SUBJECT: **TMWA Vacant Premise History**

In response to a SAC question regarding the history of vacant premises in the past few years, attached is a graph of vacant premises in TMWA's billing system from January 2009 through current. A vacant premise is defined as a property which at one point had a customer billing for water service, but at the end of the month that the report was run there was no one billing for service; thus, the premise was defined as vacant.
