943	(6,687,894)	(32)%

Year over year, capital contributions are \$6.7m or 32% lower than the prior year primarily due to the recognition of a \$9.0m credit to will serve revenue resulting from a resource exchange agreement with TRIGID and TRIC related to the effluent pipeline to TRIGID in the prior year. Additionally, grant revenue is higher due to the recognition of EPA related funding for TMWA's American Flat APW facility.

Capital Spending

Cash spent on capital outlays and construction projects through Q1 2026 was approximately \$14.5m. Total budgeted capital spend for fiscal year 2026 is \$121.6m, which included \$30.0m and \$4.0m for the American Flat APW facility and Lazy 5 Booster Pump Station, respectively. Spending on the top three projects during the fiscal year is listed below:

American Flat APW facility	\$ 1.5m
Lazy 5 Booster Pump Station	\$ 1.3m
Orr Ditch Pump Station and Hydro Facility	\$ 1.0m

Cash Position

At September 30, 2025 total cash and investments was \$156.0m or \$4.2m lower than at the beginning of the fiscal year. Of the total cash and investments, \$98.3m was unrestricted to be used to meet upcoming and future operating and maintenance expenses, principal and interest payments and construction project payments. The remaining \$57.7m was restricted to pay for scheduled bond principal and interest payments as well as maintaining required reserves as stipulated in our bond covenants.

TMWA

Fiscal Year 2026 Q1 Year-to-Date Financial Results

December 11, 2025

**Truckee Meadows
Water Authority**

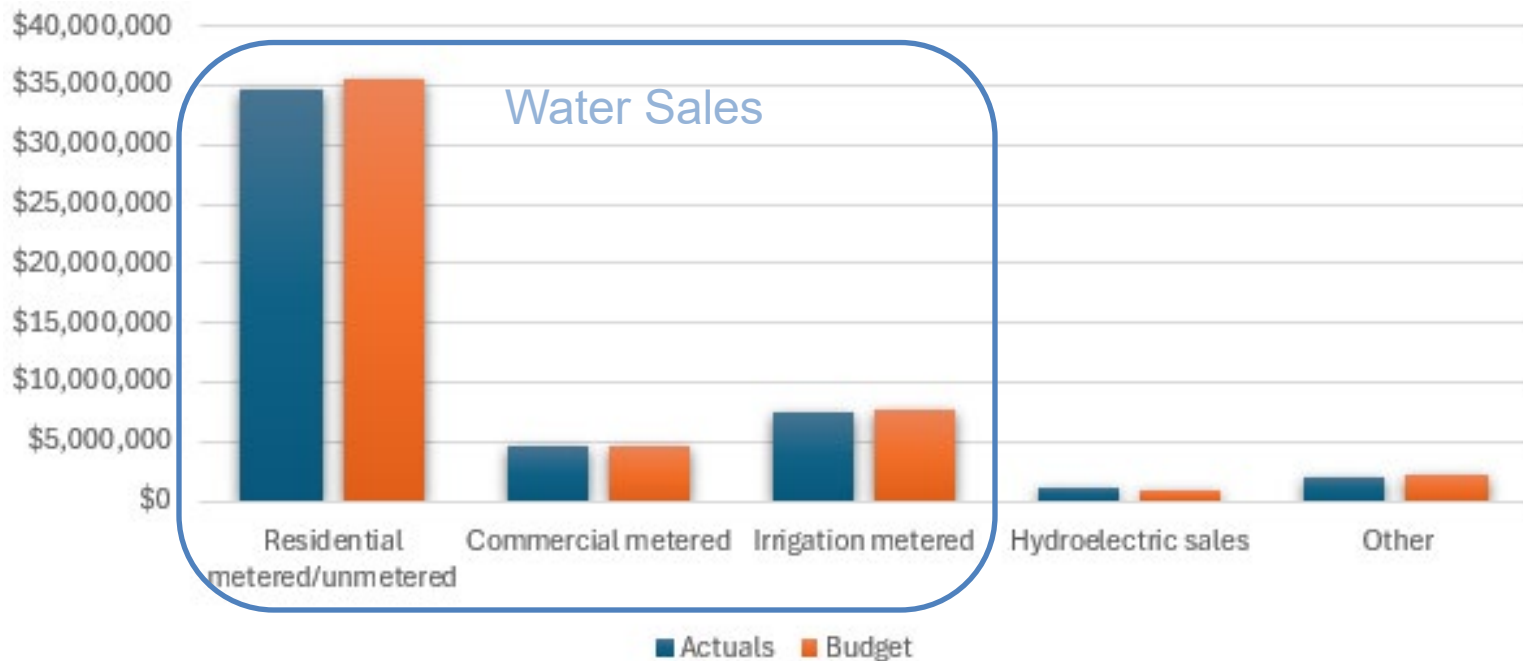

Quality. Delivered.

Summary

Q1 Compared to Budget

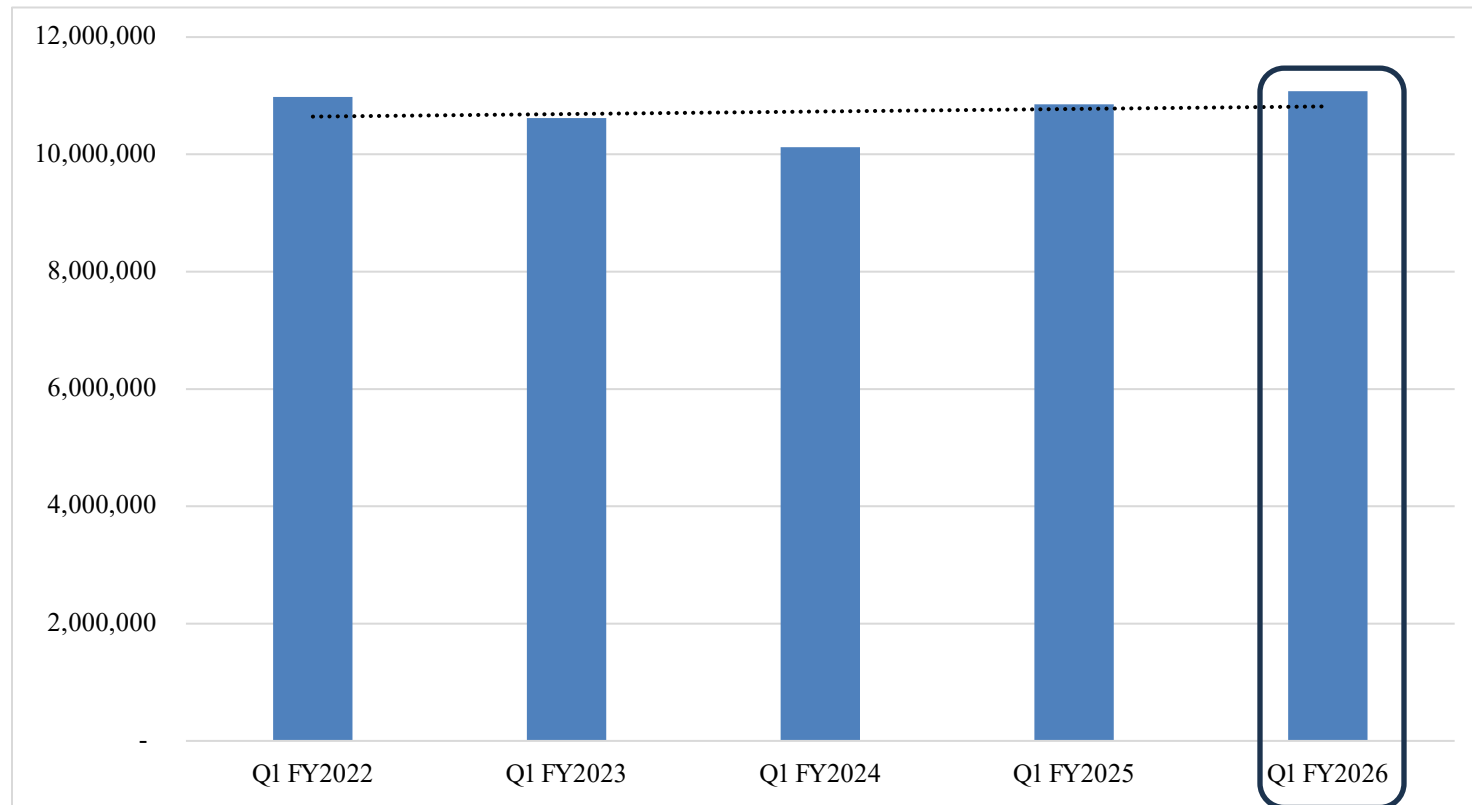

- Operating Revenue -\$1.0m / -2%
 - Water sales lower by 2%
- Operating Expenses -\$2.0m / -7%
 - Wages/Benefits lower by 5%
 - Services and supplies lower by 9%
- Investment Earnings +\$0.2m / +19%
- Connection Fees -\$1.9m / -40%
 - Somewhat timing related (large receipts in October - Q2)
- Capital Spending \$14.5m
- Cash balance since BoY -\$4.2m / -3%

Operating Revenues

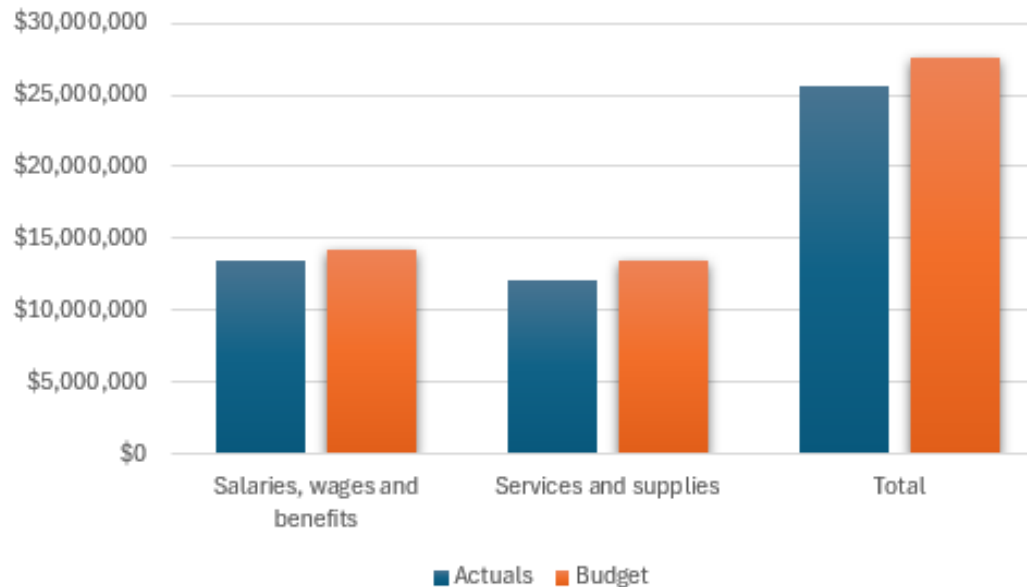

- Water Sales were within 2% of budget
- Hydroelectric revenue exceeded budget by 25% due to strong river flows and less maintenance downtime
- Other operating sales were below budget primarily due to reduced new business inspection fees resulting from lower activity levels.

Gallons Sold (000) Q1 last 5 years

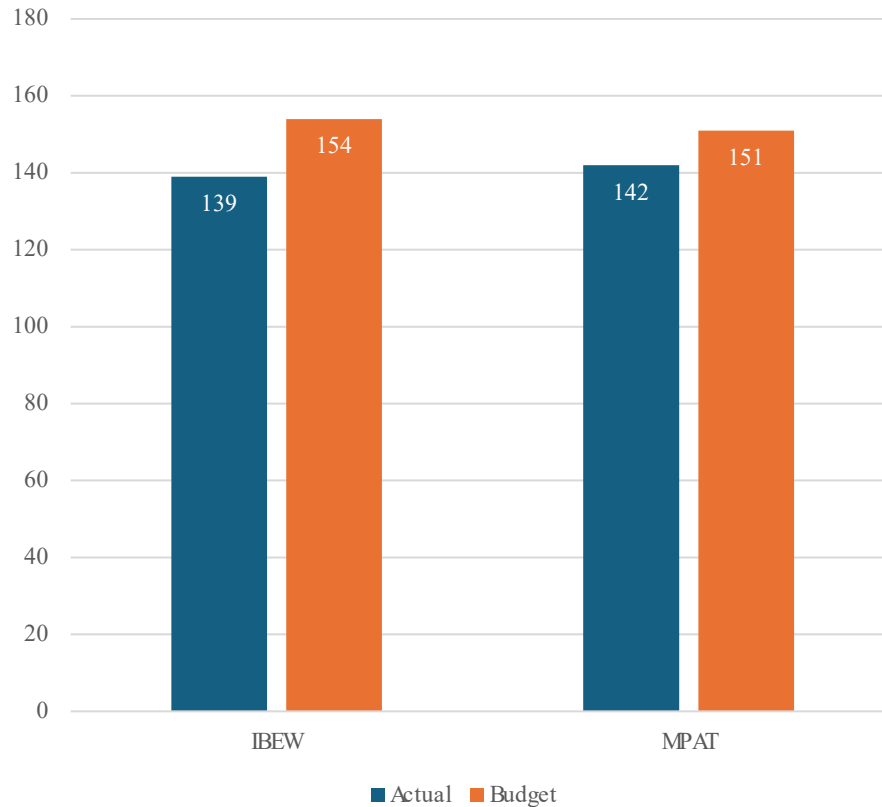

- Year-over-year gallons sold have remained stable

Operating Expenses

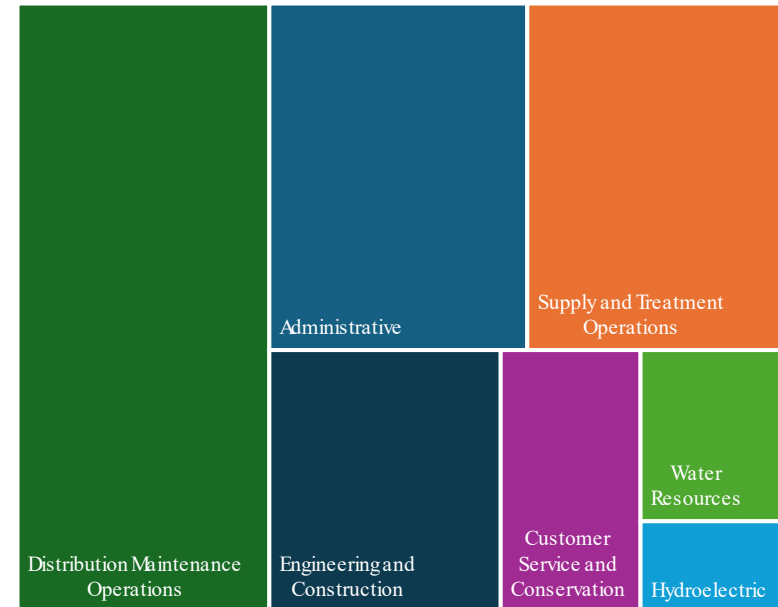

- Salaries, wages and benefits are lower than **budget** due to position vacancies
- Services and supplies are lower than **budget** due to various expense categories, including-
 - Electrical costs lower by \$0.3m
 - Chemical costs lower by \$0.2m
- **Year-over-year** salaries and wages and employee benefits were slightly higher due to Labor Market Index (LMI) increases, step increases and addition to staff while services and supplies remained flat

Employee Headcount

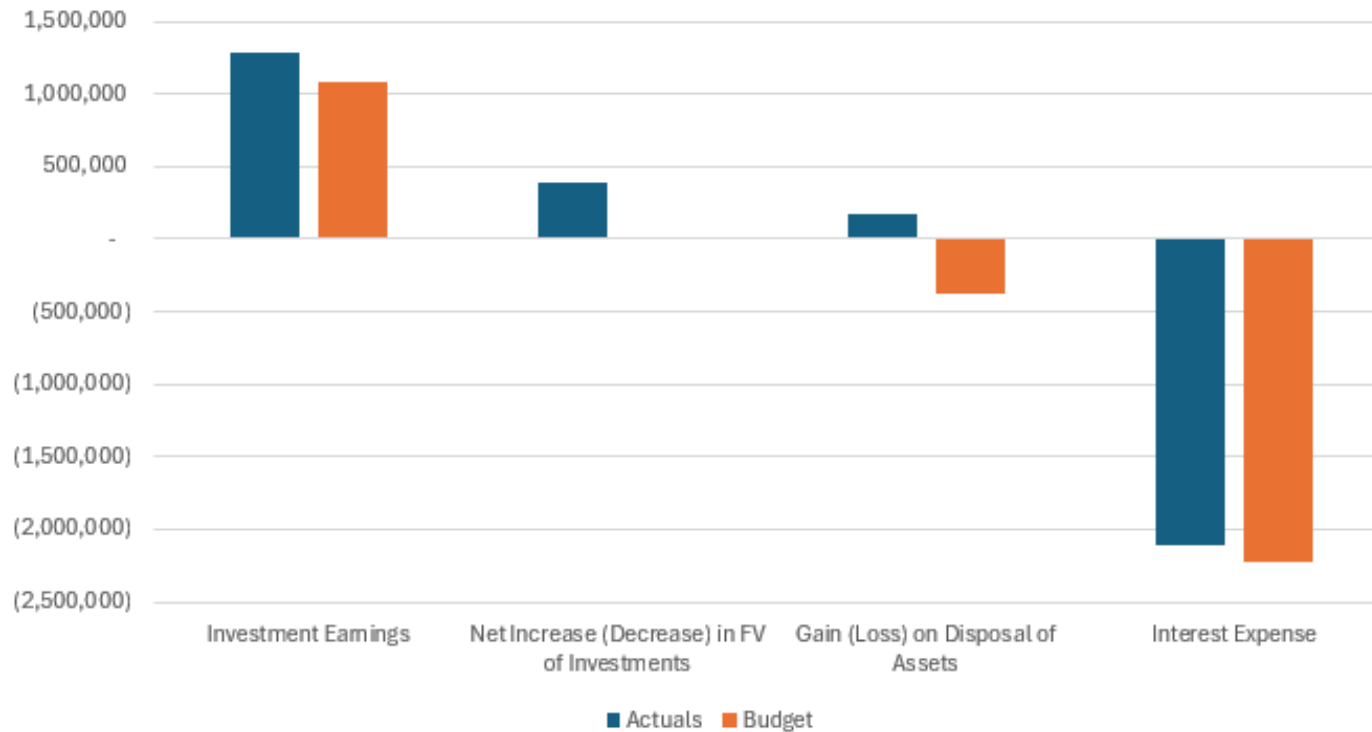

Staff by Department

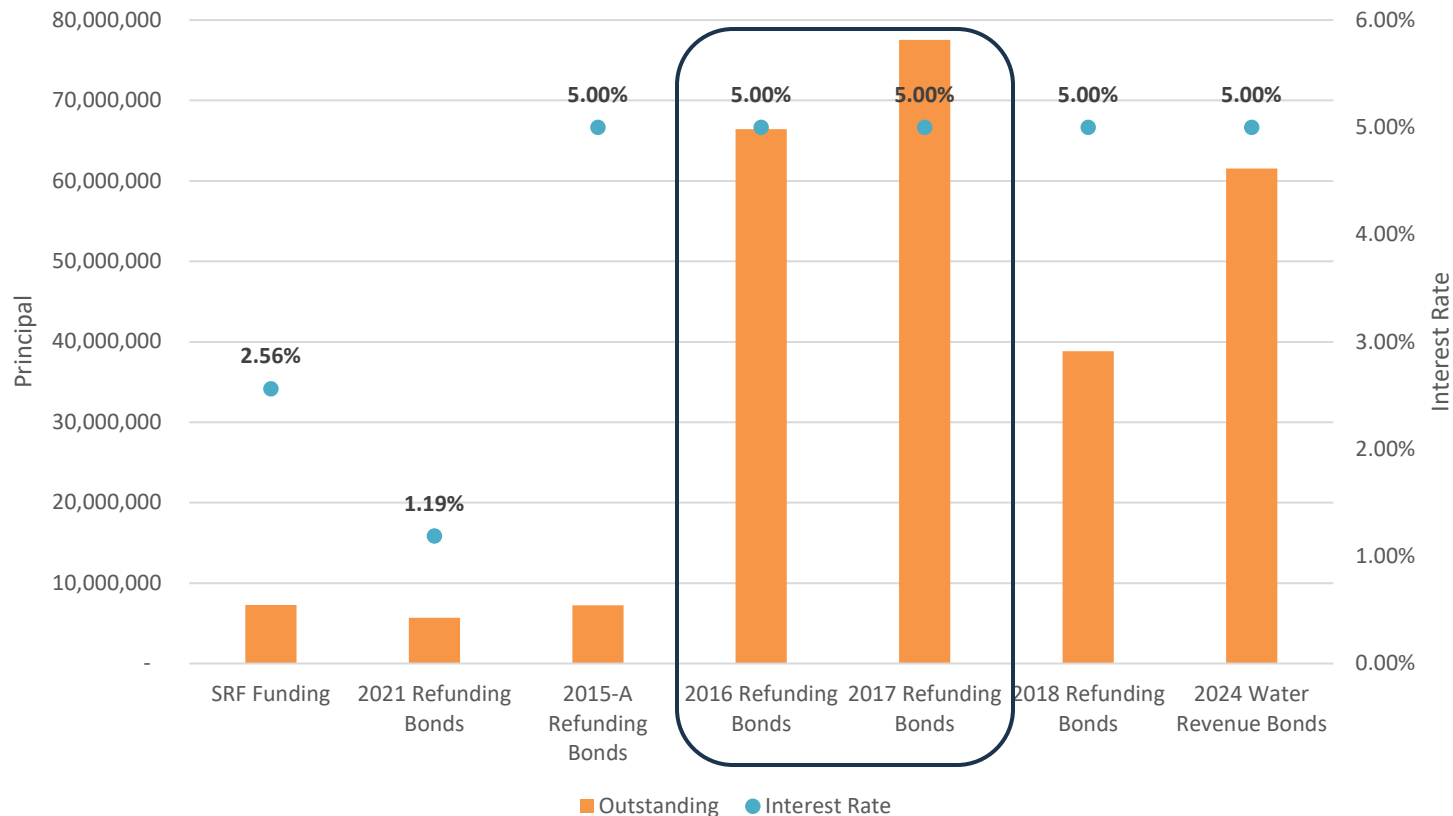

- Headcount is lower than budget due to position vacancies
- Headcount will stay under budget this year because management has chosen to defer certain budgeted positions

Nonoperating Revenues (Expenses)

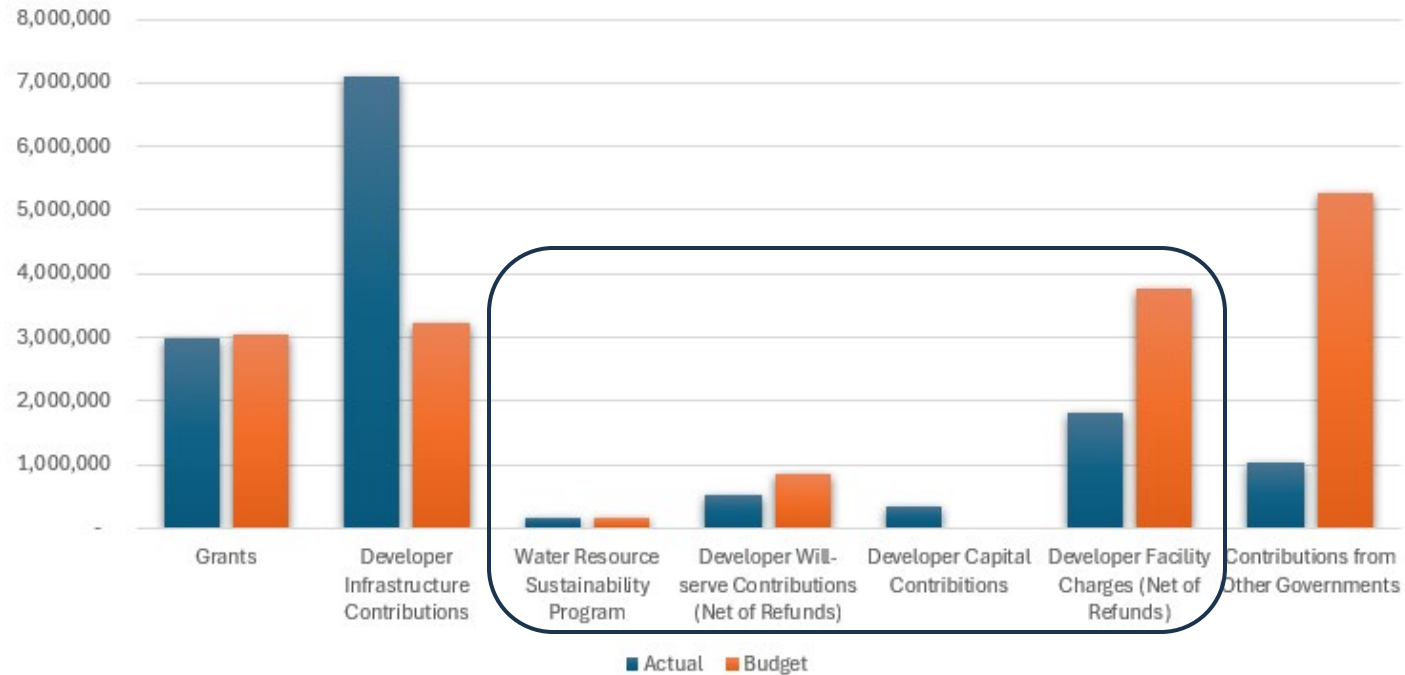

- FV adjustment in the prior year due to a significant Q1 decline in market rates. Rates have since stabilized.

Long-term Debt Outstanding

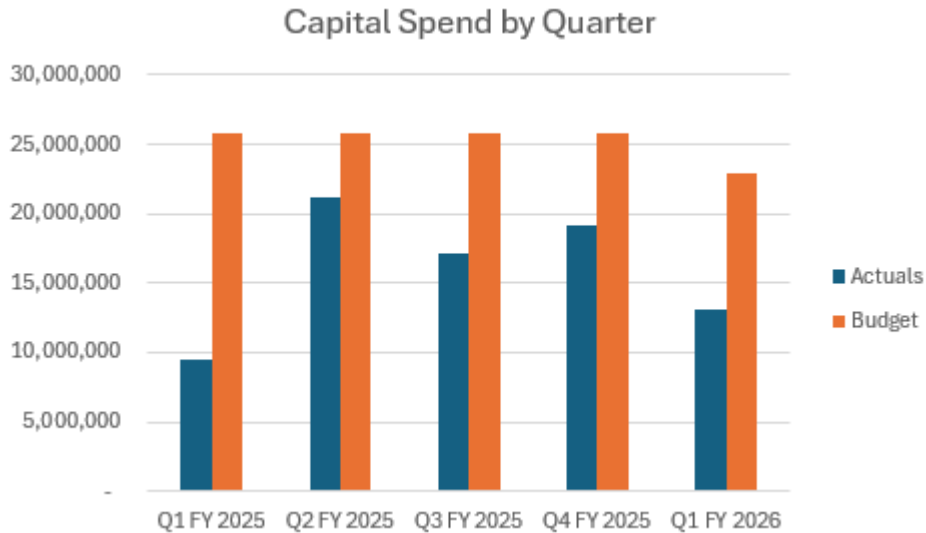

- Series 2026 Refunding Bonds of the 2015-A and 2016 Refunding Bonds is expected to close in April 2026
 - Estimated savings of \$9.7m (13.4%) NPV
 - RBC was selected as the underwriter

Capital Contributions

- New Business Fees (Connection Fees) lower by 40%
- Developer infrastructure contributions included a couple large projects (Talus Valley and Quilici Ranch) inspected and dedicated to TMWA for \$4.7m
- Contributions from other governments is lower due to timing of spend on the American Flat APW facility

Capital Spending

Orr Ditch Booster Pump Station and Hydro Facility

- Capital spend, excluding American Flat APW facility was 57% of budget
- Capital spend goal for the fiscal year is 75% of CIP
- Orr Ditch Pump Station and Hydro Facility wrapping up (\$39m total project cost)

Wrap-up

- TMWA's revenue and operating expenses remain stable
- TMWA's cash position remains at \$156.0m
- Upcoming – Series 2026 Refunding Bonds – expected savings \$9.7m (13.4%) NPV savings
 - Expected to close in April 2026
- Upcoming – SRF funds for American Flat APW facility at 1%

Thank you!

Matt Bowman, Chief Financial Officer

STAFF REPORT

TO: Board of Directors
THRU: John R. Zimmerman, General Manager
FROM: Matt Bowman, Chief Financial Officer, and
Shawn Stoddard, Senior Resource Economist
DATE: January 9, 2026
SUBJECT: **Rule Amendment, First Reading, Public Hearing: Discussion and referral to a second reading structure changes to TMWA water rates reflecting the results of a Cost of Service study**

Recommendation

Staff recommends the Board refer to a second reading structure changes to TMWA's water rates reflecting the results of a Cost of Service (COS) study completed in 2025. The purpose of the changes is to redistribute the collection of water sales revenue in accordance with the cost to provide water service to each of TMWA's customer groups consistent with methodology set forth by the American Water Works Association (AWWA). The second reading of this proposal is tentatively scheduled for the Board's February 18, 2026 meeting with the changes to be effective the first billing cycle in May 2026.

Summary

At the Board's September 17, 2025 meeting, Staff presented the results of the Cost of Service study along with the recommended rate structure changes. The Board tentative approved the results of the study and directed staff to move forward with additional public outreach. Below is a summary of the public outreach.

Public Outreach

 - At TMWA Board of Directors Meeting, 12-11-25

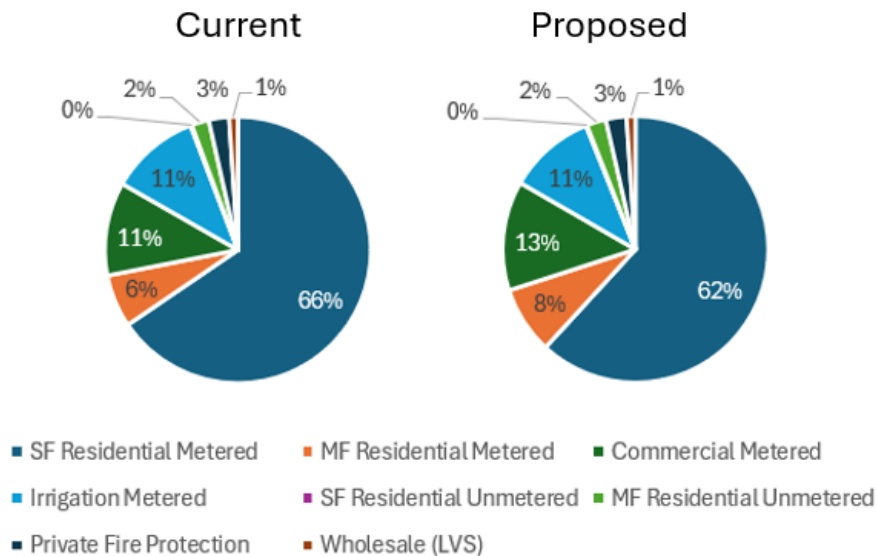

TMWA has received several questions from customers about the rate changes resulting from the COS study. These questions and responses are summarized in **Attachment A**.

It is important to note that TMWA's rates will also be impacted by the planned 3.5% rate increase also effective in May 2026. This rate increase was initially approved by the Board in February 2024 and affirmed by the Board in October 2025 and is required to sustain overall financial viability and meet key financial objectives. To clearly demonstrate the effect of the COS changes and the 3.5% rate increase, see **Attachment B**.

Background

TMWA has conducted its first COS study since the 2015 consolidation with Washoe County's water system to ensure equitable, transparent, and defensible rate structures. The study, guided by AWWA best practices, identifies the cost of serving each customer class, prevents cross-subsidization, and supports financial sustainability through full-cost recovery. Importantly, the COS study does not change total revenue but reallocates it among customer groups based on actual usage and demand characteristics. Below are two pie charts showing the current allocations between customer groups and the proposed allocations.

Allocation of Revenue Collected

Another key objective was integrating former Washoe County rate schedules into TMWA's consolidated structure. STMGID customers remain on their current rates unless the residence is sold or until 2035, per the contracts governing TMWA's consolidation of that GID's water system.

The COS study included allocating costs into fixed and variable components, resulting in recommended changes: increasing fixed charges from 33% to about 43% of total revenue and reducing variable charges from 67% to 57%. This adjustment reflects the cost of maintaining system readiness and capacity and aligning with industry standards. Customer classes were analyzed for meter size, usage patterns, and peaking factors, resulting in updated allocations for single-family, multi-family, commercial, irrigation, and wholesale customers.

To implement these findings, rate design changes are proposed. All customer groups will see revised service charges based on meter capacity, with larger meters paying proportionally more to reflect system capacity requirements. Single-family and multi-family customers will experience reduced commodity charges for lower tiers and increased charges for higher tiers, while commercial customers will move to a uniform rate structure. Irrigation customers will retain seasonal pricing but with adjusted rates. These changes aim to simplify rate structures, increase the accuracy of aligning the cost of service with revenue, and ensure more predictable revenue streams. For more background information refer to the September 2025 board packet included at the link below.

[TMWA Board of Directors Meeting-Wed, Sept 17, 2025 - Truckee Meadows Water Authority](#)

Recommended Motion

Move to refer the proposed rate design changes as required from TMWA's Cost of Service study to a second reading on February 18, 2026.

Customer Question 1:

Isn't the COS nothing more than a rate increase? If fixed rates are increased bases upon meter size how does that equate to 'slightly reduced per-gallon water charges? Please define slightly. Could it mean insignificantly

TMWA Response to Customer:

Hi Gordon,

*Thanks for the question about our cost of service study. Below is a more detailed table which shows the current rates (left) and proposed rates (right). You'll notice there are two different rates, the Customer Charge and the Commodity Charge. The Customer Charge (also referred to as 'meter' charge) is based on the fixed cost to deliver water, or capacity of the system. The Commodity Charge (also referred to as 'use' charge) is the per gallon charge. The proposed new rates include lower Commodity Charges for Tiers 1 and 2, which is why this change could result in lower charges. What I'm seeing is that for at least 85% of customers in our residential rate class, they will see a **decrease** in total monthly charges. We cannot say everyone will see a decrease, because it can depend on the usage, but for most, it will be a decrease.*

Hopefully this helps, but let me know if you have any more questions.

Current	Customer Charge	Commodity Charge			New	Customer Charge	Commodity Charge		
	per meter					per meter			
			use block	per 1,000			use block	per 1,000	
RMWS	per month		per unit	gallons	SF METERED	per month		per unit	gallons
3/4"	\$23.02		gallons		3/4"	\$21.13		gallons	
1"	\$25.32				1"	\$33.21			
1.5"	\$28.81	Tier 1	6,000	\$2.14	1.5"	\$33.21	Tier 1	6,000	\$2.12
2"	\$33.39	Tier 2	6,001-25,000	\$3.45	2"	\$33.21	Tier 2	6,001-25,000	\$3.18
3"	\$37.98	Tier 3	>25,000	\$4.05	3"	\$33.21	Tier 3	>25,000	\$4.25
4"	\$43.70				4"	\$33.21			
6"	\$50.66				6"	\$33.21			

*Thanks,
Matt*

Customer Question 2:

- *How does the simplified structure ensure multiplex and commercial customers pay their fair share of the cost of water?*
- *How does this new simplified Structures of a single rate differentiate between heavy water users industries and low water industries?*
- *How does this simplified structure encourage water conservation in the Great Basin high desert in commercial multiplex and in industrial use?*
- *When will the board be making their decision? And approximately when will these changes be seen on the monthly bills?*

TMWA Response to Customer:

Hi Valerie,

Thanks for your questions on the Cost of Service rate changes. I went through each of them below and provided answers. Let me know if you have any other questions.

How does the simplified structure ensure multiplex and commercial customers pay their fair share of the cost of water?

- *The cost of service study showed that TMWA needs to collect a larger portion of revenue through meter charges to ensure all customer groups pay their fair share. This includes multiplex (multi-family residential) and commercial customers. By aligning charges more closely with meter size, the new structure ensures that costs are distributed fairly based on the level of service required.*

How does this new simplified Structures of a single rate differentiate between heavy water users industries and low water industries?

- *The difference comes from meter size. Large water users require bigger meters to meet their demand, which means they will pay higher monthly customer charges. Smaller water users have smaller meters and will pay much lower customer charges. This approach keeps the structure simple while still reflecting the scale of water use.*

How does this simplified structure encourage water conservation in the Great Basin high desert in commercial multiplex and in industrial use?

- *Conservation remains a key part of the rate structure. It starts when service is established—customers pay for water rights and infrastructure based on the amount of water they plan to use. Then, monthly usage charges continue to encourage conservation: the more water used, the higher the bill. This ensures that both customer groups have a financial incentive to use water efficiently.*

When will the board be making their decision? And approximately when will these changes be seen on the monthly bills?

- *The TMWA Board will review and vote on these changes at two separate meetings, scheduled for January and February. If approved, the new rates will take effect in May 2026 and will appear on customer bills starting in June 2026.*

*Thanks,
Matt*

Follow up from customer:

Hi Matt,

Thanks so much for the reply. I greatly appreciate it.

Would you be able to share the proposed residential meter rate adjusted for COS?

TMWA Response:

Hi Valerie,

Yes, absolutely. Below is a screen shot of the old rate structure (left) and the proposed new structure (right). You'll notice the proposed structure includes the same meter rates for 1" and larger. We have very few 1.5" and larger meters so we grouped all of those into the 1" price category.

If you have any other questions please let me know.

Current	Customer Charge	Commodity Charge			New	Customer Charge	Commodity Charge		
	per meter					per meter			
			use block	per 1,000			use block	per 1,000	
RMWS	per month		per unit	gallons	SF METERED	per month		per unit	gallons
3/4"	\$23.02		gallons		3/4"	\$21.13		gallons	
1"	\$25.32				1"	\$33.21			
1.5"	\$28.81	Tier 1	6,000	\$2.14	1.5"	\$33.21	Tier 1	6,000	\$2.12
2"	\$33.39	Tier 2	6,001-25,000	\$3.45	2"	\$33.21	Tier 2	6,001-25,000	\$3.18
3"	\$37.98	Tier 3	>25,000	\$4.05	3"	\$33.21	Tier 3	>25,000	\$4.25
4"	\$43.70				4"	\$33.21			
6"	\$50.66				6"	\$33.21			

-Matt

Customer Question 3:

Hello, We are on an acre in old Virginia Foothills with livestock. Our water company STMGID, was swallowed up by TMWA. Is there a rate available to us that reflects the rural nature of our usage?

TMWA Response:

Hi Barbara,

Thanks for your question about the former STMGID rates. As part of the agreement with the STMGID customers when TMWA acquired that system is that your rates will remain in effect until 2035. So, this cost-of-service study does NOT affect your rates.

Let me know if you have any other questions.

Thanks,

Matt

Customer Question 4:

How will the proposed changes impact flat-rate single-family residential customers? You focused on metered examples—what about us on flat rate?

TMWA Response:

- *Impact on flat-rate SFR customers will be very minimal, with a slight increase (their allocation changes from 2% to 3% of the “pie”).*
- *For an exact bill impact, Matt asked the customer to email COS@tmwa.com with their service address so staff can calculate it.*

Follow-up from customer:

How do we know our meter size?

TMWA Response:

- *You can look at the physical meter, but it's not currently shown on the bill (they're working to add it).*
- *Best path now: call customer service or email and TMWA will provide the meter size.*

Customer Questions 5-12 refer to the Board Packet from the September 17, 2025 Board Meeting

Customer Question 5:

The staff report on page 4 of 7 states the Single family residential customer charges by meter size should be capped at the 1 inch meter size. The report states this is because “these larger meter sizes do not correlate with safe operating capacity or lot size; the meter size was determined when installed because of engineering/water delivery challenges that only larger meter size could resolve.” There is no detail offered in the report that I can find to justify these conclusions. What are the engineering/water delivery challenges, and what are the issues with operating capacity or lot size?

TMWA Response:

Stated another way, the meter size that was installed at these locations was chosen to accommodate hydraulic limitations of the meter size that would be sufficient to satisfy the property owner’s domestic water needs. There may be a handful of properties for which a larger meter size was installed because of the lot size (perhaps potential for a granny flat or cottage unit on the property at a later date); these are exceptions and so few that it is not administratively efficient to spend the resources required to identify every customer parcel where this may be the case.

Additionally, the meter size is requested by the developer to meet engineering needs of the lot. There are three 4” meters, one 3” meter, 551 2” meters, and 326 1.5” meters. The 3 and 4 inch meter were installed prior to TMWA. Since 2008, there has only been about 60 1.5 and 2 inch RMWS meters installed by TMWA.

The indoor water use pattern for the larger residential meters is similar to a smaller meter. The summer time use is also similar to other residential service. The larger meters do have a small number of meters with larger water use and this tends to skew the average use upwards, but for most, the use is similar to other single family homes.

Customer Question 6:

Does TMWA conclude that all Single family residential meters larger than 1 inch are affected by engineering/water delivery challenges, or just some of the Single family residential water meters larger than 1 inch?

TMWA Response:

Not all, see previous response, but for the vast majority this is the case. The meter size is requested by the developer to meet the needs of the lot. The water resources are allocated by lot size.

Customer Question 7:

According to the report, there are 18,011 connections with 1 inch Single family residential meters. I would think some of the folks with 1 inch meters could argue that they could be adequately served using a 3/4 inch meter. Is this a possibility?

TMWA Response:

It is unlikely because 1-inch meters are almost always required for fire sprinklers, not for potable water demands at the customer’s property. The meter size was requested by the developer to meet the needs of the lot. If the developer requested a 1 inch meter, then it is unlikely that a ¾ would provide adequate.

Customer Question 8:

If there are water flow issues with over 800-plus larger Single family residential meters over 1 inch, why are there not also Irrigation, Multi-family residential, and Commercial services which have the same issues? The Irrigation, Multi-family, and Commercial customers are served by the same water system infrastructure, and there is no mention in the study that any of these meters have similar issues. Why would not similar issues regarding meter charges be a concern for Multi-family, Commercial, and Irrigation connections?

TMWA Response:

There might be a handful of irrigation, multi-family, and commercial customers with similar issues; however, the difference is that water usage demonstrates a strong correlation between meter size for these customer groups whereas the meter size does not have a strong correlation with water use for single family residential customers.

The meter size is requested by the civil engineer for the developer. For multi-family, commercial, and irrigation the meters are selected and sized for the application.

Customer Question 9:

There is no information contained in the study which details the shift of \$797,996 in revenue from fixed income to Use Charges as identified in table COS-11. Is there any detail which identifies how this \$797,996 is going to be collected from other Single family residential customers?

TMWA Response:

Table R-4 in the study shows the single family meter charges shifted from meters larger than 1” to the single family use rates.

Customer Question 10:

How much is it going to cost other Single family residential customers on an individual basis to fund the \$797,996 shortfall identified in table COS-11?

TMWA Response:

Without the shift, the use rates per thousand gallons would be \$2.09 for Tier 1, \$3.13 for Tier 2, and \$4.17 for Tier 3. When compared to the rates calculated in Table R-4, this means that a home using 5,000 gallons has a ‘shifted cost’ equal to \$0.19. For a home using 15,000 gallons the ‘shifted cost’ equates to \$0.75.

Customer Question 11:

If I understand the rate study correctly, the meter charge for any TMWA customer is for fixed costs, and the water rate is to collect funds for variable costs. It appears the proposed reduction in Single family residential meter fees is a reduction in funds for fixed costs, but the report indicates the funds would be shifted to Use Charges which I assume is an increase in the amount of funds collected from variable water rates. It does not seem appropriate to be shifting fixed income funds to variable rate income funds which could substantially change from year to year.

TMWA Response:

The effect of the shift is to collect 42.3% of revenues from single family accounts rather than 43.3% which is the cost of service analysis determination. This is an extremely small revenue shift that is inconsequential in the rate model.

Customer Question 12:

There has to be some reason why there are so many Single family residential meters which are much larger than what is needed by the vast majority of Single family residential customers. Having a 3 inch or 4 inch meter for a Single family residential connection is definitely not the norm for a Single family residential customer. Perhaps the customers with the largest meters should not be classified as Single family residential water customers. I would like to know why anyone would need a 2, 3, or 4 inch meter for Single family residential water service.

TMWA Response:

Less than 1% of TMWA's single family residential customers have water meters that are larger than 1" meters. This methodology of capping the single family residential base charge at the 1" meter size is used by other water agencies, notably the City of North Las Vegas in Nevada.

Additionally, since 2008 there have only been about 60 new 1.5 and 2 inch single family meters. TMWA has not installed any new 3" or 4" residential meters.

TMWA

Cost of Service and Rate Design First Reading

January 21, 2026

**Truckee Meadows
Water Authority**

Quality. Delivered.

Recommendation and Background

Staff Recommendation

- Refer to a second reading – structure changes to TMWA's water rates based on results of a Cost of Service (COS) study.

Summary

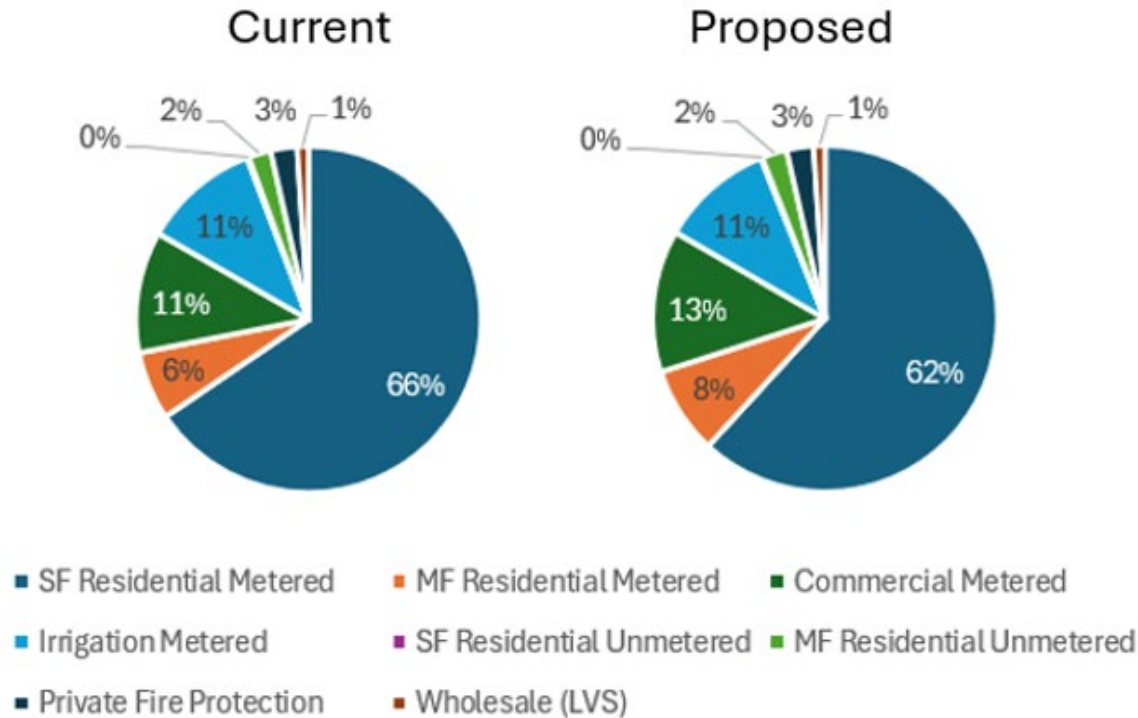

- COS Study conducted based on standards from the American Water Works Association (AWWA).
 - Seeks to distribute collection of water sales revenue in accordance with the cost to provide water service to each of TMWA's customer groups.
- COS Study and rate design changes presented in detail
 - Standing Advisory Committee (SAC) – August 2025
 - TMWA Board meeting – September 2025
- Public outreach conducted in November and December 2025.

Public Outreach

- **August Standing Advisory Committee Meeting**
- **September Board of Directors Meeting**
- **Bill Insert** – November 2025: 67,072 recipients.
- **Lead Story on TMWA.COM** (Nov 2 – Dec 29, 2025):
Visitors: 94,000; Clickthrough: 44
- **Email Newsletter** – November 2025: 142,440 recipients. 52% open rate (73,766).
- **Public Zoom Meetings** – Attendees: 19
- **Public Comment**
On TMWA.COM: 4
At TMWA Board of Directors Meeting, 12-11-25
- **Q&A with customers (attached to staff report)**

COS and Rate Design

- Allocation of revenue collected

- Integrating former Washoe County rate schedules into TMWA's structure
- Increasing the level of fixed revenue from 33% to 43%.
- Proposed implementation in May 2026.

COS and Rate Design

- Tables included in staff report

Table A															
Proposed Rate Change - Single Family Residential															
<Presented at the September 17, 2025 Board of Directors Meeting>															
Current Rate Schedule						New Rate Schedule - COS				COS + 3.5% Rate Increase

STAFF REPORT

TO: Board of Directors
THRU: John R. Zimmerman, General Manager
FROM: Sonia Folsom, Executive Assistant
Kara Steeland, Senior Hydrologist & Watershed Coordinator
DATE: January 12, 2026
SUBJECT: **Presentation of Truckee River Fund Activities for Calendar Year 2025**

Summary

- Since the inception of the Truckee River Fund in 2004, 239 Projects Approved by TMWA Board for Funding (By Resolution) – Total Resolution Amount to Date: \$17.6 million
- Total Match from Grantees: \$31.3 million
- 2025 fund expenses (\$541,144.49), administration fees (\$19,630.72) – Total expenses \$560,775.21.
- Funding available for the Spring 2026 request for proposals is approximately \$269,960.55.
- List of projects can be found on the Truckee River Fund website:
<https://truckeeriverfund.org/status/approved/>

Purpose

This report provides the TMWA Board of Directors with a summary of Truckee River Fund program (the Fund) activities since its 2004 inception, including a detailed summary of 2025 activities. This report will also be helpful to new Board members in gaining familiarity about the purpose and workings of the Fund.

TMWA and the Board should be proud of the outstanding contributions the Fund has made to the community, region, and the Truckee River watershed. Over the years, the Truckee River Fund Advisory Committee has developed a prudent and rigorous approach to the evaluation of proposals, to ensure that those recommended for approval by the TMWA Board have tangible and measurable outcomes and meet the objectives of the Fund.

Through the assistance of the Community Foundation of Northern Nevada (CFNN), which manages the program on behalf of TMWA for a nominal fee, all project proponents are required to account for funds dispersed and to provide reports on project status, success metrics and completion.

The Fund Advisory Board Committee represents the Cities of Reno and Sparks and Washoe County, where each entity appoints three representatives. The current members are:

Entity	Member	Appointed
City of Reno	Bill Bradley	2005
	Peter Gower	2023
	Neoma Jardon	2023
City of Sparks	David Stanley	2022
	Mike Brisbin	2006
	Jim Smitherman (Chair)	2021
Washoe County	Brian Bonnenfant	2017
	Don Mahin	2016
	Terri Svetich (Vice Chair)	2020

Program Background

The Fund was conceived and established in 2004 with the intent of supporting water quality and watershed protection projects that TMWA could not pursue on its own. Since inception, the Fund has evolved into an important component of TMWA's overall source water protection program, funding projects which have directly and indirectly improved water quality within the Truckee River watershed.

Financially, the Fund provides significant financial leverage for watershed and source water protection projects and supports important water quality and watershed improvement projects in the following areas:

- I. **Aquatic Invasive Species (AIS):** Projects/Programs that support the prevention or control of aquatic invasive species in the mainstem Truckee River, Lake Tahoe, other tributaries and water bodies in the Truckee River system.
- II. **Watershed Improvements:** Projects that reduce erosion or sediment, suspended solids, or total dissolve solids (TDS) discharges, nutrients, industrial contaminants, or bacterial pollutants to the River. Projects or programs that are located within 303d (impaired waters) and total maximum daily load (TMDL) sections of the River should be considered, both in California and Nevada. Innovative techniques should be encouraged. The following link identifies impaired sections of the river and its tributaries: <https://mywaterway.epa.gov/>.
- III. **Local Stormwater Improvements:** Projects that demonstrably mitigate storm water run-off due to urbanization of the local watershed. Priority should be given to those improvement projects in close proximity to TMWA's water supply intakes and canals and which will improve the reliability and protect the quality of the community's municipal water supply.
- IV. **Re-Forestation and Re-Vegetation Projects:** Projects to restore forest and upland areas damaged by fire and historical logging operations, and to improve

watershed resiliency in drought situations. Projects/programs in this category should be given a high priority due to urbanization of the watershed and increased susceptibility of the urban and suburban watershed to wildfire.

- v. **Support to Rehabilitation of Local Tributary Creeks and Drainage Courses:** Projects to support water quality improvement in creeks and tributaries to the Truckee River.
- vi. **Stewardship and Environmental Awareness:** Support to clean-up programs and the development and implementation of educational programs relative to water, water quality and watershed protection that do not fall clearly into the one of the above-mentioned categories.

2025 Grants

In 2025 the Fund, with Board approval, provided grants to 16 projects or programs:

Project	Grantee	Applicants Description	Grant Amount	Monetary Match	In-Kind Match
299	Sierra Nevada Journeys	Watershed Education Initiative	\$20,000.00	\$10,567.00	\$-
300	The Reno Initiative for Shelter & Equality (RISE)	River Stewards	\$85,000.00	\$—	\$47,840.00
301	Great Basin Outdoor School	Youth Watershed Education and Protection Projects on the Truckee River	\$7,500.00	\$9,450.54	\$669.80
302	Indigenous Peoples Council on Biocolonialism	Restoring Truckee River's Ecological Health through Solid Waste Removal and Cottonwood Recruitment	\$40,000.00	\$—	\$29,000.00
303	Friends of Nevada Wilderness	Mount Rose Noxious Weed Monitoring, Treatment, and Re-seeding 2025	\$24,700.00	\$3,000.00	\$6,720.00
304	City of Reno	Invasive Weed Control and Vegetation Management in a Truckee Meadows Urban Tributary	\$13,000.00	\$3,200.00	\$18,120.00
305	City of Reno	Strengthening Stewardship for the Truckee River	\$50,000.00	\$3,609,925.00	\$—
306	Truckee River Watershed Council	Independence Watershed Aquatic Organism Passage Project	\$55,000.00	\$198,035.00	\$60,000.00
307	Truckee Meadows Parks Foundation	Rosewood Nature Study Area: Unique and Interactive Interpretive Signage Fabrication	\$12,500.00	\$8,400.00	\$—
308	Sierra Nevada Journeys	Watershed Education Initiative	\$31,543.13	\$10,514.38	\$0.00
310	Truckee River Watershed Council	Independence Watershed Aquatic Organism Passage Project	\$75,000.00	\$250,250.00	\$60,000.00
311	Keep Truckee Meadows Beautiful	Keeping Truckee Meadows Beautiful	\$74,635.32	\$32,000.00	\$122,000.00
313	Reno Food Systems	Cultivating Watershed Resilience at the Urban-Agricultural Interface	\$46,000.00	\$—	\$16,745.00
314	Friends of Nevada Wilderness	Mount Rose Re-Seeding 2025	\$5,000.00	\$300.00	\$960.00
315	One Truckee River	Watershed Protection Benefit Project	\$75,861.00	\$60,000.00	\$10,800.00
316	Washoe County-Regional Parks & Open Space	Mayberry Park Watershed Protection and Public Restroom Project	\$250,000.00	\$ —	\$62,500.00
